

Accreditation Status

We maintain both ongoing

- State approval by the California Department of Public Health –Radiological Health Branch (<http://www.cdph.ca.gov/programs/Pages/RadiologicHealthBranch.aspx>) and
- National Accreditation with the **Joint Review Committee for Education in Radiologic Technology** –JRCERT.

During our most recent JRCERT accreditation site visit on July 13-14, 2015 our program was evaluated for compliance with the 2014 national accreditation standards. The results of this visit were considered at their annual board of directors meeting in November (2015) and we were subsequently granted another maximum accreditation award status of 8 years.

To remain totally compliant we will need to submit an interim report in the 3rd quarter of 2019 and provided that we maintain our 8 year status our next site visit is scheduled for the 3rd quarter of 2023.
