**Part Four – Fiscal and Physical Resources**

## Square Footage & Instructional Space

The College is comprised of a main campus in Stockton that is situated on 165 acres, an educational farm of 160 acres in Manteca, and an educational forestry area of 83 acres near Mountain Ranch in the Sierra Nevada range. In 2003 the College purchased a 125-acre site in the Mountain House development west of Tracy for the planned development of an educational center.

Currently, the College's main campus features 795,000 square feet of educational and administrative space, along with a football stadium, pool, track, baseball, softball, soccer, and tennis facilities. The College completed a 12,000 square foot Electron Microscopy Center that offers expanded space for labs, equipment, and larger class sizes for the College's unique training program. The College also operates the Tracy learning Center in portable buildings that are adjacent to Tracy's Merrill West High School and the school district's administrative offices. Other classroom spaces are leased from local school districts and communities to provide distance learning courses in Jackson, Rio Vista, Stockton, Manteca, and Lodi.

The College consistently wins accolades for the beauty of its campus and the overall cleanliness of the institution as it serves student and community needs. Community groups actively seek the opportunity to stage events and fundraisers on campus. Prominent community users include the Stockton Symphony

**Part Four – Fiscal and Physical Resources**

Association, The American Heart Association, and the San Joaquin Business Leadership Summit, along with a host of other community and church organizations.
