A J 021 Criminal Justice in Society

***** MWF 7:25am-8:25am

Prerequisites: None. Prerequisite Skills: 1. Advisory Reading Level II. Corequisites: None. Limitations on Enrollment: None. Advisories: ENG-001A with a grade of "C" or better. This course introduces students to the characteristics of the criminal justice system in the United States. Focus is placed on examining crime measurement, theoretical explanations of crime, responses to crime, components of the system, and current challenges to the system. The course examines the evolution of the principles and approaches utilized by the justice system and the evolving forces which have shaped those principals and approaches. Although justice structure and process is examined in a cross cultural context, emphasis is placed on the US justice system, particularly the structure and function of US police, courts, and corrections. Students are introduced to the origins and development of criminal law, legal process, and sentencing and incarceration policies. (UC, CSU)

BIM 001A Beginning Keyboarding

Prerequisites: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is an introduction to touch keyboarding skill on a personal computer for alphabetic, numeric, and symbol keys. The student learns proper fingering and technique to establish threshold speed and accuracy. The student also manipulates a computer application program to input information. (CSU)

BIM 001B Intermediate Keyboarding and Document Processing

Prerequisites: None. Corequisites: None. Limitations on Enrollment: None. Advisories: BIM-001A with a grade of "C" or better. This course is designed to introduce the keyboard-proficient student to features of word processing software for processing documents. Sample documents include research papers, general reports, correspondence for business and personal use, and tables. The course further develops the student's touch keyboarding skills acquired in a beginning course. (CSU)

BIOL 003 General Botany

Prerequisites: BIOL-001 Core Biology with a grade of "C" or better. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is a study of the life and activities of plants followed by an introduction to plant physiology, plant structure, plant genetics, plant ecology, plant evolution, and a general survey of the major plant groups. A Survey of diversity is extended to both the Fungi and the Protista Kingdoms. Lastly an ecology unit is studied that investigates the ecological principles of ecosystems, communities, and of populations. The course is for the pre-professional student in the biological sciences and is fundamental for the student planning to specialize in forestry, horticulture, agriculture, food processing, pharmacy, and other subjects requiring a scientific knowledge of plant life. Field trips are included. This course meets the CSU general education laboratory science requirement and IGETC requirements. (UC, CSU)

BIOL 010 Survey of Biology

Prerequisites: None. Prerequisite Skills: 1. Reading Level II. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is an introduction to biology for non-majors. Biology includes all aspects of the scientific study of life. In this course, the structure, function, and behavior of organisms are studied at the molecular, cellular, organismal, and environmental levels within an evolutionary conceptual framework. On and off-campus field work is required. The course meets the CSU general education laboratory science requirement and IGETC requirements. (UC, CSU)

CDEV 093V Work Experience: Child Development and Education

Prerequisites: None. Corequisites: None. Limitations on Enrollment: Work Experience: The student must enroll in a course in the discipline directly related to the work experience. The student must enroll in a minimum of 7 units including work experience units, during the semester. For summer session, the student must enroll in one related course in addition to work experience. The combined total number of units a student may take in work experience and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of work experience program objectives and an employer work experience agreement. Advisories: GUID-030 GUID-031 GUID-032 GUID-033 each with a grade of "C" or better. This course is designed for the student employed or wanting to gain practical experience working in the early childhood education setting. The course objectives are developed by the student in consultation with his or her supervisor. The student is engaged in a specific research project or on-the-job learning activities under the supervision of the work site supervisor and college work experience instructor.

Prerequisites: None. Prerequisite Skills: None. Corequisites: None. Limitations on Enrollment: Work Experience: The student must enroll in a course in the discipline directly related to the work experience. The student must enroll in a minimum of 7 units including work experience units, during the semester. For summer session, the student must enroll in one related course in addition to work experience. The combined total number of units a student may take in work experience and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of work experience program objectives and an employer work experience agreement. Advisories: GUID-030 and GUID-031 and GUID-032 and GUID-033 each with a grade of "C" or better. This course is designed for the student employed in a computer science related position. The course objectives are developed in consultation with a work supervisor. The student is engaged in a specific research project or on-the-job learning activities under the supervisor and the college work experience instructor.

E M 070 Introductory Techniques for Electron Microscopy

Prerequisites: None. Prerequisite Skills: 1. None. Corequisites: None. Limitations on Enrollment: None. Advisories: Reading level II. This course is a beginning electron microscopy lecture and laboratory course dealing with the alignment and operation of the transmission electron microscope (TEM) as well as the preparation of particles and replicas for viewing on the TEM. The course includes individual training in the use of the TEM and techniques for photography.

ELECT 017 Robotics / Automation Introduction

Prerequisites: None. Corequisites: None. Limitations on Enrollment: Basic knowledge of Electronics/Electrical or industry experience. Advisories: ELECT-011 or ELEC-030 each with a grade of "C" or better. This course is designed to offer instruction in introductory industrial robotics and automation. Manufacturing and materials processing has moved into the age of automation. This technology combines electronics, computers, mechanics, pneumatics, and hydraulics into an interrelated system. Mechatronics is the technical name for this topic of study and requires an acquired knowledge of each of the technologies incorporated. This course of study will bring students to a level of understanding in each of the areas, enabling them to make usable applications. (CSU)

ENG 001D Advanced Composition and Critical Thinking

Prerequisites: ENG-001A Reading and Composition with a grade of "C" or better. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed for the student who wishes to transfer to a four-year college or university. The course emphasizes the development of critical thinking skills through instruction in essay writing by focusing on the principles of logic and developing the abilities to analyze, to criticize, and to reach reasoned conclusions. Critical thinking is refined by close reading of prose to distinguish fact from value judgment and knowledge from opinion. The student is required to write between 6,500 and 8,000 words divided among several essay assignments. (UC, CSU, C-ID ENGL 105)

ENGR 001 Introduction to Engineering and Technology

Prerequisites: MATH-090, Beginning Algebra, with a grade of "C" or better or higher level Math course, or a minimum of assessment level 4 on the Math Placement Test. Advisory: Reading Level II. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is an introduction to the engineering profession and processes used by engineers and technologists. Computer applications are used to demonstrate the problem-solving techniques used by engineers and technologists. The course explores the branches of engineering, the functions of an engineer, and the industries in which engineers work. Engineering education pathways are explored and effective strategies are discussed for students to reach their full academic potential. Communication skills are developed pertinent to the engineering profession. This course is designed for the student considering career possibilities in engineering and/or engineering technology. ENGR 004 Engineering Materials

Prerequisites: CHEM-001A, General Chemistry, and PHYSC-004A, Principles of Physics: Mechanics, each with a grade of "C" or better. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course presents the internal structures and resulting behaviors of materials used in engineering applications, including metals, ceramic, polymers, composites, and semiconductors. The emphasis is upon developing the ability both to select appropriate materials to meet engineering design criteria and to understand the effects of heat, stress, imperfections, and chemical environments upon material properties and performance. Laboratories provide opportunities to directly observe the structures and behaviors discussed in the course, to operate testing equipment, to analyze experimental data, and to prepare reports. (UC, CSU, C-ID ENGR 140B)

ENGR 008 Statics

Prerequisites: MATH-002, Calculus II, and PHYSC-004A, Principles of Physics: Mechanics, each with a grade of "C" or better. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is a study of rigid bodies in static equilibrium when acted upon by forces and couples in two-dimensional and three-dimensional space. Included are equilibrium of rigid bodies, trusses, frames, and machines, as well as the calculation of centers of mass, centroids, friction, distributed forces, beams, shear and moment diagrams, and moments of inertia. ESL 080 Low-Intermediate English as a Second Language Speaking/Listening

Prerequisites: None. Prerequisite Skills: 1. Appropriate Level I placement based on the current entry exam and multiple measures. Reading and writing level 1 is appropriate for the ESL course sequence. For success in ESL 80 it is necessary for students to read, write, and communicate at the Low-Intermediate ESL level. Corequisites: None. Limitations on Enrollment: None. Advisories: - Students are strongly advised to enroll concurrently in the ESL reading/writing course of the appropriate level (ESL 82, ESL 85, or ESL 88) based on placement exam scores and multiple measures. In addition, students are strongly advised to enroll concurrently in the ESL grammar course of the appropriate level (ESL 82, ESL 85, or ESL 88) based on placement exam scores and multiple measures. This course is designed to develop listening comprehension and oral proficiency of standard spoken English at the low-intermediate level. Listening focuses on comprehension of modified spoken English, vocabulary in context, and ideas in speeches and discussions. Speaking focuses on clear pronunciation of common words and phrases, continued development of fluency in conversation, and proficiency in initiating, sustaining, and ending oral communication in a variety of contexts. Units earned in this course do not count toward the associate degree.

LIBRY 001 Library Information Literacy

Prerequisites: None. Prerequisite Skills: 1. Prerequisite Reading Level II. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed to help the student develop information literacy skills and to introduce the variety of information resources and information retrieval tools available in academic libraries. The student learns about library services and resources as well as how to develop research strategies, how to effectively retrieve information utilizing library research tools, and how to cite retrieved sources in major writing styles.(UC, CSU)

LIBRY 003 Information Competency

Prerequisites: None. Prerequisite Skills: 1. Prerequisite Reading Level II. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed to empower students with the technological skills, research strategies, and critical thinking abilities needed to find, evaluate, use, and communicate information in various formats. The course promotes consideration of ethical and legal use of information as well as the application of both critical thinking and communication skills. The course combines instruction, hands-on learning and applications, online class discussions, analysis and evaluation of information, learning assessment, and a research project. (UC, CSU)

LS 073 Memory and Thinking Strategies

Prerequisites: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed to provide information and memory techniques to the student who is experiencing academic difficulties. This course enhances skills in the areas of learning strategies, personal growth, and organizational retrieval systems. An awareness of different learning styles and learning preferences are presented throughout the course. Students learn what directly impacts their success and limitations in the educational process.

LS 077 Introduction to Computers

Prerequisites: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed to introduce basic computer exploration and assistive technology to the student. The course includes how a computer works, computer technology, introduction to keyboarding, windows, internet, and word processing. The course is self-paced and requires no previous computer knowledge or experience.

LS 078 Understanding Learning Differences

Prerequisites: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course focuses on learning differences, learning theory, and strategies related to specific learning challenges. Students create a learning portfolio to identify learning style, strengths, and weaknesses, demonstrate understanding of learning differences, methods of retention, and output of knowledge. Cognitive and achievement testing will be provided to identify students' learning profile.

Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed to fulfill the mathematics requirements of the student in business administration, management, life sciences, or social sciences. The course covers a variety of topics including linear functions, systems of equations and inequalities, matrices, linear programming, elementary combinatorial techniques, sets, Venn diagrams, elementary probability and statistics, the mathematics of finance and Markov Chains. Application problems to business, economics and social sciences are emphasized throughout. Graphing calculators are used extensively. The TI-84 PLUS is used for instructor demonstrations. (UC, CSU)

Prerequisites: MATH 092S, Intermediate Algebra (STEM), with a minimum grade of "C" or MATH -082 Intermediate Algebra with a grade of "C" or better or a minimum level of 5 on the Math Placement level. Corequisites: None. Limitations on Enrollment: None. Advisories: MATH 092S, Intermediate Algebra (STEM) with a minimum grade of "A" or MATH-082 with a grade of "A" or better. This course is a preparatory course for Calculus. It emphasizes the algebraic and trigonometric knowledge and skills required in Calculus. Topics include linear and non linear equations, a study of polynomial, transcendental and trigonometric functions, sequences and series, conic sections, polar coordinates, systems of equations, exponential and logarithmic functions and equations, Binomial Theorem, mathematical induction and related applications. Graphing calculators may be required. Credit may not be granted for MATH 39 and MATH 38A and MATH 38B are equivalent to MATH 39. (UC, CSU)

MATH 075D Beginning Algebra with Support Lab

Prerequisites: MATH 076 with a grade of "C" or bette or Math Level II. Limitations on Enrollment: None. Advisories: None. This is a lecture/lab course providing an accelerated pathway through pre-algebra and beginning algebra (Math 90) including linear equations in one and two variables, linear inequalities, basic graphing, polynormials, and factoring. The embedded lab hours provide additional instruction and support, including review and practice of topics from arithmetic and pre-algebra essential for success in beginning algebra, as well as best practices and strategies for student success in algebra.

SPAN 003 Intermediate Spanish I

Prerequisites: SPAN-002 Elementary Spanish with a grade of "C" or better. Prerequisite Skills: 1. Advisory Reading Level II. Corequisites: None. Limitations on Enrollment: None. Advisories: ENG-079 with a grade of "C" or better. This course teaches culture and facilitates language acquisition through listening, speaking, reading and writing. Students will continue to interact with authentic language in context. Content is expanded beyond "survival" needs of the immediate environment in order to express personal meaning and to apply different strategies and techniques to go beyond casual conversation and express opinions, make suggestions on familiar topics, as well as some abstract issues and plans. Students demonstrate an increased awareness of cultural norms, values, and culturally relevant appropriate customs and events. Accuracy becomes quite high for high frequency structures and vocabulary but more complex discourse is still developing and requires a somewhat sympathetic listener or reader. Students will demonstrate the ability to think critically by analyzing linguistic structures and reflecting on and making cross-cultural comparisons. This course is taught in Spanish.(UC, CSU, C-ID SPAN 200)
