

Part Two – Student Success

Grade Point Averages for Students Transferring to CSU Campuses

Data gathered by the CSU Analytical Studies Division suggests that the College’s transfer students perform reasonably well when compared against their colleagues who transfer from other California Community Colleges. Figure 28 provides recent data on student grade point averages for Delta College transfers attending CSU campuses, along with data for all community college transfers. The data suggest that Delta College students perform at or just below the level of all California Community College transfers. Like other community college transfers, Delta College students maintain “C+” averages in their first year at CSU campuses.
