

Part Two – Student Success

Total Transfers to UC and CSU Campuses

Figure 26 provides some data on transfers to the University of California by Delta College students, with comparison data for Partnership for Excellence benchmarks (data the College would need to obtain to contribute to statewide targeted increases in transfers). Transfers from the College to UC campuses have rebounded in recent years after a decline in 1997-98, with nearly 100 students transferring in the 2000-01 year. Figure 27 presents comparable data for CSU transfers from the College, with the figures tracking below targeted levels of CSU transfers. In 2000-01, nearly 850 students transferred to CSU campuses.
