#### AUTOMECH 090B Emissions Diagnosis and Repair

Prerequisites: None. Corequisites: None. Limitations on Enrollment: For those students who seek Level 2 certification, they must meet the California Department of Consumer Affairs/Bureau of Automotive Repair requirements prior to entry into the course or they must have Level 1 certification. Advisories: None. This course is designed to meet the California state requirements for the Department of Consumer Affairs/Bureau of Automotive Repair (DCA/BAR) Level 2 training course. This course is required for the advanced level student or journeyman level technician who wishes to become a Smog Check Test and Repair Technician. The student who enrolls in this course must meet the DCA/BAR prerequisite guidelines before entering the course in order to receive a Level 2 certification. This course includes state rules and regulations for Enhanced Area Smog Check; required equipment for testing and repairing vehicles incorporated in the Enhanced Area Smog Check program; baseline testing and common repair procedures used on enhanced area emission related vehicle failures; the safe use and practices of Emission Inspection system equipment, with special attention to safe vehicle/dynamometer testing practices.

#### E TECH 020 Materials and Measurements

Prerequisites: None. Corequisites: None. Limitations on Enrollment: None. Advisories: MATH-080 with a grade of "C" or better or a minimum of assessment level 4 on the COMPASS Math Placement Test. This course is designed for the technology student. The course is designed to provide the technology student with a basic understanding of the structure and physical properties of materials such as metals, ceramics, polymers, composites, and electronic-related materials. Test procedures and instrumentation used in studying materials are included. The course includes a variety of measuring techniques. (CSU)

Prerequisites: PHYS-004C, Principles of Physics: Electricity and Magnetism, and MATH-004, Differential Equations, each with a grade of "C" or better. Corequisites: MATH-004 Differential Equations. Limitations on Enrollment: None. Advisories: None. This course is an introduction to the analysis of electrical circuits with the use of analytical techniques based on the application of circuit laws and network theorems. Topics include: analysis of DC and AC circuits containing resistors, capacitors, inductors, dependent sources, operational amplifiers, and/or switches; natural and forced responses of first and second order RLC circuits; the use of phasors; AC power calculations; power transfer; and energy concepts. This course will also include an introduction to the construction and measurement of electrical circuits using basic electrical tests and measurement instruments including multimeters, oscilloscopes, power supplies, function generators, and basic operational amplifier circuits. Circuit simulation software will be used to interpret measured and simulated data based on principles of circuit analysis for DC, transient, and sinusoidal steady-state (AC) conditions, and elementary circuit design. Practical considerations such as component value tolerance and non-ideal aspects of laboratory will be discussed. (UC, CSU, C-ID ENGR 260 and 260L)

#### MATH 017A Concepts and Structures of Mathematics

Prerequisites: MATH-092G, Intermediate Algebra, or MATH-092S, Intermediate Algebra (STEM), or minimum of Level 5 on the Math Placement Test. Prerequisite Skills: None. 2. Advisory: The ability to read, write and communicate orally at a college level is recommended for this course. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is one of two courses designed for the pre-service elementary teacher. The course focuses on the development of quantitative reasoning skills through in-depth, integrated explorations of topics in mathematics, including real number systems and subsystems. Emphasis is on comprehension and analysis of mathematical concepts and application of logical reasoning. Throughout the course accurate use of mathematical terminology and notation will be emphasized. (UC, CSU)

Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed to fulfill the mathematics requirements of the student in business administration, management, life sciences, or social sciences. The course covers a variety of topics including linear functions, systems of equations and inequalities, matrices, linear programming, elementary combinatorial techniques, sets, Venn diagrams, elementary probability and statistics, the mathematics of finance and Markov Chains. Application problems to business, economics and social sciences are emphasized throughout. Graphing calculators are used extensively. The TI-84 PLUS is used for instructor demonstrations. (UC, CSU)

#### MCOM 001 Introduction to Mass Communication

Prerequisites: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is a comprehensive survey of mass communication and the interrelationships of media with society, including history, development and trends in the digital age, including analysis of newspapers, magazines, television, radio, online media, public relations, advertising and photojournalism. Students discuss theories and effects, economics, technology, law and ethics, global media, media literacy, and social issues, including gender and cultural diversity. The impact of mass media in a free society is also examined. The course also addresses controls on the media, including media law and ethics. The constitutional basis for a free press is explored. Prerequisites: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed to provide basic skills in the art of multimedia storytelling and project building with a journalism emphasis. Techniques that will be explored include use of video, photos, animation, graphic design, and text to convey interactive news and feature stories through the Internet and other electronic media. In addition, students will use critical thinking skills to develop the best way to build media content into a central project. Ethical considerations, including the use of contributed content, will also be examined. (CSU, C-ID JOUR 120)

Prerequisites: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed to offer an introduction to gathering, synthesizing, organizing and writing news in fundamental journalistic style across all media platforms. Emphasis is placed on the personal interview as a vital process in structuring an objective presentation of news and feature stories. Accompanying the various areas of writing instruction is an introduction to the basics of being a multimedia reporter, developing photo, video and audio capturing skills. It includes the role of the journalist and related legal and ethical issues. Students will report and write based on their original interviews and research to produce news content. Experiences may include covering speeches, meetings and other events, writing under deadline, and using AP Style. (CSU, C-ID JOUR 110)

#### RAD 020 Advanced Radiographic Positioning and Terminology

Prerequisites: RAD-011, Radiographic Positioning and Terminology, with a grade of "C" or better. Corequisites: RAD-020A, Advanced Clinical Laboratory, and RAD-021, Advanced Radiographic Anatomy, and RAD-022, Fundamentals of X-Ray and Radium Physics. Limitations on Enrollment: Admission to the Radiological Technology Program. Advisories: None. This course is designed to introduce positioning techniques, medical terminology, related anatomy, and preparation for specialized procedures including radiography: the bony thorax, skull, facial bones, sinuses, mastoids, urinary and biliary systems, circulatory systems, female reproductive system, sialography, tomography, pediatric radiography, and arthrography. Proper equipment selection, immobilization, and radiation protection procedures are stressed. Proper demonstration and identification of required anatomical structures are supported through film critique sessions of radiographs. An introduction to Computed Tomography (CT) and Magnetic Resonance Imaging (MRI) is included. (CSU)

## Schedule Report for: Spring 2017

### Non-Community Service Only

#### WELDING 010 Basic Welding for the Trades

Prerequisites: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed to serve students who need basic welding skills. The course covers basic theory, practice and application of metal joining processes, metal cutting, and welding for ferrous and nonferrous metals and alloys. Welding methods include shielded metal arc welding (SMAW), oxy-acetylene (O/A), and an introduction to gas metal arc welding (GMAW) and gas tungsten arc welding (GTAW). (CSU)

#### WELDING 088A Introductory Trade Welding

Prerequisites: None. Prerequisite Skills: 1. Math Level II. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed to introduce the theory and application of metal joining and cutting processes in ferrous and nonferrous metals. Shielded metal arc welding (SMAW) and oxy-acetylene (O/A) cutting, welding and brazing processes are included.

#### WELDING 088B Beginning Trade Welding

Prerequisites: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed to introduce the theory and application of metal joining process, metal cutting and arc welding processes, and joining for ferrous and nonferrous metals and alloys. Manipulative skills in shielded metal arc welding processes are stressed. Emphasis is placed on individual student goals in his/her related skill area.

WELDING 089A Shielded Metal Arc Welding/Stick (SMAW)

Prerequisites: None. Corequisites: None. Limitations on Enrollment: Qualified Performer. Advisories: WELDING-010 or WELDING-088A or WELDING-088B or WELDING-088C or WELDING-088D each with a grade of "C" or better. This course is designed to emphasize the application of Shielded Metal Arc Welding (SMAW). The course includes theory and practical application of welding in a variety of positions on ferrous materials.
