A J 021 Criminal Justice in Society

Prerequisites: None. Prerequisite Skills: 1. Advisory Reading Level II. Corequisites: None. Limitations on Enrollment: None. Advisories: ENG-001A with a grade of "C" or better. This course introduces students to the characteristics of the criminal justice system in the United States. Focus is placed on examining crime measurement, theoretical explanations of crime, responses to crime, components of the system, and current challenges to the system. The course examines the evolution of the principles and approaches utilized by the justice system and the evolving forces which have shaped those principals and approaches. Although justice structure and process is examined in a cross cultural context, emphasis is placed on the US justice system, particularly the structure and function of US police, courts, and corrections. Students are introduced to the origins and development of criminal law, legal process, and sentencing and incarceration policies. (UC, CSU)

BIM 038 Office Technologies and Procedures

Prerequisites: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course focuses on the integration of office technologies and business skills for the office professional. Students in the course learn to work with the Internet, search engines, e-mail, and office applications used in electronic scheduling, presentations, word processing, and desktop publishing. Students also gain hands-on experience with office equipment such as reprographics, Webcams, and other office technologies used in today's electronic workplace. The course integrates administrative skills, written communication, and technology proficiency required to take the user into the 21st century workplace. (CSU)

BIOL 002 General Zoology

Prerequisites: BIOL-001 Core Biology with a grade of "C" or better. Prerequisite Skills: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is a survey of the major animal groups based upon structural and chemical similarities, as well as the symbiotic relationship among different species and their evolution. The course considers comparative anatomy, physiology, and genetic characteristics in the determination of the evolutionary relationships. Zoology covers the evolution of single-cell organisms to more advanced species. Ecology and impact of major phyla on their environment are discussed. This course prepares the students for advanced courses in Zoology and satisfies the elementary zoology requirements for medicine, pharmacy, dentistry, game specialist, teachers of biology, and majors in the biological sciences. Off-campus field trips are required. (UC, CSU)

BIOL 003 General Botany

Prerequisites: BIOL-001 Core Biology with a grade of "C" or better. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is a study of the life and activities of plants followed by an introduction to plant physiology, plant structure, plant genetics, plant ecology, plant evolution, and a general survey of the major plant groups. A Survey of diversity is extended to both the Fungi and the Protista Kingdoms. Lastly an ecology unit is studied that investigates the ecological principles of ecosystems, communities, and of populations. The course is for the pre-professional student in the biological sciences and is fundamental for the student planning to specialize in forestry, horticulture, agriculture, food processing, pharmacy, and other subjects requiring a scientific knowledge of plant life. Field trips are included. This course meets the CSU general education laboratory science requirement and IGETC requirements. (UC, CSU)

This course is a study of the structural organization of the human body: gross and microscopic structure of the integumentary, skeletal, muscular, nervous, sensory, endocrine, cardiovascular, lymphatic, respiratory, digestive, excretory, and reproductive systems, from cellular to organ system levels of organization. This course is primarily intended for nursing, allied health, kinesiology, and other health related majors. This course covers structure of the human body at the cell, tissue, organ, and system level. A systems approach is taken with microscopy and gross anatomy of all systems. Emphasis is placed on structure-function relationships. This is a majors level course with designed rigor. The laboratory includes study of microscopic specimens, organ and organism dissection, and models. (UC, CSU, C-ID BIOL 110B).
