</tr>
<tr>
<td>N R 2</td>
<td>Conservation of Natural Resources</td>
<td>3</td>
<td>Reading level II</td>
<td>None.</td>
<td>None.</td>
<td>This course is designed to examine the need, importance, and philosophy of conservation of natural resources in our contemporary world. Human dependency on resources and an understanding of ecological principles and natural systems are emphasized. Topics include natural resource classification; history, importance, and methods of conservation; resource management issues; citizens’ roles in conservation; and prospects for the future. Current environmental issues are discussed from local, national, and global perspectives. The course is designed to increase student’s awareness of the importance of conservation of natural resources as a social and behavioral science and to increase student’s participation in natural resource conservation. (UC, CSU)</td>

</table>
N R 66 Introduction to Aquaculture  Units 1.5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to enable students to understand the basic concepts of aquaculture and how they can be adapted to small scale farming. Specific areas covered are site, site development, water quality, fish selection, diseases, harvesting, and marketing. (CSU)

N R 67 Applied Aquaculture  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to enable students to understand the principles associated with rearing and marketing aquatic organisms and their relationship with small scale farming. Laboratory exercises provide students with hands on experiences. Specific areas covered include site selection, species selection, water quality and treatment, aquatic biology and ecology, nutrition, disease, stocking, harvesting, processing, marketing, and record keeping. (CSU)

N R 68 Applied Aquaculture  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to enable students to understand the principles associated with rearing and marketing aquatic organisms and their relationship with small scale farming. Laboratory exercises provide students with hands on experiences. Specific areas covered include site selection, species selection, water quality and treatment, aquatic biology and ecology, nutrition, disease, stocking, harvesting, processing, marketing, and record keeping. (CSU)

N R 69 Introduction to Aquaculture  Units 1.5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to enable students to understand the basic concepts of aquaculture and how they can be adapted to small scale farming. Specific areas covered are site, site development, water quality, fish selection, diseases, harvesting, and marketing. (CSU)

N R 77 Introduction to Urban Wildlife Management  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide the basic understanding of the relationship between urban development and wildlife management. The course includes discussions of attracting, feeding, and housing wildlife species; wildlife pest management techniques; and local wildlife habitat development on rural and agricultural lands. Laboratory activities include the identification, life history, and habitat recognition of urban wildlife species at local areas of interest. (CSU)

N R 78 Introduction to Urban Wildlife Management  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide the basic understanding of the relationship between urban development and wildlife management. The course includes discussions of attracting, feeding, and housing wildlife species; wildlife pest management techniques; and local wildlife habitat development on rural and agricultural lands. Laboratory activities include the identification, life history, and habitat recognition of urban wildlife species at local areas of interest. (CSU)

N R 79 Introduction to Urban Wildlife Management  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide the basic understanding of the relationship between urban development and wildlife management. The course includes discussions of attracting, feeding, and housing wildlife species; wildlife pest management techniques; and local wildlife habitat development on rural and agricultural lands. Laboratory activities include the identification, life history, and habitat recognition of urban wildlife species at local areas of interest. (CSU)

N R 91N Introduction to Wildlife Management  Units 4
Prerequisites: Reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to present the concepts and principles of wildlife management. Development and practical application of the concepts of wholism with emphasis upon the biological, psychological, sociological, cultural, and spiritual needs of the individual client as a member of the community and society is integrated throughout the course. The nursing process is introduced as a method to be used in the planning and evaluation of nursing care for adult and/or geriatric clients. The ethical and legal aspects of professional nursing, trends in nursing, and the basic pharmacological considerations inherent in providing nursing are discussed. The principles of patient teaching and the documentation of patient care are introduced. Clinical experiences focus upon the actual and potential problems of the adult with chronic and/or non-critical illness. The student learns to meet basic human needs of selected individuals in the Skills Laboratory, extended care, acute care, and community health settings. (CSU)

<tr>
<td></td>
<td></td>
<td></td>
<td>This course is designed to introduce the concepts and principles of Medical-Surgical Nursing. The concepts of wholistic care are considered as the basis of providing nursing care to the adult in varying stages of the life cycle. Placement on the health-illness continuum is assessed in terms of cardiovascular, gastrointestinal, and pharmacological considerations. The role of the professional nurse in planning and providing nursing care by utilizing the nursing process is reinforced. Legal and ethical factors inherent in nursing care are introduced. Clinical experiences focus on the normal changes that occur during the aging process, actual and potential problems associated with chronic and/or non-critical illness, pain management, and oncology. The student learns to assess the health status of the individual and provide care to selected adults in acute, long-term, and community health care settings. (CSU)</td>
</tr>
<tr>
<td>NURS 3</td>
<td>Administration of Medication</td>
<td>3</td>
<td>Prerequisites: ANAT 2 or ANAT 1 and PHYSI 1, MICRO 2, FCS 6, ENG 1A, and concurrent enrollment in NURS 1.</td>

<tr>
<td></td>
<td></td>
<td></td>
<td>This course is designed to focus on the integration of wholistic concepts and principles from social, behavioral, and biological sciences to prepare students to provide nursing care for childbearing families in acute and home/community settings. Application of the nursing process in theoretical and clinical situations is utilized to promote and maintain wellness for antepartal, intrapartal, postpartal, neonatal, and intraconceptual families. Emphasis is placed upon the role of the nurse as a health educator. Current ethical-legal and health care issues are integrated in the course content. (CSU)</td>
</tr>
</tbody>
</table>
NURS 9 Advanced Medical/Surgical Nursing Units 5
Prerequisites: NURS 6, NURS 7 with a grade of “C” or better.
Limitations on Enrollment: Admission to the program.
Advisories: None.
This course is designed to provide theoretical and clinical approaches in nursing care to individuals of varying ages with complex health care needs in an acute care and home/community environment. Concepts related to organization, patient care management, and leadership are included with the use of the nursing process. Emphasis is placed on patient care outcomes and professional accountability and responsibility. Professional issues, trends, and roles are also presented. (CSU)

NURS 11 Selected Topics: Acute Nursing Care Units 3
Prerequisites: Nursing 25; exempt from assessment testing.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to assist licensed nursing personnel to update themselves in the care of acutely ill patients. Topics include such areas as cardiovascular, renal, respiratory, neurological, orthopedic, burns, oncology, pediatrics, and geriatrics. The course may be repeated for credit each five years. (CSU)

NURS 12 Mobile Intensive Care Nursing Units 5
Prerequisites: RN with valid license; 1 year of experience or currently working in an emergency room or critical care unit; current CPR or ACLS; successful completion of H S 34A; basic EKG interpretation.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide didactic instruction and field training in the performance and supervision of pre-hospital advanced emergency care. The course meets requirements recommended by the State of California for mobile intensive care nurses. (CSU)

NURS 15 Critical Care Nursing Units 10
Prerequisites: NURS 25 or 38.
Limitations on Enrollment: None.
Advisories: None.
This course is a critical care course designed to assist licensed nurses in acquiring current knowledge and skills necessary in the care of the critically ill. (CSU)

NURS 50 Independent Study Units 6
Prerequisites: Enrolled in nursing program and staff approval.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide selected students opportunity to further their knowledge and skills in specified areas. Theory and laboratory hours are arranged on an individual basis. (CSU)

ORNAMENTAL HORTICULTURE

O H 10 Introduction to Ornamental Horticulture Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce students to the ornamental horticulture industry with emphasis on career opportunities, curriculum choices, and skills needed for each discipline. Basic sciences, facility, and tool orientation are presented. The laboratory covers a variety of horticultural skills. (CSU)

O H 12 Fundamentals of Horticulture Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is a general introduction to environmental horticulture with emphasis on nursery operations, landscaping, turf management, and floral industries. Topics include basic botany, cultural practices, propagation, structures and layout, pest management, planning, container gardening and houseplants, floral design, plant identification, turfgrass installation and care, and survey of career opportunities. (CSU)

O H 15 Selected Topics: Ornamental Horticulture Units 1-2
Prerequisites: None; exempt from assessment testing.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer instruction in one of the specialized areas of ornamental horticulture not already covered by existing curricula. (CSU)

O H 21A Identification of Fall Plants Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce approximately 250 ornamental plants used in the landscape of Central California. The course includes environmental requirements, taxonomy, common pests and diseases, growth habits, geographic origins and uses in the landscape of both drought tolerant and native plants. (UC, CSU)

O H 21B Identification of Spring Plants Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce approximately 250 ornamental plants used in the landscape of Central California. The course includes environmental requirements, taxonomy, common pests and diseases, growth habits, geographic origins and uses in the landscape of both drought tolerant and native plants. (UC, CSU)
This course is designed to introduce students to the identification of the approximately 200 trees used in the landscape of Central California. Also included are cultural requirements, taxonomy, common pests and diseases, growth habits, geographic origins, and uses in the landscape. Drought tolerant and native plants are included. (CSU)

This course is designed to introduce current production practices employed for selected floral crops. The course includes varietal selection, growth requirements, planting schedule, and pest and disease control. (CSU)

This course will introduce fundamentals of theory, techniques and skills currently practiced in the floral industry. Included will be applied art principles, post-harvest care, handling practices, proper use of florist tools and materials in crafting basic designs. (CSU)

This course is designed to introduce the principles and practices of nursery propagation utilizing seeds, cuttings, separations, budding, grafting, layering, and tissue cultures. The course includes laboratory work in the use of various commercial propagation methods. (CSU)

This course is designed to enable students to learn the skills necessary to successfully maintain residential and commercial landscapes and structures. The curriculum includes training in fertilizing, irrigation repair, pest and disease control, plant and tree installation, pruning, soil amending and mulching, and tree staking. (CSU)

This course is designed to introduce the principles and practices of interior landscape and the fundamentals of house plant care, including proper plant selection and identification, insect and disease detection, optimum lighting and temperatures, fertilizers and irrigation, repotting techniques, and correction of plant problems. (CSU)

This course is designed to provide students with hands-on experience in planning and installing landscape construction projects. Students are exposed to the necessary tools and techniques and participate in the construction of various landscape projects such as cement patios, retaining walls, raised planters, mowstrips, fences, patio covers, decks, and masonry projects. (CSU)

This course is an introduction to basic drafting principles and techniques presently utilized by the landscape industry. Graphic communication through lettering, drafting, graphics and symbolic representation are emphasized. Students complete a set of construction drawings for a residential landscape. (CSU)

This course is an introduction to basic principles of landscape design, including both hardscape and softscape. The student explores the elements of landscape design, including garden structures, pavements, plants, and complete construction drawings for residential landscape. (CSU)
O H 46 Turf Practices  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce the maintenance and management of turf areas, including golf courses, athletic fields, public parks, and residential lawns. This course includes the principles of turfgrass culture to provide the student with a sound basis for formulating decisions and methods of operation. (CSU)

O H 50H Special Studies: Ornamental Horticulture  Units 1-2
Prerequisites: Completion of survey course with grade of “B” or better and presentation of a project acceptable to the instructor and division chairperson.
Limitations on Enrollment: None.
Advisories: None.
This course is open to students qualified to do advanced work in the field. The course includes research, directed reading, field work, or other advanced study, and the course may be repeated for a maximum of four units. (CSU)

O H 60 Pruning of Ornamental Plants  Units 1.5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce the science of pruning and its effect on plant material. The course includes proper use and maintenance of tools and equipment, and safety is emphasized. (CSU)

O H 62 Landscape Irrigation and Drainage  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce students to all phases of residential and commercial landscape irrigation including designing, estimating, installing, maintaining, and trouble-shooting. Students are exposed to the components of both sprinkler and drip irrigation systems. This course also covers the components and installation of landscape drainage systems. (CSU)

O H 66 Commercial Landscape Practices  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to give students a realistic experience installing a commercial landscape project. Emphasis is placed on job and equipment safety, methods of installation operation, and design considerations. Specific attention is given to sites with high visibility and heavy traffic flow. Compliance codes and regulations, as they apply to the industry, are included also. (CSU)

O H 69V Internship: Ornamental Horticulture  Units 1-8
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed for students participating in an occupational internship in ornamental horticulture. Application of discipline-related skills and knowledge of Secretaries Commission on Achieving Necessary Skills (SCANS) competencies is emphasized. Each student is engaged in a specific research project or on-the-job learning activities under the supervision of a worksite supervisor and a college internship instructor. (CSU)

O H 71 Introduction to Plant Pests and Diseases  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce students to the common pests and diseases associated with ornamental plants and to present the basic principles of modern plant protection (chemical, biological, and cultural).

O H 81 Applied Floral Arrangement  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to theories, techniques and skills currently practiced in the floral industry. Included are topics in applied art principles, post-harvest care, handling practices, proper use of florist tools, and materials in crafting basic designs. Development of basic floral skills is the focus.

O H 83 Advanced Applied Floral Arrangement  Units 2
Prerequisites: O H 81 or O H 31 with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to advanced principles and techniques of floral arrangement, including new types and designs of arrangements and corsage work. Students develop increased levels of proficiency and speed needed for employment. Development of basic floral skills is the focus.

O H 91A Applied Identification of Fall Plants  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce approximately 190 ornamental plants used in the landscape of Central California. The course includes environmental requirements, common pests and diseases, growth habits, geographic origins, and uses in the landscape for drought tolerant and native plants.
**O H 91B Applied Identification of Spring Plants**

**Units 3**

**Prerequisites:** None.

**Limitations on Enrollment:**

**Advisories:** None.

This course is designed to introduce approximately 190 ornamental plants used in the landscape of Central California. The course includes environmental requirements, common pests and diseases, growth habits, geographic origins, and uses in the landscape for drought tolerant and native plants.

**O H 93 Applied Landscape Irrigation and Drainage**

**Units 3**

**Prerequisites:** None.

**Limitations on Enrollment:** None.

**Advisories:** None.

This course is designed to introduce all phases of residential and commercial landscape irrigation including designing, estimating, installing, maintaining, and trouble-shooting. The course includes the components of sprinkler and drip irrigation systems and the development of hands-on skills.

**O H 94 Xeriscaping**

**Units 2**

**Prerequisites:** None.

**Limitations on Enrollment:** None.

**Advisories:** None.

This course is designed to prepare the student to research, design, evaluate, and choose materials for landscaping California gardens. The course includes water conservation, management, and harvesting for residential and commercial landscapes.

**O H 95 Applied Landscape Maintenance**

**Units 3**

**Prerequisites:** None.

**Limitations on Enrollment:** None.

**Advisories:** None.

This course is designed to enable the student to acquire the skills necessary to successfully maintain residential and commercial landscapes and structures. The course includes fertilization; irrigation repair; pest and disease control; plant and tree installation; pruning; soil amending and mulching; and tree staking.

**O H 96V Work Experience: Ornamental Horticulture**

**Units 1-8**

**Prerequisites:** None.

**Limitations on Enrollment:** The student must enroll in a course that is directly related to the ornamental horticulture work experience. The student must enroll in a minimum of 7 units during the semester including work experience units. For summer session, the student must enroll in one related course in addition to work experience. The combined total number of units a student may take in internship, work experience, and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of work experience program objectives and an employer work experience agreement.

**Advisories:** GUID 30, 31, 32, 33.

This course is designed for students employed in the area of ornamental horticulture. The course objectives are developed by the students in consultation with their supervisor. Students are engaged in a specific research project or on-the-job learning activities under the supervision of a worksite supervisor and a college work experience instructor. To register, complete an application form available at the Applied Science and Technology Division office, Holt 140.

**PHILOSOPHY**

**PHILO 6 Introduction to Philosophy**

**Units 3**

**Prerequisites:** None.

**Limitations on Enrollment:** None.

**Advisories:** None.

This course is a survey of issues in philosophy. Competing positions in the fields of metaphysics, epistemology, ethics, and the history of philosophy are presented, discussed, and critically evaluated. Particular areas of inquiry include, but are not limited to: What is philosophy? How should one live? Is knowledge possible? Is there a God? Why evil? (UC, CSU, CAN PHIL 2)

**PHILO 30 Introductory Logic**

**Units 3**

**Prerequisites:** None.

**Limitations on Enrollment:** None.

**Advisories:** None.

This course is designed to introduce methods for recognizing, constructing, and evaluating arguments. The concepts of induction, deduction, validity, soundness, strength, and cogency are explored in detail. There is a survey of informal fallacies as well as an introduction to the methodology associated with symbolic logic, natural deduction, and the calculation of probabilities. (UC, CSU, CAN PHIL 6)

**PHILO 40 Ethics**

**Units 3**

**Prerequisites:** None.

**Limitations on Enrollment:** None.

**Advisories:** None.

This course is a survey of ethical theories and contemporary ethical issues to which the various theories are applied. The theories introduced are ethical relativism, egoism, utilitarianism, Kantian deontology, natural law theory, and feminist ethical theory. Issues discussed are euthanasia, abortion, legal punishment, animal rights, equality and discrimination, and economic justice. (UC, CSU, CAN PHIL 4)

**PHILO 45 God and the Person**

**Units 3**

**Prerequisites:** None.

**Limitations on Enrollment:** None.

**Corequisites:** None.

This course is a survey of issues in philosophy. Competing positions in the fields of metaphysics, epistemology, ethics, and the history of philosophy are presented, discussed, and critically evaluated. Particular areas of inquiry include, but are not limited to: What is philosophy? How should one live? Is knowledge possible? Is there a God? Why evil? (UC, CSU, CAN PHIL 2)

**PHILO 50 Asian Philosophy**

**Units 3**

**Prerequisites:** None.

**Limitations on Enrollment:** None.

**Advisories:** None.

This course is an introduction to the philosophical tradition of Asia. Special emphasis is placed on the Buddhist, Hindu, Taoist, Confucian, and Shinto philosophies. (UC, CSU)
PHILO 50H  Special Studies: Philosophy Units 1-2
Prerequisites: Presentation of a project acceptable to the instructor and the division chairperson; PHILO 6, 35, or 40 with grade of “B” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to allow students qualified to do advanced work in the field. The course includes research, directed reading, field work, or other advanced study. The course may be repeated for a maximum of 4 units. (UC, CSU)

PHOTOGRAPHY

PHOTO 1A  Introduction to Photography Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introductory course in photographic camera work and laboratory procedures. Basic camera theory, darkroom procedures, aesthetics, history, and concepts are presented in lecture and practiced in laboratory periods. (UC, CSU, CAN ART 18)

PHOTO 1B  Intermediate Photography Units 3
Prerequisites: PHOTO 1A with a grade of “C” or better; reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is a structured black and white photography course designed to offer intermediate technique for both small and/or medium format work. The course also includes large format camera work in conjunction with intermediate level exposure-development control. (UC, CSU)

PHOTO 1C  Advanced Photography Units 3
Prerequisites: PHOTO 1B with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is a rigorous work of the large format view camera through theory and practice of the Zone Systems exposure-development relationships. Negative and print control are emphasized for exceptional control in the medium. Advanced aesthetics, techniques, and concepts expand student awareness of the dynamics of photography. The history of large format concepts in artistic and utilitarian usage is explored. (CSU)

PHOTO 6A  Beginning Color Photography Units 3
Prerequisites: PHOTO 1A with a grade of “C” or better; reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide the student color negative and print laboratory work with emphasis on both technical and aesthetic aspects of the photography medium. (UC, CSU)

PHOTO 6B  Advanced Color Units 3
Prerequisites: PHOTO 6A.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to assist intermediate students to be in control of the negative-positive materials using the Ektacolor and Fuji color processes in producing quality and creative photographic color prints. Utilization and aesthetic assignments are presented. Densitometry and color analysis are explored. (CSU)

PHOTO 15 Selected Topics: Photography Units 1-2
Prerequisites: Reading level II or concurrent enrollment in reading.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer instruction in one of the specialized areas of photography not already covered by existing curricula. (CSU)

PHOTO 34 Workshop Projects Units 2
Prerequisites: PHOTO 1B with a grade of “C” or better; reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is an independent study in photography to meet individual student needs. (US, CSU)

PHOTO 50H  Special Studies: Photography Units 1-2
Prerequisites: PHOTO 1B and PHOTO 34 both with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is open to the student who wishes to pursue a research problem through individual laboratory work and associated studies. The proposed project must be acceptable to a member of the photography staff and approved by the division chairperson. The course may be repeated for a maximum of 4 units. (CSU)

PHOTO 75 Selected Topics: Photography Units 1-2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer instruction in one of the specialized areas of photography not already covered by existing curriculum. The course may be repeated for a maximum of 4 units.

PHYSICAL EDUCATION & RECREATION

P E 1A  Beginning Swimming Units 1-1.5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is a beginning course for non-swimmers. (UC, CSU)

P E 1B  Intermediate Swimming Units 1-1.5
Prerequisites: PE 1A.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to emphasize the development of crawl, back, breast, and side strokes. (UC, CSU)

P E 1D  Beginning Swim for Health Units 1.5-2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to help the beginning swimmer conditioning to improve cardiovascular endurance through swimming and to teach sound individual conditioning techniques. Each student is pre-tested in various health and fitness components. (UC, CSU)
P E 1E  Intermediate Swim for Health  Units 1-1.5  
Prerequisites: PE 1D.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to help the intermediate swimmer improve cardiovascular endurance through swimming and to teach sound individual conditioning techniques. Each student is pre-tested in various health and fitness components. (UC, CSU)

P E 2  Lifeguard Training  Units 2  
Prerequisites: Refer to the Catalog Statement for additional corequisites.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide individuals with knowledge and skills to save one’s own life or the life of another in the event of a water emergency. The student must be at least 15 years old; swim 500 yards continuously using each of the following strokes for at least 50 yards each: crawl, breaststroke, elementary backstroke, sidestroke; surface diving to a minimum depth of 9 feet and bring a 10-pound diving brick to the surface; surface dive to a minimum depth of 5 feet and swim under the water for a minimum of 15 yards; tread water for one minute; possess before or during the course the American Red Cross Standard First Aid/ American Red Cross Community First Aid Certificate and either the American Red Cross or American Heart Association Adult Cardio-Pulmonary Resuscitation Certificate. The American Red Cross Certificate for lifeguard is awarded to those who successfully complete the course. This course may be repeated for credit once every three years. (UC, CSU)

P E 4A  Springboard Diving  Units 1-1.5  
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce students to the fundamentals of springboard diving including the hurdle and required dives in the five diving categories on the one meter diving board. Students learn stretching and conditioning techniques to strengthen and enhance their abilities in springboard diving. (UC, CSU)

P E 4B  Springboard Diving  Units 1-1.5  
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to allow students to practice the fundamentals of springboard diving including the hurdle and required optional dives in the five diving categories on the one and three meter diving boards. Students learn stretching and conditioning techniques to strengthen and enhance their abilities in springboard diving. (UC, CSU)

P E 4C  Springboard Diving  Units 1-1.5  
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to allow students to practice the fundamentals of springboard diving, including the hurdle and required optional dives in the five diving categories on the one and three meter diving boards. Students learn stretching and conditioning techniques to strengthen and enhance their abilities in springboard diving. (UC, CSU)

P E 6  Wrestling  Units 0.6-1  
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide the student with offensive and defensive wrestling fundamentals and match tactics. Conditioning, strength, and cardiovascular conditioning are emphasized to enable participants to handle the strains of wrestling. Rules of the sport are covered. (CSU)

P E 9A  Beginning Individual Conditioning  Units 1.5-2  
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to improve the individual’s physical fitness level through the use of physical fitness testing, aerobic exercise, resistive exercise training, and flexibility activities. Included are lectures designed to enhance the student’s life-long approach and understanding of exercise and its effect on the body. Each student is pre-tested and post-tested in various health and fitness components. (UC, CSU)

P E 9B  Intermediate Individual Conditioning  Units 1-1.5  
Prerequisites: PE 9A.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to take the information learned in beginning individual conditioning and to develop a life-long commitment to exercise. The course includes physical fitness testing, aerobic exercise, resistive exercise training, and flexibility activities. More extensive lectures on cardiovascular health, nutrition, and elements of exercise enhance previous knowledge are included. Each student is pre-tested and post-tested in various health and fitness components. (UC, CSU)

P E 9C  Advanced Individual Conditioning  Units 1-1.5  
Prerequisites: PE 9B.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to take the information learned in beginning individual conditioning and develop a life-long commitment to exercise. The course includes physical fitness testing, resistive exercise training, and flexibility activities. The overall experience culminates in students formulating an individualized program to meet their unique needs. Each student is pre-tested and post-tested in various health and fitness components. (UC, CSU)
P E 9D Beginning Jazz Aerobics Units 1.5-2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to a complete work-out done to music. The course includes stretching, body training, and cardiovascular work. The course content is based on a knowledge of training and conditioning techniques, heart disease and exercise, muscle physiology, and nutrition. Each student is pre-tested and post-tested in various health and fitness components. (UC, CSU)

P E 9E Intermediate Jazz Aerobics Units 1-1.5
Prerequisites: PE 9D.
Limitations on Enrollment: None.
Advisories: None.
This course is a continuation of a complete work-out including stretching, body training, and cardiovascular work. Students develop life-long diet plans and learn to develop relaxation techniques to combat stress. Each student is pre-tested and post-tested in various health and fitness components. (UC, CSU)

P E 9F Advanced Jazz Aerobics Units 1-1.5
Prerequisites: PE 9E.
Limitations on Enrollment: None.
Advisories: None.
This course is one that includes stretching, body training, and cardiovascular work. The course content is based on a knowledge of training and conditioning techniques, heart disease and exercise, muscle physiology, and nutrition. Students learn to apply these principles to other advanced fitness activities. Each student is pre-tested and post-tested in various health and fitness components. (UC, CSU)

P E 9H Beginning Sports Conditioning Units 1.5-2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to expose students to the various components of sport-related conditioning. Students develop a theoretical knowledge of these components and participate in activities that include jogging, running, plyometrics, as well as strength and flexibility training. This course is designed for the athlete or the student wishing to participate in a competitive or recreational sport. (UC, CSU)

P E 9I Intermediate Sports Conditioning Units 1-1.5
Prerequisites: PE 9H.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to take the various components of sport-related conditioning and expand upon them. Measurements of strength, endurance, and agility are included. Special emphasis is placed upon the learning of the concepts and theories of a good sports conditioning program. (UC, CSU)

P E 9J Advanced Sports Conditioning Units 1-1.5
Prerequisites: PE 9I.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to take the information learned in the previous two courses and develop a life-long commitment to exercise and participation in competitive or recreational sport activities. The overall experience culminates with students being able to formulate an individual conditioning program which enhances their ability to participate in a competitive or recreational sport. (UC, CSU)

P E 9K Beginning Power Aerobics Units 1.5-2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to develop cardiovascular fitness, strength training, flexibility through the use of aerobic exercise and weight training. The course incorporates low and high impact aerobics and body toning through the use of weights and diet development. The course focuses on the physical development techniques for both men and women. All exercises are performed to music. Each student is pre-tested and post-tested in various health and fitness components. (UC, CSU)

P E 9L Intermediate Power Aerobics Units 1-1.5
Prerequisites: PE 9K.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to develop cardiovascular fitness, strength training, flexibility through the use of aerobic exercise and weight training. The course incorporates low and high impact aerobics and body toning through the use of weights and diet development. The course focuses on the physical development techniques for both men and women. All exercises are performed to music. Each student is pre-tested and post-tested in various health and fitness components. (UC, CSU)

P E 9M Advanced Power Aerobics Units 1-1.5
Prerequisites: PE 9L.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to develop cardiovascular fitness, strength training, flexibility through the use of aerobic exercise and weight training. The course incorporates low and high impact aerobics and body toning through the use of weights and diet development. The course focuses on the physical development techniques for both men and women. All exercises are performed to music. Each student is pre-tested and post-tested in various health and fitness components. (UC, CSU)

P E 10A Beginning Fitness Walking Units 1
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide students with physical and cardiovascular training. Emphasis is placed on stretching and attaining each individual’s target heart rate. (UC, CSU)
P E 10B Intermediate Fitness Walking Units 1
Prerequisites: P E 10A.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to promote physical well-being through stress reduction, weight control, and walking. Attention is given to increasing cardiovascular efficiency, muscular strength, and endurance. (UC, CSU)

P E 10C Advanced Fitness Walking Units 1
Prerequisites: P E 10B.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to promote lifelong physical and cardiovascular benefits to students. Emphasis is focused on increasing cardiovascular efficiency, muscular strength, and endurance. (UC, CSU)

P E 14A Beginning Weight Training Units 2-2.5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to give students experience in the six basic levels of lifts. Students are exposed to an individual weight training program. Prevention and rehabilitation of injuries are stressed. Each student is pre-tested and post-tested in various health and fitness components. (UC, CSU)

P E 14B Intermediate Weight Training Units 1.5-2
Prerequisites: P E 14A.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to give students experience in intermediate level of lifts. Students develop an individual weight training program. Prevention and rehabilitation of injuries are stressed. Each student is pre-tested and post-tested in various health and fitness components. (UC, CSU)

P E 14C Advanced Weight Training Units 1.5-2
Prerequisites: P E 14B.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to give students experience in the advanced level of lifts. Students complete an individual weight training program. Prevention and rehabilitation of injuries are stressed. Each student is pre-tested and post-tested in various health and fitness components. (UC, CSU)

P E 15 Selected Topics: Physical Education Units 1-2
Prerequisites: Reading level II or concurrent enrollment in reading.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer instruction in one of the specialized areas of physical education not already covered by existing curricula. (UC, CSU)

P E 16A Beginning Modern Dance Units 1-1.5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to condition students and study the use of the body in rhythmic motion in some of the less complicated dances. Fundamental techniques are emphasized. Lectures and discussions are included. (UC, CSU)

P E 16B Intermediate Modern Dance Units 1-1.5
Prerequisites: PE 16A.
Limitations on Enrollment: None.
Advisories: None.
This course is the study of intermediate dance technique and patterns. Creative dances are practiced with the express purpose of establishing individual and group dances for public performances. Lectures and discussions are included. (UC, CSU)

P E 16C Advanced Modern Dance Units 1-1.5
Prerequisites: DANCE 16C.
Limitations on Enrollment: None.
Advisories: None.
This course is the study of advanced techniques, styles, and rhythms used in creative dances which are practiced with the express purpose of establishing solo, individual, and group dances for public performances. Lectures and discussions are included. (UC, CSU)

P E 21A Beginning Fencing Units 1-1.5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to develop basic skills and techniques of fencing with the three combative weapons of foil, epee, and sabre. The course covers developmental exercise along with skills and techniques utilized in formal competition. Drama and dance students find it valuable for mental and body discipline on the stage. (UC, CSU)

P E 21B Intermediate Fencing Units 1-1.5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to develop the intermediate skills and techniques of fencing with the three combative weapons of foil, epee, and sabre. The course covers developmental exercises with skills and techniques in formal competition. Drama and dance students find it valuable for mental and body discipline on the stage. (UC, CSU)

P E 21C Advanced Fencing Units 1-1.5
Prerequisites: PE 21B.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to develop the advanced skills and techniques of fencing with the three combative weapons of foil, epee, and sabre. The course covers developmental exercises with skills and techniques in formal competition. Drama and dance students find it valuable for mental and body discipline on the stage. (UC, CSU)

P E 22A Beginning Tennis Units 1-1.5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the rules, etiquette, fundamentals, and strategy of tennis. Physical conditioning, agility and the carry-over value of the activity are stressed. (UC, CSU)

P E 380 Intramural Tennis: Doubles Units 0.5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an organized school-wide competition in tennis doubles. (UC, CSU)

P E 38T Intramural Co-Ed Volleyball Units 0.5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an organized school-wide competition in co-ed volleyball. (UC, CSU)

P E 38Y Intramural Badminton Units 0.5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the rules, etiquette, fundamentals, and strategy of badminton. Competitive play is stressed. (UC, CSU)

P E 39E Adapted Swimming Units 1-1.5
Prerequisites: Physician authorization.
Limitations on Enrollment: None.
Advisories: None.
This course is designed for the physically limited student. Students work on developing their own individual programs in the swimming pool. Physical conditioning, awareness of the body’s capabilities, agility, and life-long activity are stressed. (UC, CSU)

P E 39F Adapted Conditioning Units 1-1.5
Prerequisites: Physician authorization.
Limitations on Enrollment: None.
Advisories: None.
This course is designed for the physically limited. Students work on individual programs. Physical conditioning, awareness of the body’s capabilities, agility, and life-long activity are stressed. (UC, CSU)

P E 39I Adapted Parcourse Units 1-1.5
Prerequisites: Physician authorization.
Limitations on Enrollment: None.
Advisories: None.
This course is designed for the physically limited. Students work on individual programs. Physical conditioning, awareness of the body’s capabilities, agility, and life-long activity are stressed. (UC, CSU)

P E 42K Theory of Baseball Offense Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to give students a practical, effective, and up-to-date approach in teaching and coaching the offensive skills of baseball. Particular attention is paid to hitting technique, hitting drills, correction of faults, mental approach, bunting, baserunning, and offensive strategy and philosophy. (UC, CSU)

P E 42L Theory of Baseball Defense Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to give students a practical, effective, and up-to-date approach in teaching and coaching the defensive skills of baseball. Particular attention is paid to defensive technique at each position, individual defensive drills, team defensive drills, team defensive strategy, pitching, and catching. (UC, CSU)

P E 42M Beginning Theory of Offensive Football Units 2
Prerequisites: PE 42M.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to help students perform coaching and teaching assignments at lower levels from Pop Warner to high school football. Students learn to establish a football system of offense. (UC, CSU)

P E 42N Advanced Theory of Offensive Football Units 2
Prerequisites: PE 42O.
Limitations on Enrollment: None.
Advisories: None.
This course is a review of the philosophy, terminology, and strategy of defensive football played at the college level. (UC, CSU)

P E 42O Beginning Theory of Defensive Football Units 2
Prerequisites: Physician authorization.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the philosophy, technology, and strategy of defensive football played at the college level. (UC, CSU)

P E 42P Advanced Theory of Defensive Football Units 2
Prerequisites: PE 42O.
Limitations on Enrollment: None.
Advisories: None.
This course is a review of the philosophy, terminology, and strategy of defensive football played at the college level. (UC, CSU)
PE 42Q  Beginning Coaching of Offensive Football
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to teach the coaching and demonstration of offensive techniques. Activities are designed for those who will coach the lower levels through Pop Warner and high school football. The fundamentals of the elementary level of running, throwing, catching, and blocking are stressed. [UC, CSU]

PE 42R  Intermediate Coaching of Offensive Football
Prerequisites: PE 42Q.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to teach the coaching and demonstration of intermediate offensive techniques. Activities are designed for those who will coach the lower levels through Pop Warner and high school football. The fundamentals of the intermediate level of running, throwing, catching, and blocking are stressed. (UC, CSU)

PE 42T  Beginning Coaching of Defensive Football
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to teach the coaching and demonstration of defensive techniques. Activities are designed for those who will coach the lower levels through Pop Warner and high school football. The fundamentals of the intermediate level of running, throwing, catching, and tackling are stressed. (UC, CSU)

PE 42U  Intermediate Coaching of Defensive Football
Prerequisites: PE 42T.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to teach the coaching and demonstration of intermediate defensive techniques. Activities are designed for those who will coach the lower levels through Pop Warner and high school football. The fundamentals of the intermediate level of running, throwing, catching, and tackling are stressed. (UC, CSU)

PE 45  Special Projects: Physical Education  Units 1-2
Prerequisites: Completion of survey course with grade of “B” or better and presentation of a project acceptable to the instructor and division chairperson.
Limitations on Enrollment: None.
Advisories: None.
This course is open to all students qualified to do advanced work in the field. The course may include research, directed reading, field work, or other advanced study, and the course may be repeated for a maximum of four units. (UC, CSU)

PE 48  Exercise Science  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce the basic concepts of anatomy, physiology, nutrition, kinesiology, and exercise physiology to the student interested in how and why training programs affect health and fitness. This course is designed for the student majoring in Physical Education. (UC, CSU)

PE 49  Psychology of Sports  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the professional field of sport psychology. Classroom experiences are designed to acquaint students with individual skills and coaching techniques necessary in the area of sport psychology. (CSU)

PE 50  Nutrition for Fitness and Sport  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce the student to the fundamentals of nutrition as they impact health, fitness, and sports performance. Particular emphasis is given to basic nutrition, diet analysis, weight control, special diets, eating disorders, and the use of ergogenic aids. (CSU)

PE 51  Fitness Assessment and Exercise Prescription  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to aid the student in synthesizing the important principles and theories in exercise physiology, kinesiology, nutrition, testing and measurements, and applying them to physical fitness testing and individualized exercise program design. (CSU)

PE 80  Selected Topics: Physical Education  Units 0.5-2
Prerequisites: Reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer instruction in one of the specialized areas of Physical Education not already covered by existing curriculum.

PE 80A  National Strength and Conditioning Association  Units 0.5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer instruction in strength training and conditioning.

PHYSICAL SCIENCE

PHSCI 1  Matter and Energy  Units 3
Prerequisites: MATH 80 or MATH 83A and MATH 83B or concurrent enrollment in MATH 80, MATH 83A or MATH 83B.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the physical sciences for students with a limited science background. Topics include astronomy, physics, chemistry, meteorology, and geology. Demonstrations and student involvement are stressed. (UC, CSU)
**PHYSICS**

**PHYSC 2A  General Physics**  
*Units 4*  
**Prerequisites:** Reading level II; Math level II; MATH 31 with a grade of “C” or better.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  
This course is designed to include the following: linear and two-dimensional motion; conservation laws of energy and momentum; rotational motion; thermodynamics with special attention to energy conservation and alternative energy sources like solar energy; vibrations and waves; and special relativity. (UC, CSU, CAN PHYS 2, CAN PHYSC SEQ A with both PHYSC 2A and 2B)

**PHYSC 2B  General Physics**  
*Units 4*  
**Prerequisites:** Reading level II; Math level II; PHYSC 2A with a grade of “C” or better.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  
This course is designed to cover topics in electricity and magnetism, geometric and physical optics, and introductory modern physics. Electricity and magnetism covers direct-current (DC) circuit theory, use of the oscilloscope, and frequency-dependent alternating-current (AC) circuit analysis; modern physics includes relativity, atomic structure, the nucleus, and nuclear energy. (UC, CSU, CAN PHYS 4, CAN PHYSC SEQ A with both PHYSC 2A and 2B)

**PHYSC 4A  Principles of Physics: Mechanics**  
*Units 4*  
**Prerequisites:** Reading level II; Math level II; MATH 2 with grade of “C” or better.  
**Corequisites:** Concurrent enrollment in MATH 2.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  
This course is an advanced course in the analysis of systems based upon concepts of kinematics and dynamics. Topics include linear- and two-dimensional motion, Newton’s Laws, conservation laws of energy and momentum, rotational motion, and harmonic motion. PHYSC 4A is intended for Engineering and Physics majors. (UC, CSU, CAN PHYS 8)

**PHYSC 4B  Principles of Physics: Waves, Sound, and Thermodynamics**  
*Units 4*  
**Prerequisites:** Reading level II; Math level II; MATH 2 and PHYSC 4A, each with grade of “C” or better.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  
This course is a continuation of PHYSC 4A with further analysis of harmonic motion extended to wave phenomena as exhibited by sound, light, and particles. Some modern physics is covered, including relativity, atomic theory, and quantum theory. Heat transfer and the first and second laws of thermodynamics, as applied to heat engines, are covered. (UC, CSU)

**PHYSC 4C  Principles of Physics:**  
*Units 4*  
**Electro-pysics and Magnetism**  
**Prerequisites:** Reading level II; Math level II; MATH 2 and PHYSC 4A, each with grade of “C” or better; MATH 3 with grade of “C” or better.  
**Corequisites:** Concurrent enrollment in MATH 3.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  
This course is designed to cover topics in static electricity, Coulomb’s Law, electric fields, and potential. Circuit theory is not emphasized; however, laboratory topics introduce use of measuring instruments for the various circuit parameters. The triode, transistor, and op-amp are examined. Magnetism includes the laws of Ampere, Faraday, and Maxwell. Alternating-current (AC) circuit elements and their response to variable-frequency signals are studied. (UC, CSU, CAN PHYS 12)

**PHYSC 10  Introduction to Physics**  
*Units 4*  
**Prerequisites:** Reading level II and MATH 80 or MATH 83A & B each with a grade of “C” or better.  
**Limitation on Enrollment:** None.  
**Advisories:** None.  
This course is designed to introduce the fundamentals of physics to students with no previous background in the subject. The course content surveys selected topics in the areas of mechanics, heat, wave motion, optics, electricity, magnetism, and sound. Emphasis is on practical application through laboratory work involving extensive instrumentation and measuring techniques. This course is not designed for science and engineering majors. (UC, CSU)

**PHYSC 50H  Special Studies: Physics**  
*Units 1-2*  
**Prerequisites:** Completion of survey course with a grade of “B” or better and presentation of a project acceptable to the instructor and division chairperson.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  
This course is open to all students qualified to do advanced work in the field. A course project is assigned which includes research, field work, or other advanced study, and the course may be repeated for a maximum of four units. (UC, CSU)

**PHYSIOLOGY—SEE BIOLOGY**

**PLANT SCIENCE**

**PLANT 10  Principles of Plant Science**  
*Units 3*  
**Prerequisites:** Reading level II.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  
This course is designed to provide the student with a working knowledge of the fundamental structures and processes of plants. The course includes principles of plant structures, physiology, hereditary, environmental relationship to growth, adaptation, and management of crops. Techniques of research, exploration of plant growth, and identification of economical crops are included. (UC, CSU, CAN AG 8)
PLANT 10L Principles of Plant Science Laboratory Units 1
Prerequisites: Reading level II; PLANT 10 with a "C" or better.
Corequisites: Concurrent enrollment in PLANT 10.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to use experiments and observations related to the principles of plant science. The student learns through numerous hands-on experiences. Field trips are taken to observe specific crop practices. (UC, CSU)

PLANT 12 Economic Entomology Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to cover local insects and mites of economic importance to agriculture. Their morphology, identification, life cycles, host and habitat relationships, and control methods are emphasized. Students are required to make an insect collection. (UC, CSU)

PLANT 13 Weeds and Crop Pests Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide a study of the classification, identification, and life cycle of common and poisonous weeds in the San Joaquin Valley. Management practices include biological, cultural, rotational, and/or chemical methods. Weed establishment and chemical resistance are also included. (CSU)

PLANT 14 Soil Science Units 4
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to cover physical, chemical, and biological properties of soils as influenced by climate, parent material topography, and time. Field trips are included to observe specific soil formations. (UC, CSU, CAN AG 14)

PLANT 36A Deciduous Fruit and Grape Production Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to study almonds, apricots, cherries, peaches, walnuts, wine grapes, and table grapes. Fundamentals of cultural practices including training, pruning, propagation, and rootstocks will be stressed. Use of the Delta College orchard and vineyard is emphasized. One all-day field trip required. (UC, CSU)

PLANT 50H Special Studies: Plant Science Units 1-2
Prerequisites: Completion of survey course with grade of "B" or better and presentation of a project acceptable to the instructor and division chairperson.
Limitations on Enrollment: None.
Advisories: None.
This course is offered to any student who is qualified to do advanced work and wishes to pursue a problem through reading or other advanced study, if his proposed project is acceptable and approved by instructor and the division chairperson. May be repeated for a maximum of four units. (UC, CSU)

PLANT 75 Selected Topics: Plant Science Units 1-2
Prerequisites: None; exempt from assessment testing.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer instruction in one of the specialized areas of plant science not already covered by existing curricula.

PLANT 96V Work Experience: Plant Science Units 1-8
Prerequisites: None.
Limitations on Enrollment: The student must enroll in a course that is directly related to the plant science work experience. The student must enroll in a minimum of 7 units during the semester including work experience units. For summer session, the student must enroll in one related course in addition to work experience. The combined total number of units a student may take in internship, work experience, and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of work experience program objectives and an employer work experience agreement.
Advisories: GUID 30, 31, 32, 33.
This course is designed for students employed in the area of plant science. The course objectives are developed by the students in consultation with their supervisor. Students are engaged in a specific research project or on-the-job learning activities under the supervision of a worksite supervisor and a college work experience instructor. To register, complete an application form available at the Applied Science and Technology Division office, Holt 140.

POLITICAL SCIENCE

POLSC 1 American Government and Institutions Units 3
Prerequisites: Reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the fundamentals of government and the political processes at the national, state, and local levels. Included are studies of basic issues confronted by the American people and their governing institutions. The course fulfills the Social Science (group A) requirements for the AA degree and applies toward completion of the requirement in U.S. History and California state and local government. (UC, CSU, CAN GOVT 2)

POLSC 5 International Relations Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to study the United States in its role as a world power. Emphasis is on trouble spots and major challenges presently confronting the United States. Most of the material presented in assigned reading and in classroom presentations focuses on present-day issues. (UC, CSU)

POLSC 10 Introduction to Political Science Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the field of political science. The course surveys the scope and methods of the discipline, explores contemporary political theory and ideology, and compares varying types of political systems. (UC, CSU)

POLITICAL SCIENCE
POLSC 15  Selected Topics:  Units 0.5-2  
Political Science  
Prerequisites: Reading level II.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to offer instruction in one of the specialized areas of political science not already covered by the existing curricula. (UC, CSU)

POLSC 15A  Model United Nations Units 1  
Prerequisites: Reading level II.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is a simulation of the United Nations within a classroom setting. The course is designed to expose the student to contemporary world issues and to focused study of a specific country’s policies in international affairs. This course includes an optional field trip not at college cost. The course may be repeated for a total of three units.

POLSC 15U  U.S. Foreign Policy in the Post-Cold War Era Units 0.5  
Prerequisites: Reading level II.  
Limitations on Enrollment: None.  
Advisories: None.  
This topics course is offered in conjunction with the Spring 2000 symposium entitled “Is U.S. Foreign Policy Adrift: Challenges of the Post-Cold War Era.” It is designed around a series of four lectures that focus on the challenges of U.S. foreign policy that have resulted with the end of the Cold War and the decline of communist rule in Eastern Europe. (UC, CSU)

POLSC 20  California State and Local Government Units 1  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is an introduction to the fundamentals of California state and local government and the political processes. Included are studies of basic issues confronted by California state, county, city, and regional governments. (CSU)

POLSC 50H  Special Studies: Units 1-2  
Political Science  
Prerequisites: Presentation of a project acceptable to the instructor and the division chairperson; Political Science 1 or 10 with grade of “B” or better.  
Limitation on Enrollment: None.  
Advisories: None.  
This course is designed to allow qualified students to do advanced work in the field. The course includes research, directed reading, field work, or other advanced study. The course may be repeated for a maximum of four units. (UC, CSU)

POLSC 51H  Government Internship Units 3-4  
Prerequisites: Completion of one of the following courses with a grade of “B” or better: POLSC 1, POLSC 4, BUS 18A or B, and BUS 35A.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to place students in local government departments or agencies where they will engage in specific research projects at a policy or administrative level. They work for 9-12 hours per week (student units will be determined at a rate of one unit for three hours in internship per week). May be repeated for credit three times. (UC, CSU)

PRINT TECHNOLOGY

PRINT 50H  Special Studies: Units 1-2  
Print Technology  
Prerequisites: Completion of survey course with grade of “B” or better and presentation of a project acceptable to the instructor and division chairperson.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is open to all students qualified to do advanced work in the field. The course includes research, directed reading, field work, or other advanced study, and the course may be repeated for a maximum of four units. (CSU)

PRINT 51A  Introduction to Graphic Communications Units 5  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to prepare students to enter the graphic communication industry giving technical information and developing skills in executing all basic printing steps required to produce a job. Steps include customer relations, layout and design, paste-up, typesetting, camera, stripping, plate making, offset presswork, and finishing operations. Strong emphasis is placed on work ethics, reading, and mathematical skills. (CSU)

PRINT 51B  Beginning Graphic Communications Units 5  
Prerequisites: PRINT 51A.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to put into effect skills learned in introduction to graphic communications of advanced technical information and improving skill in applying basic printing procedures. (CSU)

PRINT 60  Introduction to Graphic Production Units 5  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed for entry level exploration and covers fundamentals of management, creative services, electronic publishing, paste-up, pre-press, and press finishing. The course utilizes a hands-on and learn-by-doing strategy by producing the college newspaper “Impact” (Macintosh environment). (CSU)
PRINT 61 Creative Services Units 5
Prerequisites: PRINT 60.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to cover graphic design, a system approach to production, and the preparation of single and multi-color mechanics. The course uses both the traditional and electronic composition processes (Macintosh environment). (CSU)

PRINT 62 Pre-Press Units 5
Prerequisites: PRINT 60.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to train students to enter printing industry as pre-press specialists. Process camera, image assembly, color separation systems, and plate-making procedures are presented and performed by both electronic and traditional processes using the Macintosh platform. (CSU)

PRINT 63 Press and Finishing Units 5
Prerequisites: PRINT 60.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the use of sheet fed offset presses. Students investigate press systems and they learn to control press variables, operate computerized press controls, use densitometers, and use quality control procedures. Students learn production of spot and process color, reprographics, bindery, and finishing procedures. (CSU)

PRINT 69V Internship: Print Technology Units 1-8
Prerequisites: None.
Limitations on Enrollment: The students must enroll in a course that is directly related to the print technology internship. The student must enroll in a minimum of 7 units during the semester including internship units. For summer session, the student must enroll in one related course in addition to internship. The combined total number of units a student may take in internship, work experience, and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of internship program objectives and an employer internship agreement.
Advisories: GUID 30, 31, 32, 33.
This course is designed for students participating in an occupational internship in print technology. Application of discipline-related skills and knowledge of the Secretaries' Commission on Achieving Necessary Skills (SCANS) competencies is emphasized. Each student is engaged in a specific research project or on-the-job learning activities under the supervision of a worksite supervisor and a college internship instructor. To register, complete an application form available at the Applied Science and Technology Division office, Holt 140. (CSU)

PRINT 75 Selected Topics: Printing Technology Units 1-2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer instruction in one of the specialized areas of printing technology not already covered by existing curricula.

PRINT 75A Beginning Photoshop TM Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This topic course is designed to provide the student informatoin and hands-on training in using computers, scanners, and printers with the Adobe Photoshop TM software. The student learns, at a beginning level, the concepts and techniques of digital image processing.

PRINT 75B Advanced Photoshop TM Units 2
Prerequisite: None. Limitations on Enrollment: None.
Advisories: None.
This topic course is designed to provide the student advanced informatoin and hands-on-training in using computers, scanners, and printers with the Adobe Photoshop TM software. The student learns, at an advanced level, the concepts and techniques of digital image processing.

PRINT 82A Metropolitan Newspaper Production Units 5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide an opportunity for non-printing majors to learn printing procedures in a newspaper setting. The course is designed to give printing students basic exposure to journalism, photojournalism, advertising, and decision-making procedures that are present in the editorial part of a newspaper. Students use the college newspaper “Impact” as a hands-on learning experience.

PRINT 82B Advanced Metropolitan Newspaper Production Units 5
Prerequisites: PRINT 82A.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide advanced training in journalism, photojournalism, advertising, color, printing production, and decision-making procedures that are present on the college newspaper “Impact” for both journalism and graphic communication students.

PRINT 87A Printing Specialization Units 7
Prerequisites: PRINT 80C.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to assist advanced students in gaining a greater knowledge of a specialized area of the printing trade. The work covered is developed between the student and the instructor at the beginning of the course.

PRINT 87B Printing Specialization Units 5
Prerequisites: PRINT 51B.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to assist advanced students in gaining a greater knowledge of a specialized area of the printing trade. The work covered is developed between the student and the instructor at the beginning of the course.
PSYCHIATRIC TECHNOLOGY

P T 80 Foundations of Nursing Units 8.5
Prerequisites: ANAT 1 or ANAT 2 or BIOL 11; H S 36; HS/FCS 19; PSYCH 1. A grade of “C” or better in each prerequisite course with a minimum GPA of 2.5 from prerequisite courses is required.
Limitations on Enrollment: Admission to the Psychiatric Technician Program.
Advisories: None.
This course is designed to introduce students to the fundamental issues and trends in nursing, focusing on the collaborative roles of the Registered Nurse, Licensed Vocational Nurse, Psychiatric Technician and the Certified Nurse Assistant. Included in the content are the basic concepts of anatomy and physiology, the mechanisms of disease, and the sciences of nutrition and pharmacology. Holism is introduced as the theoretical framework used by students in identification of patient needs. The clinical component of the course focuses on care of the geriatric client.

P T 81 Introduction to Medical-Surgical Nursing Units 8.5
Prerequisites: P T 80 with a grade of “C” or better.
Limitations on Enrollment: Admission to the Psychiatric Technician Program.
Advisories: None.
This course is designed to introduce students to the nursing care of patients with common medical-surgical disorders of the cardiovascular, respiratory, and endocrine systems, and that of the eye and ear. The clinical focus of this course is the nursing care of adult patients with an uncomplicated course of treatment utilizing the concept of holism. Application of principles of asepsis to pre-operative and post-operative patient management is discussed.

P T 82 Psychiatric Technician Nursing Units 8
Prerequisites: P T 81 with a grade of “C” or better.
Limitations on Enrollment: Admission to the Psychiatric Technician Program.
Advisories: None.
This course is designed to prepare students to provide care to mentally ill clients in acute and chronic psychiatric settings. Emphasis is placed on current trends, legislation, stress adaptation, communication, diagnostic criteria, therapeutic techniques, cultural sensitivity, and the principles of holism.

P T 83 Advanced Psychiatric Technician Nursing Units 4.5
Prerequisites: P T 82 with a grade of “C” or better.
Limitations on Enrollment: Admission to the Psychiatric Technician Program.
Advisories: None.
This course is designed to present mental health concepts of forensic, disorders of infancy, childhood, and adolescence, impulse control, eating disorders, substance abuse, personality disorders, violence, and sexual dysfunction. Emphasis is placed on treatment, prevention, and community resources.

PSYCHOLOGY

PSYCH 1 Introduction to Psychology Units 3
Prerequisites: Reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the scientific study of behavior through an exploration of the major concepts and research in the field of psychology. The course provides the basic foundation for more advanced courses in psychology. (UC, CSU, CAN PSYCH 2)

PSYCH 3 Personal and Social Psychology Units 3
Prerequisites: PSYCH 1; reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to explore the process of human adjustment by examining the assumption of mental health, how personality develops, the types of deviant behavior, the process of creativity, the varieties of psychotherapy, and the application of adjustment concepts to social situations. (UC, CSU)

PSYCH 4 Introduction to Experimental Psychology Units 3
Prerequisites: PSYCH 1; reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction of the application of the scientific method to the analysis of behavior. Experimental techniques, designs, examination of experimental assumptions, limitations and advantages, as well as student participation are stressed. This course is designed for behavioral and social science majors. (UC, CSU)
PSYCH 12 Introduction to Probability and Statistics
Prerequisites: Reading level II; MATH 82 or 84A and 84B, each with a grade of “C” or better; or MATH 87 with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to acquaint the student with elementary techniques used in statistical analysis. Emphasis is on descriptive statistics, elementary probability concepts, probability distributions, statistical inference, and simple linear regression analysis, with applications in business administration, education, natural sciences, psychology, and social science. A graphing calculator is recommended. Instructor demonstrations utilize the TI-83 calculator. (UC, CSU, CAN STAT 2)

PSYCH 15 Selected Topics: Psychology
Prerequisites: Reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer instruction in one of the specialized areas of psychology not already covered by the existing curricula. (UC, CSU)

PSYCH 20 Stress Management
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to acquaint students with the role stress plays in the lives of all individuals. The course focuses on the effects of stress and how to manage stress. (CSU)

PSYCH 24 Psychology of Aging
Prerequisites: Reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is a study of the changes that occur in sensory and motor functioning, perception, memory, emotions, intelligence, and personality of the aging person. Attention is given to social cultural, and economic factors that impinge upon aging persons and current programs that attempt to deal with these factors. (UC)

PSYCH 30 Human Sexuality
Prerequisites: Reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is a survey of the physiological, social, and behavioral aspects of human sexuality. The course is academic rather than therapeutic. (UC, CSU)

PSYCH 38 Counseling Skills for Human Service Workers
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the counseling process through examination of the roles and characteristics of the counselor and the client. Basic skills involved in problem identification and problem solving are discussed and practiced through simulated role situations. (CSU)

PSYCH 39 Client Interview, Evaluation, and Referral
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is a review of basic client interview skills for the counselor. The course explores establishing rapport with clients, enlisting the client in the development of treatment plans, and making appropriate client referrals. Students practice active listening and other communication skills in simulated client interview settings. (CSU)

PSYCH 40 Case Management and Treatment Planning
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to stress basic skills for effective one-to-one counseling in human service programs through discussion and simulated counseling situations. Participants examine their own counseling styles and identify needed modifications with the assistance of the instructor and peers. (CSU)

PSYCH 45A Beginning Field Practicum
Prerequisites: Completion of or concurrent enrollment in EDUC 10, PSYCH 1, PSYCH 44, or SOCIO 1A; reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide an opportunity for students to have on-the-job learning experiences in human service agencies. Students observe professional staff working with clients in public agencies. One hour in class is required each week to integrate practical experiences with theory learned in psychology theory courses. (UC, CSU)

PSYCH 45B Intermediate Field Practicum
Prerequisites: Completion of or concurrent enrollment in EDUC 10, PSYCH 1, PSYCH 44, or SOCIO 1A; reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide an opportunity for students to have on-the-job learning experiences in human service agencies. Students observe professional staff working with clients in public agencies. One hour in class is required each week to integrate practical experiences with theory learned in psychology courses. (UC, CSU)

PSYCH 46 Individual Counseling in Human Service Programs
Prerequisites: Completion of or concurrent enrollment in PSYCH 1; reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to stress basic skills for effective one-to-one counseling in human service programs through discussion and simulated counseling situations. Participants examine their own counseling styles and identify needed modifications with the assistance of the instructor and peers. (CSU)
PSYCH 47  Group Counseling in Units 3  Human Services Programs
Prerequisites: Reading level II; completion of or concurrent enrollment in PSYCH 1.
Limitations on Enrollment: None.
Advisories: None.
This course is a review of group counseling methods with an emphasis on an eclectic approach to group facilitation. Learning is derived from experiences in simulated group interaction and from subsequent analysis with the instructor and peers. Participants learn to identify personal style as group leaders and describe modifications needed in group facilitation techniques. (CSU)

PSYCH 48  Family Counseling in Units 2  Human Service Programs
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an examination of principles and methods related to understanding and working with families in human service programs. Family systems and interactions are explored through a review of current articles and demonstration of intervention methods in simulated family counseling situations. Participants identify personal styles as family counselors and describe modifications needed to improve family counseling skills. (CSU)

PSYCH 50H  Special Studies: Psychology Units 1-2
Prerequisites: Presentation of a project acceptable to the instructor and the division chairperson; Psychology 1, 3, or 4 with grade of “B” or better.
Limitation on Enrollment: None.
Advisories: None.
This course is designed to allow qualified students to do advanced work in the field. The course includes research directed reading, field work, or other advanced study. The course may be repeated for maximum of four units. (UC, CSU)

PSYCH 52  Introduction to Substance Abuse Counseling Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an overview of the field of substance abuse counseling. Emphasis is placed on career challenges and opportunities. Evaluation, assessment, and counseling methods are discussed. Legal and community resources available to provide assistance are explored. (CSU)

PSYCH 53  Drugs and Society Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to give students a basic pharmacology of the drugs of abuse as well as some effective skills to deal with the lifestyle of the abuser. The information provided aids human services students in establishing a positive counseling relationship with drug dependent individuals and in giving those individuals life-skills. (CSU)

PSYCH 55  Introduction to Child Abuse Counseling Units 2
Prerequisites: Completion of or concurrent enrollment in PSYCH 1 or SOCIO 1A.
Limitations on Enrollment: None.
Advisories: None.
This course is a study of the dynamics of child abuse. Emphasis is placed on learning to understand prevention and intervention services for victims of child abuse and their families. Legal and community resources available to victims and families are explored. (CSU)

PSYCH 56  Assisting Sexual Assault Victims Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is a study of the sexual assault of adults and children. Legal and community resources available to victims and families are explored. Emphasis is placed on learning to provide crisis intervention for survivors of sexual assault and their families. (CSU)

PSYCH 57  Introduction to Gerontology Counseling Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an overview of the field of gerontology counseling. Emphasis is placed on career challenges and opportunities in the field of gerontology and as specialists working with geriatrics. Emphasis will be placed on an exploration of available resources in the areas of medical health care professionals, research findings, legal ramifications and various governmental and private agencies working in the field of gerontology. (CSU)

RADIOLOGIC TECHNOLOGY

RAD 10  Introduction to Radiography Units 3.5
Prerequisites: None.
Corequisites: Concurrent enrollment in RAD 10A.
Limitations on Enrollment: Admission to the Radiologic Technology Program due to contractual agreement with hospital.
Advisories: None.
This course is designed to provide an overview of the field of Radiologic Technology. Emphasis is placed on methods of promoting optimal patient care and the importance of developing a professional and caring attitude. Ethics and professional organizations are covered. Factors required for X-ray production are discussed including detailed instruction of the beneficial and destructive potentials of ionizing radiation. Safe radiation protection procedures for self, patients, and hospital personnel are discussed. The course includes body mechanics, infection control, and fundamentals of venipuncture and medical computer systems. (CSU)
SJDC Catalog 00 - 01  SECTION III, Description of Courses  -----------------------------------------  123

RAD 10A  Beginning Clinical Laboratory  Units 3
Prerequisites:  None.  Corequisites:  Concurrent enrollment in RAD 10.
Limitations on Enrollment:  Admission to the Radiologic Technology Program due to contractual agreement with hospital.
Advisories:  None.
This course is designed to provide an introduction to clinical radiographic training.  The course includes practical training in the functions of the darkroom, office, computer systems, file rooms, and training involving patient transportation.  An introduction to x-ray equipment and technical factor selection is included, as well as lab practice in venipuncture. (CSU)

RAD 10B  Intermediate Clinical Laboratory  Units 6
Prerequisites:  RAD 10A with a grade of “C” or better.
Limitations on Enrollment:  Admission to the Radiologic Technology Program due to contractual agreement with hospital.
Advisories:  None.
This course is designed to provide clinical radiographic training.  The course includes examinations of the chest, extremities, shoulder and pelvic girdles and abdomen all done under direct supervision.  Technical factor selection and equipment manipulation are included.  Portable and operating room radiography are also included in this course. (CSU)

RAD 11  Radiographic Positioning and Terminology  Units 6
Prerequisites:  RAD 10 with a grade of “C” or better.
Corequisites:  Concurrent enrollment in RAD 12 and RAD 13.
Limitations on Enrollment:  Admission to the Radiologic Technology Program due to contractual agreement with hospital.
Advisories:  None.
This course is designed to introduce positioning techniques, medical terminology, and anatomy as they relate to the chest, abdomen, extremities, shoulder and pelvic girdles, spinal column, and alimentary system.  Portable and operating room procedures, proper equipment selection, immobilization, and radiation protection procedures are stressed.  Identification of anatomical structures is supported through film critique sessions of radiographs. (CSU)

RAD 12  Radiographic Anatomy  Units 2
Prerequisites:  RAD 10 with a grade of “C” or better.
Corequisites:  Concurrent enrollment in RAD 11 and RAD 13.
Limitations on Enrollment:  Admission to the Radiologic Technology Program due to contractual agreement with hospital.
Advisories:  None.
This course is designed to introduce anatomical terminology; cell division; structure of skin, bones and joints; as well as structure of the extremities, vertebral column, and thorax.  Radiographic imaging methods of these structures are presented, as well as common pathological conditions identified in radiography. (CSU)

RAD 13  Principles of Radiographic Technique  Units 4
Prerequisites:  RAD 10 with a grade of “C” or better.
Corequisites:  Concurrent enrollment in RAD 11 and RAD 12.
Limitations on Enrollment:  Admission to the Radiologic Technology Program due to contractual agreement with hospital.
Advisories:  None.
This course is designed to introduce the student to the principles involved in producing a diagnostic radiograph.  The course includes detailed instruction in radiographic film, equipment, and accessories utilized in image production.  The primary factors of kilovoltage (KV), milliamperage (MA), time, and distance are explained.  Practical application of exposure calculations is performed.  Also included is:  discussion of the sensitometric properties of x-ray film; quality control, patient characteristics; pathological conditions relative to technique selection; the principles and designs of radiographic technique charts; and fundamental principles of digital radiography and fluoroscopy.  (CSU)

RAD 14  Darkroom Chemistry and Processing  Units 1
Prerequisites:  RAD 13 with a grade of “C” or better.
Limitations on Enrollment:  Admission to the Radiologic Technology Program due to contractual agreement with hospital.
Advisories:  None.
This course is designed to acquaint the student with:  the principles associated with processing room design and function; film storage and handling, manual and automatic processing chemicals and techniques; automatic processor systems and functions; latent image formation; identification and causes of film artifacts, and silver recovery/fixer recycling systems.  Also included are quality control and repeat analysis. (CSU)

RAD 20  Advanced Radiographic Positioning and Terminology  Units 4
Prerequisites:  RAD 11 with a grade of “C” or better.
Corequisites:  Concurrent enrollment in RAD 20A, RAD 21, and RAD 22.
Limitations on Enrollment:  Admission to the Radiologic Technology Program due to contractual agreement with hospital.
Advisories:  None.
This course is designed to introduce positioning techniques, medical terminology, related anatomy, and preparation for specialized procedures including radiography:  the bony thorax, skull, facial bones, sinuses, mastoids, urinary and biliary systems, circulatory systems, female reproductive system, sialography, tomography, pediatric radiography, and arthrography.  Proper equipment selection, immobilization, and radiation protection procedures are stressed.  Proper demonstration and identification of required anatomical structures are supported through film critique sessions of radiographs.  An introduction to Computed Tomography (CT) and Magnetic Resonance Imaging (MRI) is included. (CSU)
RAD 20A Advanced Clinical Laboratory  Units 8
Prerequisites: RAD 10B with a grade of “C” or better.
Corequisites: Concurrent enrollment in RAD 20, RAD 21, and RAD 22.
Limitations on Enrollment: Admission to the Radiologic Technology Program due to contractual agreement with hospital.
Advisories: None.
This course is designed to introduce the student to complex systems of the body. The course includes the structures of the various parts of each specialized system. The systems involved are the muscular, circulatory, digestive, genitourinary, nervous, endocrine, and others. Radiographic application of these systems is presented as well as common anomalies and pathologies related to these systems as indicated by radiographic examination. Detailed study of the skull and facial bones is included. (CSU)

RAD 21 Advanced Radiographic Anatomy  Units 2
Prerequisites: RAD 12 with a grade of “C” or better. Corequisites: Concurrent enrollment in RAD 20, RAD 20A, and RAD 22.
Limitations on Enrollment: Admission to the Radiologic Technology Program due to contractual agreement with hospital.
Advisories: None.
This course is designed to introduce the student to complex systems of the body. The course includes the structures of the various parts of each specialized system. The systems involved are the muscular, circulatory, digestive, genitourinary, nervous, endocrine, and others. Radiographic application of these systems is presented as well as common anomalies and pathologies related to these systems as indicated by radiographic examination. Detailed study of the skull and facial bones is included. (CSU)

RAD 22 Fundamentals of X-Ray and Radium Physics  Units 4
Prerequisites: None.
Corequisites: Concurrent enrollment in RAD 20, RAD 20A, and RAD 21.
Limitations on Enrollment: Admission to the Radiologic Technology Program due to contractual agreement with hospital.
Advisories: None.
This course is designed to introduce the structure of the atom, concepts of mechanics, electromagnetic radiation, electromagnetism, electrostatics, electric generators and motors. The production and control of high voltage rectifiers, and the components and principles of operation of the x-ray circuit are also included. Properties of x-rays, x-ray production, and x-ray interaction with matter are detailed. Performing calculations utilizing the English and metric systems are covered. (CSU)

RAD 23 Positioning and Technical Laboratory  Units 0.5
Prerequisites: RAD 13 with a grade of “C” or better.
Limitations on Enrollment: Admission to the Radiologic Technology Program due to contractual agreement with hospital.
Advisories: None.
This course is designed to introduce the practical application of technical exposure calculations, accessory equipment, positioning techniques, and radiation protection procedures. (CSU)

RAD 30 Intermediate Positioning and Technical Laboratory  Units 0.5
Prerequisites: RAD 23 with a grade of “C” or better.
Limitations on Enrollment: Admission to the Radiologic Technology Program due to contractual agreement with hospital.
Advisories: None.
This course is designed to explore the practical application of technical exposure calculations, accessory equipment, positioning techniques, and radiation protection at the intermediate level. The student learns how to identify and obtain radiographs of optimal quality. (CSU)

RAD 30A Senior Clinical Laboratory  Units 5
Prerequisites: RAD 20A with a grade of “C” or better.
Limitations on Enrollment: Admission to the Radiologic Technology Program due to contractual agreement with hospital.
Advisories: None.
This course is designed to provide clinical training in radiographic procedures under direct or general supervision. The course includes rotation through surgery magnetic resonance imaging (MRI), ultrasound, mammography, computed tomography (CT), nuclear medicine, special procedures, radiation therapy, and general radiography. (CSU)

RAD 30B Advanced Senior Clinical Laboratory  Units 10
Prerequisites: RAD 30A with a grade of “C” or better.
Limitations on Enrollment: Admission to the Radiologic Technology Program due to contractual agreement with hospital.
Advisories: None.
This course is designed to provide advanced clinical training in radiographic procedures. The student obtains experience in a surgical setting with axial tomography, ultrasound, mammography, computed tomography (CT), nuclear medicine, special procedures, radiation therapy, and general radiography. (CSU)

RAD 31 Advanced Positioning and Technical Laboratory  Units 1
Prerequisites: RAD 30 with a grade of “C” or better.
Limitations on Enrollment: Admission to the Radiologic Technology Program due to contractual agreement with hospital.
Advisories: None.
This course is designed to introduce the application of test tools used for quality control in routine radiography, fluoroscopy, and for determining radiation exposure doses. Emphasis is placed on the utilization of techniques which limit radiation dosage to the patient. (CSU)

RAD 32 Sectional Anatomy  Units 2
Prerequisites: RAD 21 with a grade of “C” or better.
Limitations on Enrollment: Admission to the Radiologic Technology Program due to contractual agreement with hospital.
Advisories: None.
This course is designed to provide student with an understanding of anatomy in three dimensions. Transverse, sagittal, and coronal sections of anatomy are discussed, along with dimensional relationships. Utilizing examination examples of magnetic resonance imaging (MRI), computed tomography (CT), and ultrasound, each region of the body is studied. The student gains an understanding of disease process and abnormal pathology as presented in three dimensions. (CSU)
RAD 40 Senior Review, Adv Radiation Protection, & Fluoroscopic Systems
Prerequisites: RAD 10 with a grade of “C” or better.
Limitations on Enrollment: Admission to the Radiologic Technology Program due to contractual agreement with hospital.
Advisories: None.
This course is designed for advanced student qualifying for graduation from a 24-month program. The course includes formal instruction in radiation protection, specifically California Code of Regulations Title 17, Public Health, and the standards of the National Council on Radiation protection (NCRP). In preparation for the state and national examinations, a comprehensive review of materials covered throughout the two-year period is included with additional information on imaging equipment and innovative technology. (CSU)

RAD 40A Radiographic Laboratory Units 9
Prerequisites: RAD 30B with a grade of “C” or better.
Limitations on Enrollment: Admission to the Radiologic Technology Program due to contractual agreement with hospital.
Advisories: None.
This course is designed to continue the practical training in radiographic procedures under general supervision with emphasis on perfecting all radiologic examination techniques. Further exposure to angiographic procedures and specialized fluoroscopic examinations is included as well as rotations through computed tomography (CT), ultrasound, nuclear medicine, and magnetic resonance imaging (MRI). (CSU)

RAD 41 Radiographic Pathology and Film Critique Units 3
Prerequisites: RAD 32 with a grade of “C” or better.
Limitations on Enrollment: Admission to the Radiologic Technology Program due to contractual agreement with hospital.
Advisories: None.
This course is designed to provide an overview of human pathologies. The student identifies changes that occur with disease and injury and their application to radiologic Technology. The student gains an understanding of these disease processes in order to handle seriously ill or injured patients by selecting positions and technical factors which produce quality diagnostic radiographs. (CSU)

READING

READING 69V Internship: Reading Units 1-8
Prerequisites: None.
Limitations on Enrollment: The student must enroll in a course that is directly related to the reading internship. The student must enroll in a minimum of 7 units during the fall or spring semesters including internship units. For summer session, the student must enroll in one related course in addition to internship. The combined total number of units a student may take in internship, work experience, and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of internship program objectives and an employer internship agreement.
Advisories: GUID 30, 31, 32, 33.
This course is designed for students participating in an occupational internship in reading. Application of discipline-related skills and knowledge of tutoring basic skills and thinking skills (SCANS) competencies is emphasized. Each student is engaged in a specific research project or on-the-job learning activities under the supervision of a worksite supervisor and a college internship instructor. (CSU)

READING 74A Textbook Reading and Study Strategies Units 1
Prerequisites: Reading level II or concurrent enrollment in READ 90A-F or 98G-M.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to assist students in applying reading and study strategies to a textbook from another course.

READING 74B College Research Strategies Units 1
Prerequisites: Reading level II or concurrent enrollment in READ 90A-F or 98G-M.
Limitations on Enrollment: None.
Advisories: None.
This course is designed as an authentic experience in college level research. Through a study of the life of a famous person, students learn the notetaking, research, and presentation skills needed for college courses.

READING 74C The Research Paper Units 1
Prerequisites: Reading Level II or concurrent enrollment in READ 90A-F or 98G-M.
Limitations on Enrollment: None.
Advisories: None.
This course is designed for students who need assistance in applying reading and writing research techniques to an assigned research paper from another course.

READING 74D Summary Writing Units 1
Prerequisites: Reading Level II or concurrent enrollment in READ 90A-F or 98G-M.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer techniques and practice in writing summaries of articles from journals and other publications.

READING 74E Vocabulary Enrichment Units 1
Prerequisites: Reading level II or concurrent enrollment in READ 90A-F or 98G-M.
Limitations on Enrollment: None.
Advisories: None.
This course is designed for students who wish to enrich their vocabulary for career and academic purposes. A variety of strategies are taught to enhance the student’s ability to understand and retain new vocabulary words.

READING 74F Basic Grammar for Writing and Speaking Units 1
Prerequisites: Reading level II or concurrent enrollment in READ 90A-F or 98G-M.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer practice in the basic conventions of grammar within the context of reading and writing assignments.

READING 74G Spelling Units 1
Prerequisites: Reading level II or concurrent enrollment in READ 90A-F or 98G-M.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to help students improve spelling skills by using sight words they already know to spell polysyllabic words.
READING 74H Reading Literature Units 1
Prerequisites: Reading level II or concurrent enrollment in READ 90A-F or 98G-M.
Limitations on Enrollment: None.
Advisories: None.
This course is designed for students who wish to expand their understanding of literature through group discussions. Students read, discuss, and analyze a broad range of literature in preparation for literature courses.

READING 74I Conversations about Literature for Non-Native Speakers
Prerequisites: Reading level II or concurrent enrollment in READ 90A-F or 98G-M.
Limitations on Enrollment: None.
Advisories: None.
This course is designed for non-native speakers who want practice in using American expressions. Students learn to use and understand idiomatic expressions through literature discussion groups.

READING 74J Reading and Writing Techniques for The Information Age
Prerequisites: Reading level II or concurrent enrollment in READ 90A-F or 98G-M.
Limitations on Enrollment: None.
Advisories: None.
This course is designed as an introduction to information age literacy. Students learn the basic reading, writing, and computer skills necessary for communicating in the information age.

READING 75D Reading and Writing Techniques
Prerequisites: Reading Level II or concurrent enrollment in reading.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to improve comprehension, word analysis, spelling, vocabulary, and grammatical skills.

READING 90A Introduction to Reading and Language Skills
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is the first course of a program designed to improve reading through the study of phonetic analysis, basic sight words, spelling, vocabulary development, and basic comprehension. The course meets the level I reading requirement. Units earned in this course do not count toward an associate degree.

READING 90B Introduction to Reading and Language Skills
Prerequisites: READING 90A.
Limitations on Enrollment: None.
Advisories: None.
This course is the second course of a program designed to improve reading through the study of phonetic analysis, basic sight words, spelling, vocabulary development, and basic comprehension. The course meets the level I reading requirement. Units earned in this course do not count toward the associate degree.

READING 90C Beginning Reading and Language Skills
Prerequisites: READING 90B.
Limitations on Enrollment: None.
Advisories: None.
This course is the third course of a program designed to improve reading through the study of structural analysis, word recognition, vocabulary development, spelling, and comprehension. The course meets the level I reading requirement. Units earned in this course do not count toward the associate degree.

READING 90D Beginning Reading and Language Skills
Prerequisites: READING 90C.
Limitations on Enrollment: None.
Advisories: None.
This course is the fourth course of a program designed to improve reading through the study of structural analysis, word recognition, vocabulary development, spelling, and comprehension. The course meets the level I reading requirement. Units earned in this course do not count toward the associate degree.

READING 90E Intermediate Reading and Language Skills
Prerequisites: READING 90D.
Limitations on Enrollment: None.
Advisories: None.
This course is the fifth course of a program designed to improve reading through the study of vocabulary development, word analysis, spelling, comprehension skills, and study skills. The course meets the level I reading requirement. Units earned in this course do not count toward the associate degree.

READING 90F Intermediate Reading and Language Skills
Prerequisites: READING 90E.
Limitations on Enrollment: None.
Advisories: None.
This course is the sixth course of a program designed to improve reading through the study of vocabulary development, word analysis, spelling, comprehension skills, and study skills. The course meets the level I reading requirement. Units earned in this course do not count toward the associate degree.

READING 91A Reading in Literature
Prerequisites: None.
Limitation on Enrollment: None.
Advisories: None.
This course is designed to improve reading comprehension while building background knowledge in the subject area of literature. In this course the student learns to use comprehension techniques and becomes acquainted with the basic concepts and vocabulary needed for an introductory course in literature. Successful completion of four of the following five courses is equivalent to Reading level II: Reading in Literature, Reading in Earth and Life Sciences, Reading in Physical Science, Reading in World Geography and Culture, and Reading in History. Units earned in Reading in Literature do not count toward the Associate Degree.
READING 91B  Reading in Earth and Life Sciences  Units 4
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to improve reading comprehension while building background knowledge in the subject area of earth and life sciences. In this course the student learns to use comprehension techniques and becomes acquainted with the basic concepts and vocabulary needed to take an introductory course in earth and life sciences. Successful completion of four of the following five courses is equivalent to Reading level II: Reading in Literature, Reading in Earth and Life Sciences, Reading in Physical Science, Reading in World Geography and Culture, and Reading in History. Units earned in Reading in Earth and Life Sciences do not count toward the Associate Degree.

READING 91C  Reading in Physical Science  Units 4
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to improve reading comprehension while building background knowledge in the subject area of physical science. In this course the student learns to use comprehension techniques and becomes acquainted with the basic concepts and vocabulary needed for an introductory course in physical science. Successful completion of four of the following five courses is equivalent to Reading level II: Reading in Literature, Reading in Earth and Life Sciences, Reading in Physical Science, Reading in World Geography and Culture, and Reading in History. Units earned in Reading in Physical Science do not count toward the Associate Degree.

READING 91D  Reading in World Geography and Culture  Units 4
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to improve reading comprehension while building background knowledge in the subject area of geography and culture. In this course the student learns to use comprehension techniques and becomes acquainted with the basic concepts and vocabulary needed to take an introductory course in world geography and culture. Successful completion of four of the following five courses is equivalent to Reading level II: Reading in Literature, Reading in Earth and Life Sciences, Reading in Physical Science, Reading in World Geography and Culture, and Reading in History. Units earned in this course do not count toward the associate degree.

READING 91E  Reading in History  Units 4
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to improve reading comprehension while building background knowledge in the subject area of history. In this course the student learns to use comprehension techniques and becomes acquainted with the basic concepts and vocabulary needed for an introductory course in history. Successful completion of four of the following five courses is equivalent to Reading level II: Reading in Literature, Reading in Earth and Life Sciences, Reading in Physical Science, Reading in World Geography and Culture, and Reading in History. Units earned in Reading in History do not count toward the Associate Degree.

READING 91F  Reading in Literature  Units 4
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to improve reading comprehension while building background knowledge in the subject area of literature. In this course the student learns to use comprehension techniques and becomes acquainted with the basic concepts and vocabulary needed to take an introductory course in literature. Successful completion of four of the following five courses is equivalent to Reading level II: Reading in Literature, Reading in Earth and Life Sciences, Reading in Physical Science, Reading in World Geography and Culture, and Reading in History. Units earned in Reading in Literature do not count toward the Associate Degree.

READING 91G  Reading in World History  Units 4
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to improve reading comprehension while building background knowledge in the subject area of world history. In this course the student learns to use comprehension techniques and becomes acquainted with the basic concepts and vocabulary needed to take an introductory course in world history. Successful completion of four of the following five courses is equivalent to Reading level II: Reading in Literature, Reading in Earth and Life Sciences, Reading in Physical Science, Reading in World Geography and Culture, and Reading in History. Units earned in Reading in World History do not count toward the Associate Degree.
READING 98L Reading Assistance Center Units 0.5-3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide students individualized lessons through a prescriptive program based on the diagnosis of individual reading strengths and needs. The course meets the level I reading requirement. Units earned in this course do not count toward the associate degree.

READING 98M Reading Assistance Center Units 0.5-3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide students individualized lessons through a prescriptive program based on the diagnosis of individual reading strengths and needs. The course meets the level I reading requirement. Units earned in this course do not count toward the associate degree.

RELIGION

RELIGN 14A Great Religions of the Eastern World Units 3
Prerequisites: None.
Limitation on Enrollment: None.
Advisories: None.
This course is a survey of the historical development and essential beliefs of the major religions of the Eastern world. Primary emphasis is on the major phases of development and comparative insights among the great religions of the world. The course consists of readings, lectures, and discussions in Hinduism, Buddhism, Jainism, Confucianism, and Taoism. (UC, CSU)

RELIGN 14B Great Religions of the Western World Units 3
Prerequisites: Reading level II.
Limitation on Enrollment: None.
Advisories: None.
This course is a survey of the historical development and essential beliefs of the major religions of the Western world. Primary emphasis is on the major phases of development and comparative insights among the great religions of the world. The course consists of readings, lectures, and discussions in the areas of ancient religious beliefs, Mesopotamian religions, Graeco-Roman religions, Teutonic religion, Zoroastrianism, Judaism, Christianity, and Islam. (UC, CSU)

RUSSIAN

RUSS 38A Special Assignment: Listening Units 2
Prerequisites: Concurrent enrollment in or completion of RUSS 1 or RUSS 51.
Limitations on Enrollment: None.
Advisories: None.
This course is a skill-building course with an emphasis on listening. The course is designed to meet the special need of the student. The course is offered for individual or group study. (CSU)

RUSS 38B Special Assignment: Pronunciation Units 2
Prerequisites: Concurrent enrollment in or completion of RUSS 1 or RUSS 51.
Limitations on Enrollment: None.
Advisories: None.
This course is a skill-building course with an emphasis on pronunciation. The course is designed to meet the special need of the student. The course may be offered for individual or group study. (CSU)

RUSS 38C Special Assignment: Reading Units 2
Prerequisites: Concurrent enrollment in or completion of RUSS 1 or RUSS 51.
Limitations on Enrollment: None.
Advisories: None.
This course is a skill-building course with an emphasis on reading. The course is designed to meet the special need of the student. The course is offered for individual or group study. (CSU)

RUSS 38D Special Assignment: Writing Units 2
Prerequisites: Concurrent enrollment in or completion of RUSS 1 or RUSS 51.
Limitations on Enrollment: None.
Advisories: None.
This course is a skill-building course with an emphasis on writing. The course is designed to meet the special need of the student. The course may be offered for individual or group study. (CSU)

RUSS 51 Elementary Russian Units 2.5
Prerequisites: None.
Limitation on Enrollment: None.
Advisories: None.
This course is an introduction to the Russian language and Russian culture. Emphasis is placed on the following skills: listening, speaking, reading, and writing. The combined five units of RUSS 51 and 52 are equivalent to RUSS 1. (UC, CSU)

RUSS 52 Elementary Russian Units 2.5
Prerequisites: Successful completion of RUSS 51.
Limitation on Enrollment: None.
Advisories: None.
This course is an introduction to the Russian language and Russian culture. Emphasis is placed on the following skills in the order given: listening, speaking, reading, and writing. The combined five units of RUSS 51 and 52 are equivalent to RUSS 1. (UC, CSU)

RUSS 53 Elementary Russian Units 2.5
Prerequisites: Successful completion of RUSS 51 or 52.
Limitation on Enrollment: None.
Advisories: None.
This course is an introduction to the Russian language and Russian culture. Emphasis is placed on the following skills in the order given: listening, speaking, reading, and writing. The combined five units of RUSS 53 and 54 are equivalent to RUSS 2. (UC, CSU)

RUSS 54 Elementary Russian Units 2.5
Prerequisites: Successful completion of RUSS 53.
Limitation on Enrollment: None.
Advisories: None.
This course is an introduction to the Russian language and Russian culture. Emphasis is placed on the following skills in the order given: listening, speaking, reading, and writing. The combined five units of RUSS 53 and 54 are equivalent to RUSS 2. (UC, CSU)
SM ENG 30A Introduction to Compact Engines Units 5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce students to the basic theory, maintenance, construction, and repair of two-stroke and four-stroke commercial, recreational, marine, motorcycle, and lawn and garden engines and their applications. (CSU)

SM ENG 30B Beginning Compact Engines Units 5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to prepare students to analyze, troubleshoot, repair, and overhaul both two-stroke and four-stroke engines and their applications. (CSU)

SM ENG 30C Intermediate Compact Engines Units 5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to prepare students to analyze electrical problems found on compact engine equipment and to service and repair the powertrain. (CSU)

SM ENG 30D Advanced Compact Engines Units 5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to prepare students in specialized applications, drive trains, clutches, transmissions, electrical systems, and compact diesel systems. Students write work orders, develop parts lists, and work with customers. (CSU)

SM ENG 65 Engine Theory Basics Units 3
Prerequisites: None. Limitations on Enrollment: None. Advisories: None.
This course is designed to instruct the student in the proper safety and operational theory of internal combustion engines. Emphasis is placed on operational theory and preventive maintenance of the engines found on most compact equipment. Information provided in the course enables the student to better understand service work performed on equipment. (CSU)

SM ENG 66 Compact Diesel Engines Units 2.5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an explanation of the design, operation, and proper maintenance of the latest compact diesel engines approved by the California Air Resources Board (CARB) for operation and sales in California after 1997. Topics include fuel characteristics, current emissions testing and standards, related engine systems, operation, and trouble-shooting. Problem-solving component failures and disassembly/assembly of a representative engine is included. Upon successful completion of this course the student is prepared to take the Outdoor Power Equipment Certification (OPEC) test. (CSU)

SM ENG 87A Compact Engines Specialization Units 3
Prerequisites: SM ENG 30D.
Limitations on Enrollment: This course requires instructor approval to enroll.
Advisories: None.
This course is designed for advanced students in compact engines. Students complete an advanced specialized project developed in consultation with the instructor.

SOCIAL SCIENCE

SOCSC 15 Selected Topics: Social Science Units 1-2
Prerequisites: Reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer instruction in one of the specialized areas of social science not already covered by the existing curricula. (UC, CSU)

SOCSC 30 American Immigrant Experience Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the immigrant experience in the United States. The course examines the racial, religious, and cultural values of ethnic groups which sustain the groups while perpetuating a pluralistic society in America, and it demonstrates that ethnic diversity is a major theme in the history of the United States. (UC, CSU)

SOCSC 99V Work Experience: Social Science Units 1
Prerequisites: Students must be enrolled in at least three units of class work, of which at least one course and also employment, must be related to major field of study.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to give students college credit for on-the-job experience related to the major study field. Students must demonstrate new and expanded learning experiences before being permitted to repeat. To register, contact work experience staff in the work experience office. This course may be repeated three times in sequence except for summer school alternate plan.

SOCIOLOGY

SOCIO 1A Introduction to Sociology Units 3
Prerequisites: Reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to examine how social forces affect human behavior. Students classify, discuss, and analyze the major social forces such as socialization, culture, class inequality and differences, ethnic and racial relations, economic and political institutions, education, family, religion, and social change. (UC, CSU, CAN SOC 2)
SOCIO 1B Problems of A Changing Society Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to focus attention on the social problems which grow out of rapid social and cultural change. Among topics considered are family disorganization, economic insecurity, juvenile delinquency and adult criminality, physical and mental ill health, racial discrimination, international tensions, and education. (UC, CSU)

SOCIO 15 Selected Topics: Sociology Units 0.5-2
Prerequisites: Reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer instruction in one of the specialized areas of sociology not already covered by existing curricula. (UC, CSU)

SOCIO 15J Race, Class, Sex, and Identity: A Workshop Units 2
Prerequisites: Reading level II.
Limitations on Enrollment: None.
Advisories: None.
This topic course is an experiential learning process designed to develop greater self-understanding as well as greater interest in social science for the student participant. (UC, CSU)

SOCIO 24 Social Welfare Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to explore the origin and development of the religious, political, economic, social, and historical forces which have contributed to the emergence of social welfare as an institution in America. It is recommended for social worker majors or those with particular interest in social welfare. (UC, CSU)

SOCIO 27 Gender in Contemporary Society Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to examine changing sex roles in contemporary society with a special emphasis on gender in the United States which will be put in the context of a historical and comparative analysis of men and women’s varying roles, statutes, and life chances. Social problems such as domestic violence and economic and social discrimination are examined. The course also addresses the feminist movement, the men’s movement, and the recent backlash to feminism. (UC, CSU)

SOCIO 33 Social Inequality in the United States Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to examine social inequality and stratification from a theoretical and comparative perspective, with an emphasis on the United States. Included in the course is a discussion and analysis of types of inequality such as age and gender, inequality types of stratification including racial, ethnic, and class stratification. The experiences of many racial and ethnic groups are addressed including African-Americans, Asian-Americans, Latinos, Native Americans, and Americans of European descent. (UC, CSU)

SOCIO 45A Beginning Field Practicum Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide an opportunity for students to have on-the-job learning experiences in human service agencies. Students observe professional staff working with clients in public agencies. One hour in class is required each week to integrate practical experiences with theory learned in sociology courses. (UC, CSU)

SOCIO 45B Intermediate Field Practicum Units 2
Prerequisites: Reading level II; completion of or concurrent enrollment in EDUC 10, PSYCH 1, PSYCH 44, or SOCIO 1A.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide an opportunity for students to have on-the-job learning experiences in human service agencies. Students observe professional staff working with clients in public agencies. One hour in class is required each week to integrate practical experiences with theory learned in sociology courses. (UC, CSU)

SOCIO 45H Special Studies: Sociology Units 1-2
Prerequisites: Presentation of a project acceptable to the instructor and the division chairperson; SOCIO 1A or 1B with a grade of “B” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to allow qualified students to do advanced work in the field. The course includes research, directed reading, field work, or other advanced study. The course may be repeated for a maximum of four units. (UC, CSU)

SPAN 1 Elementary Spanish Units 5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the Spanish language and Spanish cultures. Emphasis is placed on the following skills in the order given: listening, speaking, reading, and writing. (UC, CSU, CAN SPAN 2, CAN SPAN SEQ A with both SPAN 1 and 2)

SPAN 2 Elementary Spanish Units 5
Prerequisites: Successful completion of SPAN 1 or 52.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the Spanish language and Spanish cultures. Emphasis is placed on the following skills in the order given: listening, speaking, reading, and writing. (UC, CSU, CAN SPAN 4, CAN SPAN SEQ A with both SPAN 1 and 2)

SPAN 3 Intermediate Spanish Units 5
Prerequisites: Successful completion of SPAN 2 or 54.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer continued study of the Spanish language and Spanish cultures. Efforts to improve reading and composition skills are based on both contemporary and traditional selection. (UC, CSU, CAN SPAN 8, CAN SPAN SEQ B with both SPAN 3 and 4)
SPAN 4  Intermediate Spanish Units 5  
Prerequisites: Successful completion of SPAN 3.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to offer continued study of the Spanish language and Spanish cultures. Efforts to improve reading and composition skills are based on both contemporary and traditional selection. (UC, CSU, CAN SPAN 10, CAN SPAN SEQ B with both SPAN 3 and 4)  

SPAN 36A  Introductory Spanish Conversation Units 2  
Prerequisites: Successful completion of SPAN 1 or 51.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to strengthen fundamental communication patterns based on typical daily situations. (CSU)  

SPAN 36B  Beginning Spanish Conversation Units 2  
Prerequisites: Successful completion of SPAN 2 or 53.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to achieve conversational ability based on typical daily situations. (CSU)  

SPAN 38A  Special Assignment: Listening Units 2  
Prerequisites: Concurrent enrollment in or completion of SPAN 1 or 51.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is a skill-building course with an emphasis on listening. The course is designed to meet the special need of the student. The course is offered for individual or group study. (CSU)  

SPAN 38B  Special Assignment: Pronunciation Units 2  
Prerequisites: Concurrent enrollment in or completion of SPAN 1 or 51.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is a skill-building course with an emphasis on pronunciation. The course is designed to meet the special need of the student. The course is offered for individual or group study. (CSU)  

SPAN 38C  Special Assignment: Reading Units 2  
Prerequisites: Concurrent enrollment in or completion of SPAN 1 or 51.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is a skill-building course with an emphasis on reading. The course is designed to meet the special need of the student. The course is offered for individual or group study. (CSU)  

SPAN 38D  Special Assignment: Writing Units 2  
Prerequisites: Concurrent enrollment in or completion of SPAN 1 or 51.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is a skill-building course with an emphasis on writing. The course is designed to meet the special need of the student. The course is offered for individual or group study. (CSU)  

SPAN 50H  Special Studies: Spanish Units 1-2  
Prerequisites: Presentation of a project acceptable to the instructor and the division chairperson; SPAN 4 with grade of “B” or better.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to allow students to do advanced work in the language. The course includes research, directed reading, field work, or other advanced study. The course may be repeated for a maximum of 4 units. (UC, CSU)  

SPAN 51  Elementary Spanish Units 2.5  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is an introduction to the Spanish language and Spanish culture. Emphasis is placed on the following skills in the order given: listening, speaking, reading, and writing. The combined five units of SPAN 51 and 52 are equivalent to SPAN 1. (UC, CSU, CAN SPAN 2 with both SPAN 51 and 52, CAN SPAN SEQ A with SPAN 51, 52, 53, and 54)  

SPAN 52  Elementary Spanish Units 2.5  
Prerequisites: Successful completion of SPAN 51.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is an introduction to the Spanish language and Spanish culture. Emphasis is placed on the following skills in the order given: listening, speaking, reading, and writing. The combined five units of SPAN 51 and 2 are equivalent to SPAN 1. (UC, CSU, CAN SPAN 2 with both SPAN 51 and 52, CAN SPAN SEQ A with SPAN 51, 52, 53, and 54)  

SPAN 53  Elementary Spanish Units 2.5  
Prerequisites: Successful completion of SPAN 1 or SPAN 52.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is an introduction to the Spanish language and Spanish culture. Emphasis is placed on the following skills in the order given: listening, speaking, reading, and writing. The combined five units of SPAN 53 and 54 are equivalent to SPAN 2. (UC, CSU, CAN SPAN 4, CAN SPAN SEQ A with SPAN 51, 52, 53, and 54)  

SPAN 54  Elementary Spanish Units 2.5  
Prerequisites: Successful completion of SPAN 53.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is an introduction to the Spanish language and Spanish culture. Emphasis is placed on the following skills in the order given: listening, speaking, reading, and writing. The combined five units of SPAN 53 and 54 are equivalent to SPAN 2. (UC, CSU, CAN SPAN 4 with both SPAN 53 and 54, CAN SPAN SEQ A with SPAN 51, 52, 53, and 54)
SPECIAL EDUCATION

SP ED 2  Introduction to Communication  Units 3
Disorders
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to address speech and language disorders in children and adults. Topics include stuttering and voice disorders, trends in legislation and education, and a review of available community resources. The course provides information to the student exploring a career related to speech and language therapy. (CSU)

SP ED 15  Selected Topics: Special Education  Units 0.5-3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to present selected topics dealing with various aspects of special education which are not addressed by the existing college curriculum. Topics include such areas as careers in special education, concepts related to reasonable accommodation, and the implications of disability in various work and educational environments. (CSU)

SP ED 22  Beginning American Sign Language  Units 3
Prerequisites: Reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to communication with the deaf through American Sign Language AMESLAN. AMESLAN, sometimes referred to as the language of the deaf, is particularly useful to persons with interest in more effective communications with deaf adults and for those interested in eventual interpreting. (UC, CSU)

SP ED 23  Intermediate American Sign Language  Units 3
Prerequisites: SP ED 22 with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is a course in manual communication in American Sign Language at an intermediate level of study. It is assumed that students have achieved a basic understanding of AMESLAN words and concepts and will emphasize an expansion of the American Sign Language repertoire. (UC, CSU)

SP ED 24  Advanced American Sign Language  Units 3
Prerequisites: SP ED 23 with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is a course in manual communication in American Sign Language at an advanced level of study. It is reasonable to expect that students taking this course have a working knowledge of AMESLAN and have developed respectable communication skills using the language. The course works on expanding language repertoire and refining communication abilities through accurate use of idioms. (UC, CSU)

SP ED 75  Assisting the Student With Disabilities  Units 0.5-1
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed as an introduction and orientatoin for the student interested in working with disabled students at San Joaquin Delta College. The course provides an overview of the following information: pertinent laws; campus support services, Disabled Students Programs and Services (DSPS), understanding of a variety of disabling conditions requiring assistance on campus, and skills and best practices necessary for the student to effectively assist other students on campus who have disabilities. Units in this course do not apply toward the associate degree.

SP ED 76  Selected Topics: Special Education Assistive Technology  Units 0.5-2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer instruction in the use of assistive technology not already included in the curriculum to students with special access needs. Units earned in this course do not apply to the associate degree.

SP ED 78A  Introductory American Sign Language Laboratory  Units 1
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to reinforce and expand American Sign language (ASL) skills. In a laboratory setting, emphasis is placed on fingerspelling, numbers, conversational regulators, basic American Sign Language vocabulary, and basic American Sign Language communication skills. Units earned in this course do not apply toward the associate degree.

SP ED 78B  Beginning American Sign Language Laboratory  Units 1
Prerequisites: Completion of SP ED 78A with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to reinforce and expand American Sign Language (ASL) skills acquired in SP ED 22. In a laboratory setting, emphasis is placed on fingerspelling, numbers, conversational regulators, beginning American Sign Language vocabulary, and beginning American Sign Language communication skills. Units in this course do not apply toward the associate degree.

SP ED 78C  Intermediate Sign Language Laboratory  Units 1
Prerequisites: Completion of SP ED 78B with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to reinforce and expand the American Sign Language (ASL) skills acquired in SP ED 23. In a laboratory setting, emphasis is placed on fingerspelling, numbers, conversational regulators, intermediate American Sign Language vocabulary, and specific American Sign Language grammatical structure at an intermediate level. Units in this course do not apply toward the associate degree.
SP ED 78D  Advanced American Units 1
Sign Language Laboratory
Prerequisites: Completion of SP ED 78C with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to reinforce and expand the American Sign Language skills acquired in SP ED 24. In a laboratory setting, emphasis is placed on fingerspelling, numbers, conversational regulators, advanced American Sign Language vocabulary, and specific American Sign Language grammatical structure at an advanced level. Units in this course do not apply toward the associate degree.

SP ED 83  Introduction to Kurzweil 1000 Units 1
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce the student who is legally blind to a scanner and computer-based reading system using a speech synthesizer. Units earned in this course do not apply to the associate degree.

SP ED 84A  Beginning Screen Reader Application Units 2
Prerequisites: SP ED 85A with a grade of “C” or better.
This course is designed for the student who requires a non-visual means of accessing computer information. The student uses a screen reader application to navigate a window environment using keyboard strokes instead of a mouse. Units in this course do not apply to the associate degree.

SP ED 84B  Word Processing with a Screen Reader Application Units 2
Prerequisites: SP ED 84A with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is a beginning level course in word processing using a screen reader application for the student who requires a non-visual means of accessing computer information. The course expands and builds upon the skills developed in SP ED 84A, “Beginning Screen Reader Application.” Units in this course do not apply towards the associate degree.

SP ED 85A  Introduction to Adapted Keyboarding Units 1
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce basic computer keyboarding skills using adaptive computer technology for the student with physical, communication, and learning disabilities. The course focuses on developing familiarity with the keyboard and touch typing skills for the alphabetic keys at an introductory level. The course includes assessment of individual abilities and prescriptive adaptive software/hardware for maximum success. Units in this course do not apply toward an associate degree.

SP ED 85B  Beginning Adapted Keyboarding Units 1
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is a beginning-level course in adaptive computer keyboarding. The course focuses on expanding and refining keyboard skills for the student with physical, communication, and learning disabilities using adaptive computer technology. This course expands and builds upon the skills developed in SPED 85A, “Introduction to Adapted Keyboarding.” Units in this course do not apply toward an associate degree.

SP ED 85C  Intermediate Adapted Keyboarding Units 1
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an intermediate-level course in adaptive computer keyboarding. The course focuses on expanding and refining keyboard skills for the student with physical, communication and learning disabilities using adaptive computer technology. This course expands and builds upon the skills developed in SP ED 85B, “Beginning Adapted Keyboarding.” Units in this course do not apply toward an associate degree.

SPCH 1A  Fundamentals of Speech Units 3
Prerequisites: Reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to emphasize current theories of communication, audience analysis, and development and organization of information for public speaking. (UC, CSU, CAN SPCH 4)

SPCH 1B  Advanced Speech Units 3
Prerequisites: Reading level II; SPCH 1A with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is concerned with refinement in delivery, style, and choice of materials and methods of organization for persuasion. The course is of special value to pre-legal, theology, radio, speech, drama, and teaching credential students. (UC, CSU)

SPCH 3  Interpersonal Communication Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed as an overview of interpersonal communication which includes analysis of relationships with family, friends, significant others, acquaintances, and coworkers. Practical application of skills for effective interpersonal communication with others is emphasized, including resolving conflicts and intercultural differences. (UC, CSU)

This course is designed to meet the special need of the student. The course is offered for individual or group study. (CSU)

This course is designed to continue practice in speaking, reading, and writing the language. Emphasis is placed on speech patterns, culture and civilization. The combined five units of Elementary Tagalog 53 and Elementary Tagalog 54 are equivalent to a second semester Tagalog course. (UC, CSU)

This course is a skill-building course with an emphasis on writing. The course is designed to meet the special need of the student. The course is offered for individual or group study. (CSU)
VIET 51 Elementary Vietnamese  
Units 2.5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the Vietnamese language and Vietnamese culture. Emphasis is placed on the following skills in the order given: listening, speaking, reading, and writing. The combined five units of VIET 51 and 52 are equivalent to VIET 1. (UC, CSU)

VIET 52 Elementary Vietnamese  
Units 2.5
Prerequisites: Successful completion of VIET 51.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the Vietnamese language and Vietnamese culture. Emphasis is placed on the following skills in the order given: listening, speaking, reading, and writing. The combined five units of VIET 51 and 52 are equivalent to VIET 1. (UC, CSU)

VIET 53 Elementary Vietnamese  
Units 2.5
Prerequisites: Successful completion of VIET 51.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the Vietnamese language and Vietnamese culture. Emphasis is placed on the following skills in the order given: listening, speaking, reading, and writing. The combined five units of VIET 53 and 54 are equivalent to VIET 2. (UC, CSU)

VIET 54 Elementary Vietnamese  
Units 2.5
Prerequisites: Successful completion of VIET 53.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the Vietnamese language and Vietnamese culture. Emphasis is placed on the following skills in the order given: listening, speaking, reading, and writing. The combined five units of VIET 53 and 54 are equivalent to VIET 2. (UC, CSU)

VO-ED 69V Internship: Vocational Education  
Units 1-8
Prerequisites: None.
Limitations on Enrollment: The student must enroll in a course that is directly related to the vocational education technology internship. The student must enroll in a minimum of 7 units during the semester including internship units. For summer session, the student must enroll in one related course in addition to work experience. The combined total number of units a student may take in internship, work experience, and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of work experience program objectives and an employer work experience agreement.
Advisories: GUID 30, 31, 32, 33.
This course is designed for students participating in an occupational internship in vocational education technology. Application of discipline-related skills and knowledge of the Secretaries' Commission on Achieving Necessary Skills (SCANS) competencies is emphasized. Each student is engaged in a specific research project or on-the-job learning activities under the supervision of a worksite supervisor and a college internship instructor. To register, complete an application form available at the Applied Science and Technology Division office, Holt 140. (CSU)

VO-ED 90V Work Experience: Vocational Education  
Units 1-8
Prerequisites: None.
Limitations on Enrollment: The student must enroll in a course that is directly related to the vocational education experience. The student must enroll in a minimum of 7 units during the semester including work experience units. For summer session, the student must enroll in one related course in addition to work experience. The combined total number of units a student may take in internship, work experience, and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of work experience program objectives and an employer work experience agreement.
Advisories: GUID 30, 31, 32, 33.
This course is designed for students employed in a career area. The course objectives are developed by the students in consultation with their supervisor. Students are engaged in a specific research project or on-the-job learning activities under the supervision of a worksite supervisor and a college work experience instructor. To register, complete an application form available at the Applied Science and Technology Division office, Holt 140.

VO-ED 96V Work Experience: General  
Units 1-3
Prerequisites: None.
Limitations on Enrollment: The student must enroll in a course that is directly related to the ornamental horticulture work experience. The student must enroll in a minimum of 7 units during the semester including work experience units. For summer session, the student must enroll in one related course in addition to work experience. The combined total number of units a student may take in internship, work experience, and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of work experience program objectives and an employer work experience agreement.
Advisories: GUID 30, 31, 32, 33.
This course is designed to award college credit for students working on campus and enrolled in a course that directly relates to their job. Students work for faculty members in offices, the library, laboratories, shops, or gymnasmiums. To register, complete an application form available at the Applied Science and Technology Division office, Holt 140.
VOCATIONAL NURSING

VOC NUR 1 Foundations of Nursing  Units 8.5
Prerequisites: ANAT 1 or ANAT 2 or BIOL 11; HS 36; HS/FCS 19; PSYCH 1; a grade of “C” or better in each prerequisite course with a minimum GPA of 2.5 from prerequisite courses is required.
Limitations on Enrollment: Admission to the Vocational Nursing or Psychiatric Technician Program.
Advisories: None.
This course is designed to introduce students to the fundamental issues and trends in nursing focusing on the collaborative roles of the Registered Nurse, Licensed Vocational Nurse, Psychiatric Technician and the Certified Nurse Assistant. Included in the content are the basic concepts of anatomy and physiology, the mechanisms of disease, and the sciences of nutrition and pharmacology. Wholism is introduced as the theoretical framework used by students in identification of patient needs. The clinical component of the course focuses on care of the geriatric client. (CSU)

VOC NUR 2 Introduction to Medical and Surgical Nursing  Units 8.5
Prerequisites: Admission to Vocational Nursing Program; VOC NUR 1.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce students to the nursing care of patients with common medical-surgical disorders of the cardiovascular, respiratory, and endocrine systems and that of the special senses. The clinical focus of this course is nursing care of adult patients with an uncomplicated course of treatment utilizing the concept of asepsis as applied to pre-operative and post-operative patient management. Psychiatric technicians may be able to have this course waived. (CSU)

VOC NUR 3 Obstetrical Nursing  Units 3.5
Prerequisites: VOC NUR 2.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to prepare vocational nursing students for the role of providing care to low-risk and high-risk childbearing families. The theoretical framework of wholism is utilized for identification of biological, psychological, sociological, cultural, and spiritual family needs. The nursing process is utilized for the planning and implementation of care. Fundamental issues, trends and the role of the vocational nurse in childbearing nursing are addressed. (CSU)

VOC NUR 4 Pediatric Nursing  Units 3.5
Prerequisites: VOC NUR 2.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce vocational nursing students to the fundamental issues and trends in pediatric nursing. The theoretical framework of wholism is applied in analyzing patient and family needs and the biological, psychological, sociological, cultural, and spiritual factors that may affect their interaction with the environment. Threaded throughout the course is a strong emphasis on growth and developmental changes that occur in the pediatric population. In addition to the maintenance of the well child, students are introduced to familial influences on child health promotion, the mechanisms of disease, nutrition, and pharmacology. (CSU)

VOC NUR 5 Intermediate Medical/ Surgical Nursing  Units 9
Prerequisites: VOC NUR 2.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce students to the care of common disorders affecting the neurological, musculoskeletal, genitourinary, and gynecological systems. Concepts related to psychopathology and oncology are included. Concurrent clinical practice in the care of patients with specific dysfunctions builds upon the theoretical framework of wholism presented in lecture. The course includes a specialized clinical rotation in mental health nursing. (CSU)

VOC NUR 6 Advanced Medical/ Surgical Nursing  Units 9
Prerequisites: VOC NUR 2.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to broaden student exposure to and perceptions of the biological, psychological, sociological, cultural, and spiritual aspects of health care. Students are introduced to concepts of illness and wellness states as related to immunology and communicable diseases. Trauma and emergency nursing care procedures are presented. Ethical and legal issues and relevant pharmacology content are integrated. Rehabilitation programs are included to emphasize the community aspects of nursing care. Leadership and supervision content are presented to help students relate to the various roles within the health care organization. (CSU)
