

Drug Screening Policy:

Clinical affiliates of the School of Radiologic Technology are now performing mandatory drug screening tests of students prior to placement at the clinical site. Failure to pass a screening will result in denial of the individual's access to that site. If a student is unable to complete the required clinical component of the program due to failure of the screening, the student will be withdrawn from the program.

Challenges to actions regarding the above policy may be addressed through the program's grievance procedure.

(Policy 8/10/05)
