# San Joaquin Delta College Catalog 98 - 99

## Section III, Description of Courses - A -

### Table of Contents

#### ADMINISTRATION OF JUSTICE

- **A J 21** Criminal Justice in Society ........................................ 93
- **A J 22** Concepts of Criminal Law ........................................ 93
- **A J 23** Principles and Procedures of the Justice System .............. 93
- **A J 24** Legal Aspects of Evidence ...................................... 94
- **A J 25** Criminal Investigation ......................................... 94
- **A J 26** Patrol Procedures ............................................... 94
- **A J 28** Juvenile Law and Procedure .................................... 94
- **A J 30A** Critical Issues in the Justice System ....................... 94
- **A J 31** Report Preparation ............................................... 94
- **A J 39** Crime Prevention ............................................... 94
- **A J 40** Community Relations .......................................... 94
- **A J 41** Narcotics Investigation and Control .......................... 94
- **A J 50H** Special Studies: A J ......................................... 94
- **A J 51** Introduction to Correctional Science ........................ 94
- **A J 53** Correctional Interviewing and Interventions ................ 95
- **A J 54** Introduction to Probation and Parole ........................ 95
- **A J 55** Control and Supervision in Corrections ....................... 95
- **A J 57** Legal Aspects of Corrections ................................ 95
- **A J 69V** Internship: Administration of Justice ...................... 95
- **A J 73** Basic Academy: Corrections .................................... 95
- **A J 84** California Youth Authority - Training Academy ............ 95
- **A J 85** A Reserve Officer Beginning: Level III Module A .......... 95
- **A J 85** B Reserve Officer Intermediate: Level II Module B ........ 96
- **A J 85** C Reserve Officer Advanced: Level I Module C ............. 96
- **A J 89** Department of Corrections - Penal Code-832 ................. 96
- **A J 90** Selected Topics: Administration of Justice .................. 96
- **A J 91** Private Security Academy ..................................... 96
- **A J 92V** Work Experience: Correctional Science .................... 96
- **A J 93A** Basic Peace Officer Academy .................................. 96
- **A J 93B** Basic Peace Officer Academy .................................. 96
- **A J 95V** Work Experience: Administration of Justice .............. 97
- **A J 98** Department of Forestry Basic - Peace Officer Academy ...... 97

#### AGRICULTURE BUSINESS

- **AGBUS 10** Management Records ....................................... 97
- **AGBUS 12** Agricultural Economics .................................... 97
- **AGBUS 13** Agriculture and Natural - Resource Mathematics ........ 97
- **AGBUS 15** Computers in Agriculture .................................. 97
- **AGBUS 46** Agricultural Marketing .................................... 97
- **AGBUS 50H** Special Studies: Agriculture Business ................. 97
- **AGBUS 69V** Internship: Agricultural Business ....................... 97
- **AGBUS 75** Selected Topics: Agriculture ................................ 98
- **AGBUS 96V** Work Experience: Agricultural Business .............. 98

#### AGRICULTURE ENGINEERING
### SJDC Catalog 98 - 99  SECTION III, Description of Courses

- **AGEGR 21** Agricultural Welding ............................................... 98
- **AGEGR 30A** Introduction to Compact Engines .................................... 98
- **AGEGR 30B** Beginning Compact Engines .......................................... 98
- **AGEGR 30C** Intermediate Compact Engines ....................................... 98
- **AGEGR 30D** Advanced Compact Engines ........................................... 98
- **AGEGR 33** Equipment Maintenance and Operation ................................ 98
- **AGEGR 50H** Special Studies: Agriculture Engineering ........................... 98
- **AGEGR 64** Basic Engines .............................................................. 98
- **AGEGR 69V** Internship: Agricultural Engineering ................................ 99
- **AGEGR 75** Selected Topics: Agricultural Engineering .......................... 99
- **AGEGR 87A** Compact Engines Specialization .......................... 99
- **AGEGR 96V** Work Experience: Agriculture Engineering ........................ 99

### ANATOMY
- **ANAT 1** Human Anatomy .................................................................. 99
- **ANAT 2** Anatomy and Physiology .................................................... 99

### ANIMAL HUSBANDRY SCIENCES
- **AH SC 10** Principles of Animal Science ........................................... 99
- **AH SC 10L** Principles of Animal Science Laboratory .......................... 99
- **AH SC 11A** Introduction to Livestock - Evaluation .............................. 99
- **AH SC 11B** Beginning Livestock Evaluation ....................................... 100
- **AH SC 11C** Intermediate Livestock Evaluation ................................... 100
- **AH SC 11D** Advanced Livestock Evaluation ...................................... 100
- **AH SC 21** Livestock Production ....................................................... 100
- **AH SC 25A** Introduction to Livestock - Presentation ............................ 100
- **AH SC 25B** Beginning Livestock Presentation ..................................... 100
- **AH SC 25C** Intermediate Livestock - Presentation ............................... 100
- **AH SC 25D** Advanced Livestock Presentation ..................................... 100
- **AH SC 32** Stallion and Brood Mare - Management ................................ 100
- **AH SC 34** Animal Health and Sanitation .......................................... 100
- **AH SC 36** Livestock Breeding ............................................................ 100
- **AH SC 50H** Special Studies: Animal - Husbandry Sciences .................. 101
- **AH SC 69V** Internship: Animal Science ........................................... 101
- **AH SC 75** Selected Topics: Animal - Husbandry Science ....................... 101
- **AH SC 96V** Work Experience: Animal Husbandry Science .................... 101

### ANTHROPOLOGY
- **ANTHR 1** Cultural Anthropology .................................................... 101
- **ANTHR 2** Physical Anthropology ...................................................... 101
- **ANTHR 2L** Physical Anthropology - Laboratory .................................. 101
- **ANTHR 4** Introduction to Linguistics ................................................. 101
- **ANTHR 6** Introduction to North - American Indians ............................ 101
- **ANTHR 10** Introduction to Archaeology ............................................ 102
- **ANTHR 12A** Beginning Field Archaeology ........................................ 102
- **ANTHR 12B** Intermediate Field Archaeology ..................................... 102
- **ANTHR 15** Selected Topics: Anthropology ........................................ 102
- **ANTHR 50H** Special Studies: Anthropology ....................................... 102

### ARABIC
- **ARAB 51** Elementary Arabic ............................................................. 102
- **ARAB 52** Elementary Arabic ............................................................. 102
- **ARAB 53** Elementary Arabic ............................................................. 102
- **ARAB 54** Elementary Arabic ............................................................. 102

### ARCHITECTURAL DRAFTING
- **ARCH 1** Basic Architectural Drafting ................................................. 102
ARCH 2  Architectural Practice: Working Drawings ........................................ 103
ARCH 2A Architectural Practice: Design ...................................................... 103
ARCH 2B Architectural Practice: Structure ................................................... 103
ARCH 3  Architectural Presentations .............................................................. 103
ARCH 5  Architectural Detailing ......................................................................... 103
ARCH 8  Materials of Construction .................................................................... 103
ARCH 9  Design Fundamentals ........................................................................... 103
ARCH 12  Computer Aided Drafting Projects ................................................... 103
ARCH 58A Computer Aided Drafting ................................................................. 103
ARCH 58B AutoCAD Customization .................................................................... 103
ARCH 58C Computer Aided Drafting Projects .................................................. 103
ARCH 58D AutoCAD Three-Dimensional Modeling .......................................... 103
ARCH 58E AutoLISP Programming ..................................................................... 104
ARCH 73  Blueprint Reading .................................................................................. 104
ARCH 87A Architectural Drafting - Specialization ............................................. 104

ART
ART 1A  Art History ............................................................................................... 104
ART 1B  Art History ............................................................................................... 104
ART 2  Art History ................................................................................................ 104
ART 3  Introduction to Art ..................................................................................... 104
ART 4  Exploring Art ............................................................................................. 104

</table>
Transfer Credit—In accordance with Executive Order No. 167 issued by the Chancellor of the California State Universities on January 26, 1973, those courses numbered 1-69 and recommended by the faculty of Delta College and designated as baccalaureate in nature shall be accepted by any campus of the California State University for Credit toward its baccalaureate degrees. Transfer Credit to the University of California or to California State University is indicated by “UC, CSU” at the end of the catalogue description.

Associate Degree Credit Courses—All courses numbered 1 through 69 and some courses numbered 70 through 99 count toward the Associate Degree.

Non-Degree Credit Courses—Some courses numbered 70 through 99 are credit courses but do not count toward the associate degree or baccalaureate degree. These courses are indicated by the following statement at the end of catalogue description: “Units earned in this course do not count toward the associate degree.”

Televised Courses—Courses numbered 49A, B, C or D in most divisions. These may represent 2 or 3 unit courses offered over televised public programs. New courses are added each year under the supervision of the college curriculum committee and cover a wide variety of topics.

ADMINISTRATION OF JUSTICE

A J 21 Criminal Justice in Society Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is a review of the history and philosophy of administration of justice in America. Students identify the various subsystems, role expectations, and their interrelationships; theories of crime, punishment, and rehabilitation; and ethics, education, and training for professionalism in the system. (UC, CSU, CAN AJ 2)

A J 22 Concepts of Criminal Law Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is a review of the historical development and philosophy of law and constitutional provisions, definitions, classification of crime, and their application to the system of administration of justice, legal research, study of case law, methodology, and concepts of law as a social force. (CSU, CAN AJ 4)

A J 23 Principles and Procedures of the Justice System Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the in-depth study of the role and responsibilities of each segment within the administration of justice system: law enforcement, judicial, and corrections. A past, present, and future exposure to each subsystem’s procedures from initial entry to final disposition, and the relationship each segment maintains with its system members is covered. (UC, CSU)
A J 24 Legal Aspects of Evidence  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the origin, development, philosophy, and constitutional basis of evidence; constitutional procedural considerations affecting arrest, search, and seizure; kinds and degrees of evidence and rules governing admissibility, judicial decisions interpreting individual rights, and case studies. (CSU, CAN AJ 6)

A J 25 Criminal Investigation  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the fundamentals of investigation which include crime scene search, the recording, collection and preservation of physical evidence, scientific aids, modus operandi, and sources of information, interviews and interrogation, follow up, and case preparation. (CSU, CAN AJ 8)

A J 26 Patrol Procedures  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to teach responsibilities, techniques, and methods of police patrol. Identification of police hazards, beat patrol, and observation techniques of responding to crime and emergency are covered. (CSU)

A J 28 Juvenile Law and Procedures  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to show the organization, function and jurisdiction of juvenile agencies; the processing and detention of juveniles; juvenile case disposition; juvenile statutes and court procedures. (CSU)

A J 30A Critical Issues in the Justice System  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is one of two courses focusing on critical issues in the criminal justice system. It is designed to bring professional practitioners and qualified experts into the classroom to interact with students. The intent of the course is to provide an arena for students to develop critical thinking skills and problem solving skills toward critical issues in the justice system. Topics include community policing, the county courts, decriminalization of drugs, plea bargaining, and gangs. (CSU)

A J 31 Report Preparation  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the preparation and utilization of police reports by patrol officers, investigators, courts, and the community. Emphasis is on techniques designed to improve the writing skills of students who have minimal training in factual report writing. (CSU)

A J 39 Crime Prevention  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an in-depth exploration of all aspects of crime prevention. The approach is from an overall systems point of view to that of individual citizens wishing to avoid becoming a crime statistic. Special emphasis is placed on pragmatic crime prevention programs and individualized crime prevention projects for students. (CSU)

A J 40 Community Relations  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to treat current aspects and problems of police community relations. Among the topics covered are police image, role conflict, communication techniques, managing abnormal behavior in the field, crisis areas, and political fringe groups. (UC, CSU)

A J 41 Narcotics Investigation and Control  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the identification of narcotics and dangerous drugs, control and investigation problems, laws and methods relating to the suppression, and prosecution of narcotics and dangerous drug violations. (CSU)

A J 50H Special Studies: A J  Units 1-2
Prerequisites: Reading level II or concurrent enrollment in reading; completion of AJ 21 and one additional core course with grade of “B” or better and presentation of a project acceptable to the instructor and division chairperson.
Limitations on Enrollment: None.
Advisories: None.
This course is open to any student who wishes to do advanced work in the field of administration of justice. The course may include research, directed reading, field work, class work, or advanced study, and the course may be repeated for a maximum of four units. (CSU)

A J 51 Introduction to Correctional Science  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide the student with an overview of the history and trends of adult and juvenile corrections, including probation and parole. It focuses on the legal issues, specific laws, and general operation of correctional institutions. The relationship between corrections and other components of the judicial system is examined. (CSU)
A J 53  Correctional Interviewing and Interventions  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an overview of the techniques in interviewing and interventions available to practitioners in corrections. The student demonstrates the use of appropriate techniques and theories in confidence-building which may be used by the correctional employee in client interviews. This is a basic course for students who are planning to enter or who are already employed within the correctional science field. (CSU)

A J 54  Introduction to Probation and Parole  Units 3
Prerequisites: Reading level II or concurrent enrollment in reading.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the structure and functions of probation as a judicial process and parole as an executive function; and, a comparison of the correctional process primarily concerned with the evaluation, treatment, and control of offenders. (CSU)

A J 55  Control and Supervision in Corrections  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an overview of supervision and control of inmates in the local, state, and federal correctional institutions. The issues of supervision and control in a continuum from institutional daily living through crisis situations is introduced and discussed. The course emphasizes the role played by the offender and the correctional worker. Topics include inmate subculture, violence, and effects of crowding on inmates and staff, coping techniques for correctional officers in a hostile prison environment. The causes and effects of abusive tactics are discussed. (CSU)

A J 57  Legal Aspects of Corrections  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide students with an awareness of the historical framework, concepts, and precedents that guide correctional practice. Course material broadens the individual’s perspective of the corrections environment, the civil rights of prisoners, and the responsibilities and the liabilities of corrections officials. (CSU)

A J 69V  Internship: Administration of Justice  Units 1-8
Prerequisites: None.
Limitations on Enrollment: The student must enroll in a course that is directly related to the administration of justice internship. The student must enroll in a minimum of 7 units during the semester including internship units. For summer session, the student must enroll in one related course in addition to internship. The combined total number of units a student may take in internship, work experience, and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of internship program objectives and an employer internship agreement.
Advisories: GUID 30, 31, 32, 33.
This course is designed for students participating in an occupational internship in administration of justice. Application of discipline-related skills and knowledge of Secretaries Commission on Achieving Necessary Skills (SCANS) competencies is emphasized. Each student is engaged in a specific research project or on-the-job learning activities under the supervision of a worksite supervisor and a college internship instructor. (CSU)

A J 73  Basic Academy: Corrections  Units 12
Prerequisites: None.
Limitations on Enrollment: Must submit to a criminal history records check; no felony convictions (Penal Code Section 12021).
Advisories: None.
This course is designed to provide students with the background and training needed to perform the duties required of correctional officers in the California Department of Corrections (CDC). Topics include criminal law, the use of force, inmate supervision, defensive tactics, inmate rights, and the care and uses of firearms.

A J 84  California Youth Authority Training Academy  Units 12
Prerequisites: None; exempt from assessment testing.
Advisories: None.
This course is designed to train students for the basic entry level positions of Group Supervisor, Youth Counselor and Medical Technical Assistants in the California Youth Authority (CYA) state institutions. This course may be presented at various Youth Authority facilities in varying locations.

A J 85A  Reserve Officer Beginning: Level III Module A  Units 3
Prerequisites: Student must file a felony disclaimer prior to, or at the first class meeting; exempt from assessment testing.
Limitations on Enrollment: None.
Advisories: None.
This course is an examination of the many areas of criminal justice as they relate to police operations such as professional orientation, community relations, law, laws of evidence, communications, arrest and control, investigation, and firearms. This course satisfies Penal Code 832 requirements and the Commission on Peace Officer Standards and Training (POST) academic training requirements for Level III Reserve Peace Officers.
A J 85B Reserve Officer Intermediate: Units 6
Level II Module B
Prerequisites: Reading level II or concurrent enrollment in reading; AJ 85A, Reserve Officer Beginning.
Limitations on Enrollment: None.
Advisories: None.
This course examines the many areas of criminal justice as they relate to police operations, e.g., professional orientation, law, communications, driver awareness, force and weaponry, patrol procedures, traffic, custody, physical fitness, and defensive techniques. AJ 85A and AJ 85B satisfy the Commission on Peace Officer Standards and Training (POST) academic training requirements for the Level II Reserve Peace Officer.

A J 85C Reserve Officer Advanced: Units 4
Level I Module C
Prerequisites: Reading level II or concurrent enrollment in reading; AJ 85A and AJ 85B.
Limitations on Enrollment: None.
Advisories: None.
This course is an examination of the many areas of criminal justice as they relate to police operations, police community relations, law, patrol procedures, laws of evidence, traffic, and criminal investigation. AJ 85A, AJ 85B, and AJ 85C satisfy the Commission on Peace Officer Standards and Training (POST) academic training requirements for the Level I Reserve Peace Officer.

A J 89 Department of Corrections: Units 4
Penal Code-832
Prerequisites: None; exempt from assessment testing.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to train individuals for the basic entry level position of Correction Counselor I within the California Department of Corrections (CDC). This course may be presented at various correctional locations and/or facilities.

A J 90 Selected Topics: Administration of Justice: Units 1-2
Prerequisites: None; exempt from assessment testing.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to enable the college to offer instruction in the discipline of administration of justice not already covered by the existing curriculum. Areas of instruction include new legislative mandates and agency specific requirements. Units earned in this course do not count toward the associate degree.

A J 91 Private Security Academy: Units 5
Prerequisites: None.
Limitations on Enrollment: Must submit to a criminal records check, no felony convictions (Calif. Penal Code 12021), or legal mandates that restrict or prohibit employment as a law enforcement officer.
Advisories: None.
This course is designed to provide students with skills necessary to ensure satisfactory completion of the requirements of the California Department of Consumer Affairs for Security Officers. This course also prepares students for future participation in any California Police Basic Academy.

A J 92V Work Experience: Correctional Science: Units 1-8
Prerequisites: None.
Limitations on Enrollment: The student must enroll in a course that is directly related to the administration of justice work experience. The student must enroll in a minimum of 7 units during the semester including work experience units. For summer session, the student must enroll in one related course in addition to work experience. The combined total number of units a student may take in internship, work experience, and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of work experience program objectives and an employer work experience agreement.
Advisories: GUID 30, 31, 32, 33.
This course is designed for students employed in administration of justice. The course objectives are developed by the students in consultation with their supervisor. Students are engaged in a specific research project or on-the-job learning activities under the supervision of a worksite supervisor and a college work experience instructor. To register, complete an application form available at the Applied Science and Technology Division office, Holt 140.

A J 93A Basic Peace Officer Academy: Units 10
Prerequisites: Reading level II or concurrent enrollment in reading; must meet State minimum requirements for peace officers; passage of academy testing/examination process which includes entry-level written examination, submission of medical examination, fingerprints, felony disclaimer, body fat examination and personal interview with academy staff.
Limitations on Enrollment: None.
Advisories: None.
This course is designed for training basic level individuals for positions as Level I reserve officers, police officers, and deputy sheriffs assigned to patrol. This course is certified by the Commission on Peace Officer Standards and Training (POST). The 705-hour academy program is presented over two semesters, 20 hours weekly. The two-course program requires approximately nine months.

A J 93B Basic Peace Officer Academy: Units 10
Prerequisites: Reading level II or concurrent enrollment in reading and successful completion of AJ 93A in the previous semester.
Limitations on Enrollment: None.
Advisories: None.
This course is designed for training basic entry level individuals for positions as Level I reserve officers, police officers, and deputy sheriffs assigned to patrol. This course is certified by the Commission on Peace Officer Standards and Training. The 705-hour academy program is presented over two semesters, 20 hours weekly. The two-course program requires approximately nine months. Upon successful completion, students receive the San Joaquin Delta College Certificate of Completion and are certified to the Department of Justice.
A J 95V  Work Experience:  Units 4
Administration of Justice
Prerequisites: Students must be enrolled in at least three units of class work of which at least one course and also employment must be related to major field of study.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to give the students college credits for on-the-job experience related to the major study field. Students must demonstrate new and expanded learning experiences before being permitted to repeat. To register, contact the work experience staff in Holt 140. The course may be repeated three times.

A J 98  Department of Forestry Basic  Units 12
Peace Officer Academy
Prerequisites: Passage of an entry-level written examination approved by the Commission on Peace Officer Standards and Training; fingerprints must be submitted to and cleared by the Department of Justice; a medical release must be obtained from a licensed physician, or sponsoring agency, for participation in the physical conditioning training, defensive tactics, physical testing and other physical skills training.
Limitations on Enrollment: None.
Advisories: None.
This course is designed for training individuals for positions as Level 1 reserve officers, police officers, deputy, sheriffs and other basic level peace officer positions. This course is certified by the Commission on Peace Officer Standards and Training (POST). The 560-hour academy program is presented in an intensive format through the Department of Forestry.

AGRICULTURE BUSINESS

AGBUS 10  Management Records  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed for the study of farm accounting and types of farm records, record keeping, and reasons for their use. Students determine how to use measures of earnings to improve farm efficiency. Students learn the necessary steps of inputting the records utilizing commercial programs. (CSU)

AGBUS 12  Agricultural Economics  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce students to our economic system, agricultural resources, factors effecting production, and basic economic concepts and terminology. The pricing and marketing of agriculture products, cost of production, agricultural loans, and government programs effecting agricultural are covered. (UC, CSU)

AGBUS 13  Agriculture and Natural Resource Mathematics  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to fundamental arithmetic and algebraic operations including fractions, decimals, equations, percentages, ratios, proportions, and linear, area, and volume measurements. Computations involving plant populations, farm machine outputs, construction costs, feed ingredients, and farm finance are stressed. (CSU)

AGBUS 15  Computers in Agriculture  Units 3
Prerequisites: None.
Limitation on Enrollment: None.
Advisories: None.
This course is an introduction to the appropriate use of computers for agriculture business. The course is designed for the beginning computer user and it starts with the basics. Topics include word processing, spreadsheets, data base, and commercial farming programs. (CSU)

AGBUS 46  Agricultural Marketing  Units 3
Prerequisites: None.
Limitation on Enrollment: None.
Advisories: None.
This course is designed for the study of agriculture marketing problems, policies, trends, marketing functions, and channels through state and federal regulatory agencies. Detailed studies of the marketing of selected agricultural commodities are made. (CSU)

AGBUS 50H  Special Studies: Agriculture Business  Units 1-2
Prerequisites: Reading level II or concurrent enrollment in reading; completion of survey course with a grade of “B” or better and presentation of a project acceptable to the instructor and division chairperson.
Limitation on Enrollment: None.
Advisories: None.
This course is open to students qualified to do advanced work in the field. The course may include research, directed reading, field work, or other advanced study and the course may be repeated for a maximum of four units. (CSU)

AGBUS 69V  Internship: Agricultural Business  Units 1-8
Prerequisites: None.
Limitation on Enrollment: The student must enroll in a course that is directly related to the agricultural business internship. The student must enroll in a minimum of 7 units during the semester including internship units. For summer session, the student must enroll in one related course in addition to internship. The combined total number of units a student may take in internship, work experience, and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of internship program objectives and an employer internship agreement.
Advisories: GUID 30, 31, 32, 33.
This course is designed for students participating in an occupational internship in agricultural business. Application of discipline-related skills and knowledge of Secretaries Commission on Achieving Necessary Skills (SCANS) competencies is emphasized. Each student is engaged in a specific research project or on-the-job learning activities under the supervision of a worksite supervisor and a college internship instructor. (CSU)
AGBUS 75 Selected Topics: Agriculture Units 1-2
Prerequisites: None; exempt from assessment testing.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer instruction in one of the specialized areas of agriculture not already covered by the existing curricula.

AGBUS 96V Work Experience: Agricultural Business Units 1-8
Prerequisites: None.
Limitations on Enrollment: The student must enroll in a course that is directly related to the agricultural business work experience. The student must enroll in one related course in addition to work experience. The combined total number of units a student may take in internship, work experience, and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of work experience program objectives and an employer work experience agreement.
Advisories: GUID 30, 31, 32, 33.
This course is designed for students employed in agricultural business. The course objectives are developed by the students in consultation with their supervisor. Students are engaged in a specific research project or on-the-job learning activities under the supervision of a worksite supervisor and a college work experience instructor. To register, complete an application form available at the Applied Science and Technology Division office, Holt 140.

AGRICULTURE ENGINEERING

AGEGR 21 Agricultural Welding Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to cover the techniques of operating electric arc welders and oxyacetylene torches for fusion welding, heating, brazing, and cutting. Hard surfacing metals used in construction and repair of agriculture equipment are also covered. Metal Inert Gas (MIG) and Tungsten Inert Gas (TIG) welding are emphasized. (CSU)

AGEGR 30A Introduction to Compact Engines Units 5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce students to the basic theory, maintenance, construction, and repair of two-stroke and four-stroke commercial, recreational, marine, motorcycle, and lawn and garden engines and their applications. (CSU)

AGEGR 30B Beginning Compact Engines Units 5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to prepare students to analyze, troubleshoot, repair, and overhaul both two-stroke and four-stroke engines and the equipment powered by the engines. (CSU)

AGEGR 30C Intermediate Compact Engines Units 5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to instruct student to analyze electrical problems found in compact engine equipment and to service and repair the powertrain. (CSU)

AGEGR 30D Advanced Compact Engines Units 5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to instruct students in specialized applications, drive trains, clutches, transmissions, electrical systems, and compact diesel systems. Students write work orders, develop parts lists, and work with customers. (CSU)

AGEGR 33 Equipment Maintenance and Operation Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the safe operation and use of the following equipment: wheel tractors, crawlers, skid steer loaders, front-end loaders, backhoes, and forklifts. Preventative maintenance, adjustments, minor repairs, and servicing of the above are emphasized. (CSU)

AGEGR 50H Special Studies: Agriculture Engineering Units 1-2
Prerequisites: Reading level II or concurrent enrollment in reading; completion of survey course with grade of “B” or better and presentation of a project acceptable to the instructor and division chairperson.
Limitations on Enrollment: None.
Advisories: None.
This course is open to students qualified for advanced work in the field. The course may include research, directed reading, field work, or other advanced study and the course may be repeated for a maximum of four units. (CSU)

AGEGR 64 Basic Engines Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the theory of 2-stroke and 4-stroke engines, oils, lubrication, safety inspections, and related mathematics and measurement. (CSU)
AGEGR 69V Internship: Units 1-8
Agricultural Engineering
Prerequisites: None.
Limitations on Enrollment: The student must enroll in a course that is directly related to the agricultural engineering internship. The student must enroll in a minimum of 7 units during the semester including internship units. For summer session, the student must enroll in one related course in addition to internship. The combined total number of units a student may take in internship, work experience, and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of internship program objectives and an employer internship agreement.
Advisories: GUID 30, 31, 32, 33.
This course is designed for students participating in an occupational internship in agricultural engineering. Application of discipline-related skills and knowledge of Secretaries Commission on Achieving Necessary Skills (SCANS) competencies is emphasized. Each student is engaged in a specific research project or on-the-job learning activities under the supervision of a worksite supervisor and a college internship instructor. (CSU)

AGEGR 75 Selected Topics: Units 1-2
Agricultural Engineering
Prerequisites: None; exempt from assessment testing.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer instruction in one of the specialized areas of agricultural engineering not already covered by the existing curricula.

AGEGR 87A Compact Engines Specialization Units 3
Prerequisites: AGEGR 30D.
Limitation on Enrollment: This course requires instructor approval to enroll.
Advisories: None.
This course is designed for advanced students in compact engines. Students complete an advanced specialized project developed in consultation with the instructor.

AGEGR 96V Work Experience: Units 1-8
Agricultural Engineering
Prerequisites: None.
Limitation on Enrollment: The student must enroll in a course that is directly related to the agricultural engineering work experience. The student must enroll in a minimum of 7 units during the semester including work experience units. For summer session, the students must enroll in one related course in addition to work experience. The combined total number of units a student may take in internship, work experience, and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of work experience program objectives and an employer work experience agreement.
Advisories: GUID 30, 31, 32, 33.
This course is designed for students employed in agricultural engineering. The course objectives are developed by the students in consultation with their supervisor. Students are engaged in a specific research project or on-the-job learning activities under the supervision of a worksite supervisor and a college work experience instructor. To register, complete an application form available at the Applied Science and Technology Division office, Holt 140.

ANAT 1 Human Anatomy Units 4
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is a study of the structural relationships of the parts of the human body and also includes some work with cadavers. It is of interest to biological science, pre-medical, pre-dental, and health education majors, and for laboratory technicians. The laboratory includes work with the use of cadavers, preserved animals, and numerous anatomical models. (UC, CSU, CAN BIOL 10)

ANAT 2 Anatomy and Physiology Units 6
Prerequisites: CHEM 3A with a grade of “C” or better; CHEM 3B strongly recommended.
Limitations on Enrollment: None.
Advisories: None.
This course is a study of the anatomical and physiological relationship of the parts of the human body. Anatomy & Physiology is of interest to students enrolled in, or planning to enroll in, the ADN (Associate Degree Nursing) and the LVN (Licensed Vocational Nurse) programs. (UC, CSU)

AH SC 10 Principles of Animal Science Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide an overview of the principles of animal science and the interrelationships of domestic animals and mankind. The course investigates various disciplines including anatomy and physiology, reproduction, nutrition, animal health, animal products, animal behavior, and genetics. (UC, CSU, CAN AG 6)

AH SC 10L Principles of Animal Science Laboratory Units 1
Prerequisites: Reading level II or concurrent enrollment in reading; AH SC 10, or concurrent enrollment in AH SC 10.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide an introduction to the empirical methods including data collection and analysis as well as an investigation of the basic management concepts associated with animal science. (CSU)

AH SC 11A Introduction to Livestock Evaluation Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce students to the basic factors involved in evaluation and selection of breeding, feeder and market animals, and the application of these factors in the livestock industry. The visual appraisal of live animals and carcasses combined with production records are used to determine the practical usefulness and productivity of livestock. (CSU)
AH SC 11B Beginning Livestock Evaluation  Units 2
Prerequisites: AH SC 11A with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce students to the basic factors involved in evaluation and selection of breeding, feeder and market animals, and the application of these factors in the livestock industry. The visual appraisal of live animals and carcasses combined with production records are used to determine the practical usefulness and productivity of livestock. (CSU)

AH SC 11C Intermediate Livestock Evaluation  Units 2
Prerequisites: AH SC 11B with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce students to the basic factors involved in evaluation and selection of breeding, feeder and market animals and the application of these factors in the livestock industry. The visual appraisal of live animals and carcasses, combined with production records, will be used to determine the practical usefulness and productivity of livestock. (CSU)

AH SC 11D Advanced Livestock Evaluation  Units 2
Prerequisites: Reading level II or concurrent enrollment in reading; AH SC 11C with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce students to the basic factors involved in evaluation and selection of breeding, feeder and market animals, and the application of these factors in the livestock industry. The visual appraisal of live animals and carcasses combined with production records are used to determine the practical usefulness and productivity of livestock. (CSU)

AH SC 21 Livestock Production  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course introduces students to the beef, sheep, and swine industry in California and in the United States. The breed, market classes, grades, and selection of marketing and breeding animals are stressed. The feeding, care, management, and marketing of the different segments of the industry are discussed. (CSU)

AH SC 25A Introduction to Livestock Presentation  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to prepare students to apply animal husbandry practices and procedures that are involved with domestic farm animals. The use of equipment and facilities, handling of animals, and preparation of a budget and calendar of operations are discussed. The planning and purchase of feeder animals are covered. (CSU)

AH SC 25B Beginning Livestock Presentation  Units 2
Prerequisites: AH SC 25A with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to prepare students to apply animal husbandry practices and procedures that are involved with domestic farm animals. The use of equipment and facilities, handling of animals, and preparation of a budget and calendar of operation are discussed. The planning and purchase of feeder animals are covered. (CSU)

AH SC 25C Intermediate Livestock Presentation  Units 2
Prerequisites: AH SC 25B with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to prepare students to apply animal husbandry practices and procedures that are involved with domestic farm animals. The use of equipment and facilities, handling of animals, and preparation of a budget and calendar of operation are discussed. The planning and purchase of feeder animals are covered. (CSU)

AH SC 25D Advanced Livestock Presentation  Units 2
Prerequisites: Reading level II or concurrent enrollment in reading; AH SC 25C with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to prepare students to apply animal husbandry practices and procedures that are involved with domestic farm animals. The use of equipment and facilities, handling of animals, and preparation of a budget and calendar of operation are discussed. The planning and purchase of feeder animals are covered. (CSU)

AH SC 32 Stallion and Brood Mare Management  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is a detailed study of conformation, reproduction, breeding, farm management, nutrition, and conditioning. (CSU)

AH SC 34 Animal Health and Sanitation  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an emphasis on elementary anatomy and physiology of livestock which includes preventive measures for common diseases and parasites, immunization, sanitation, and management. Common diseases and parasites regarding symptoms, causes, prevention, and physical treatment are also emphasized. (UC, CSU)

AH SC 36 Livestock Breeding  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce students to the anatomy and physiology of farm animal reproduction and to the basic principles of genetics and their application to livestock production. Gestation, parturition, lactation, artificial insemination, embryo transfer, inheritance, breeding systems, production testing, and breeding selection are covered. (CSU)
This course is designed for students employed in the area of animal husbandry not already covered by existing curricula. Application of discipline-related skills and knowledge of Secretaries Commission on Achieving Necessary Skills (SCANS) competencies is emphasized. Each student is engaged in a specific research project or on-the-job learning activities under the supervision of a worksite supervisor and a college internship instructor. (CSU)

**AH SC 75** Selected Topics: Animal Husbandry Sciences  
*Units 1-2*

**Prerequisites:** None.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  
This course is designed to offer instruction in one of the specialized areas of animal husbandry not already covered by existing curriculum.

**AH SC 96V** Work Experience: Animal Husbandry Science  
*Units 1-8*

**Prerequisites:** None.  
**Limitation on Enrollment:** The student must enroll in a course that is directly related to the animal science internship. The student must enroll in a minimum of 7 units during the semester including internship units. For summer session, the student must enroll in one related course in addition to internship. The combined total number of units a student may take in internship, work experience, and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of internship program objectives and an employer internship agreement.  
**Advisories:** GUID 30, 31, 32, 33.  
This course is designed for students participating in an occupational internship in animal science. Application of discipline-related skills and knowledge of Secretaries Commission on Achieving Necessary Skills (SCANS) competencies is emphasized. Each student is engaged in a specific research project or on-the-job learning activities under the supervision of a worksite supervisor and a college internship instructor. (CSU)

**ANTHR 1** Cultural Anthropology  
*Units 3*

**Prerequisites:** None.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  
This course, a survey of various contemporary cultures, seeks to promote an awareness of cross-cultural uniformity and diversity. The basic concepts in cultural anthropology such as kinship, economic, political systems, and symbolic organization including religion, ritual, and folklore are discussed along with issues of social inequality and culture change. (UC, CSU, CAN ANTH 4)

**ANTHR 2** Physical Anthropology  
*Units 3*

**Prerequisites:** None.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  
This course is designed as a laboratory course which supplements ANTHR 2. Students become familiar with the process used in identifying and analyzing human skeletal remains, the physical evidence used in the study of primate evolution including fossilization, geologic time scale and archaeological reconstruction of prehistoric activities, comparative osteology of non-human primates, primate behavior, paleoanthropology, and the development of stone tool technologies. (UC, CSU)

**ANTHR 2L** Physical Anthropology Laboratory  
*Units 1*

**Prerequisites:** Completion of or concurrent enrollment in ANTHR 2.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  
This course is designed as a laboratory course which supplements Anthropology 2. Students become familiar with the process used in identifying and analyzing human skeletal remains, the physical evidence used in the study of primate evolution including fossilization, geologic time scale and archaeological reconstruction of prehistoric activities, comparative osteology of non-human primates, primate behavior, paleoanthropology, and the development of stone tool technologies. (UC, CSU)

**ANTHR 4** Introduction to Linguistics  
*Units 3*

**Prerequisites:** None.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  
This course is an introduction to the study of language in theory and practice. Students explore what is known about human language, its uniqueness, its structure, its use, its diversity, and its universality. An effort is made to analyze the relationship between language, culture, and social levels. (UC, CSU)

**ANTHR 6** Introduction to North American Indians  
*Units 3*

**Prerequisites:** None.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  
This course is a comparative study of selected native American Indians and cultures from the Arctic to Panama, utilizing ethnographic and archaeological materials. (UC, CSU)
ANTHR 10  Introduction to Archaeology          Units 3
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is a survey of the development of archaeology as an anthropological study, with particular emphasis on the contributions of archaeology to the understanding of the development of human culture. The objectives, methods, and techniques of modern archaeology are combined with a survey of major archaeological sites and cultures. (UC, CSU, CAN ANTH 6)

ANTHR 12A  Beginning Field Archaeology       Units 1
Prerequisites: Reading level II; completion of, or concurrent enrollment in, ANTHR 10.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is a beginning applied archaeology course which offers students opportunity to do field and/or laboratory research. The field work includes site survey and excavation. The laboratory work emphasizes treatment, classification, and initial analysis of artifacts and data recovered through excavations. (UC, CSU)

ANTHR 12B  Intermediate Field Archaeology     Units 1
Prerequisites: Reading level II; completion of, or concurrent enrollment in ANTHR 10.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is an intermediate applied archaeology course which offers students opportunity to do field and/or laboratory research. The field work includes site survey and excavation. The laboratory work emphasizes treatment, classification, and analysis of artifacts and data recovered through field excavations. (UC, CSU)

ANTHR 15  Selected Topics: Anthropology      Units 1-2
Prerequisites: Reading level II.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to offer instruction in one of the specialized areas of anthropology not already covered by the existing curricula. (UC, CSU)

ANTHR 50H  Special Studies: Anthropology     Units 1-2
Prerequisites: Reading level II; completion of survey course with grade of “B” or better and presentation of a project acceptable to the instructor and division chairperson.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is open to students qualified to do advanced work in the field. The course may include research, directed reading, field work, or other advanced study, and the course may be repeated for a maximum of four units. (UC, CSU)

ARCHITECTURAL DRAFTING

ARCH 1  Basic Architectural Drafting          Units 3
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is an introduction to the study of the basic principles of architectural drafting techniques and conformance to professional standards of design and appearance. Compliance codes and regulations, as they apply to the industry, are also included. (CSU)
### ARCH 2 Architectural Practice: Working Drawings

**Units:** 6  
**Prerequisites:** ARCH 1 and ARCH 12; or ARCH 1 and E TECH 12; all with a grade of “C” or better.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  

This course is the study of building methods, processes, and the production of construction documentation as a communication medium. Design elements, building codes, structural components, and assembly procedures are emphasized. Students design a residence and produce a set of architectural working drawings. (CSU)

### ARCH 2A Architectural Practice: Design

**Units:** 5  
**Prerequisites:** ARCH 1 and ARCH 58A; or ARCH 1 and ENGR 58A; all with a grade of “C” or better.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  

This course is an introduction to building methods and processes and the construction documentation used as a communication medium. The basic elements of design and codes as they apply to residential architectural structures are emphasized. Computer aided drafting is utilized to complete the construction documentation. (CSU)

### ARCH 2B Architectural Practice: Structure

**Units:** 5  
**Prerequisites:** ARCH 1 and ARCH 58A; or ARCH 1 and ENGR 58A; all with a grade of “C” or better.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  

This course is a continuation of the study of building methods and processes and the construction documentation used as a communication medium. Analysis of basic structural components and codes as they apply to residential architectural structures is emphasized. Computer aided drafting is utilized to complete the construction documentation. (CSU)

### ARCH 3 Architectural Presentations

**Units:** 3  
**Prerequisites:** ARCH 1 or equivalent; with a grade of “C” or better.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  

This course is an introduction to various methods and approaches to architectural presentation, including model building, perspective development, and rendering. The course is oriented to the artistic presentation of architectural structures and includes work with color, black and white, and ink, utilizing various printing techniques commonly found in architectural offices. (CSU)

### ARCH 5 Architectural Detailing

**Units:** 3  
**Prerequisites:** ARCH 1 and ARCH 12; or ARCH 1 and E TECH 12; all with a grade of “C” or better.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  

This course is an introduction to drafting of construction details as they apply to various architectural structures. Building codes and regulations pertinent to the various details are emphasized. Computer-aided drafting is utilized to complete the construction documentation. (CSU)

### ARCH 8 Materials of Construction

**Units:** 3  
**Prerequisites:** None.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  

This course is designed to instruct students in the use and application of processes and materials as they relate to general construction. (CSU)

### ARCH 9 Design Fundamentals

**Units:** 3  
**Prerequisites:** ARCH 1 or concurrent enrollment in ARCH 1.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  

This course is an introduction to the basic principles and theories of architectural design through discussion and simple or semi-abstract exercises. Students study and explore these topics as a means of establishing a design vocabulary. Studies also encompass development of sketching, presentation, and communication skills. (CSU)

### ARCH 12 Computer Aided Drafting Projects

**Units:** 3  
**Prerequisites:** E TECH 3 or ARCH 1, with a grade of “C” or better, or concurrent enrollment in ARCH 1.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  

This course is designed to utilize Computer Aided Drafting (CAD) software on microcomputer CAD systems to produce a variety of drawings. Students learn the function and operation of typical CAD system components. Some of the coursework allows students to work in field of individualized interest. (CSU)

### ARCH 58A Computer Aided Drafting

**Units:** 3  
**Prerequisites:** ENGR 58A or ARCH 58A with a grade of “C” or better or equivalent.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  

This course is designed to introduce students to Computer Aided Drafting (CAD). Students will utilize AutoCAD software on microcomputer CAD systems to produce a variety of drawings. Students learn the function and operation of typical CAD system components. Some of the coursework will allow the students to work in their field of interest. (CSU)

### ARCH 58B AutoCAD Customization

**Units:** 2  
**Prerequisites:** ENGR 58A or ARCH 58A with a grade of “C” or better or equivalent.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  

This course is a continuation of applications and customization of AutoCAD software. Topics covered include blocks and attributes, script files, shape files, tablet menu modification, screen menu modification, three dimensional modeling, and use of AutoLISP programming language. (CSU)

### ARCH 58C Computer Aided Drafting Projects

**Units:** 1  
**Prerequisites:** ARCH 58A or ENGR 58A with a grade of “C” or better or equivalent.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  

This course is designed to allow students to apply AutoCAD to their area of specialization. Students select individual projects applicable to their discipline. The instructor provides individualized instruction as necessary. (CSU)

### ARCH 58D AutoCAD Three Dimensional Modeling

**Units:** 2  
**Prerequisites:** Reading level II or concurrent enrollment in reading: ENGR 58A, or ARCH 58A, with a grade of “C” or better, or equivalent.  
**Limitations on Enrollment:** None.  
**Advisories:** None.  

This course is designed to address construction of three dimensional models using AutoCAD software. Topics covered include wireframe, surface, and solids modeling. (CSU)
ARCH 58E  AutoLISP Programming  Units 2
Prerequisites: ENGR 58A, or ARCH 58A, with a grade of “C” or better, or equivalent.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to programming using AutoLISP, AutoCAD application customization language. Topics covered include programs using simple sequence, branching, and looping structures. AutoLISP is also used to access and change the drawing database. A previous course involving computer logic or programming is recommended. (CSU)

ARCH 73  Blueprint Reading  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to prepare students for occupations requiring the ability to read and understand working drawings related to architectural structures. Residential and commercial blueprints and specifications are emphasized.

ARCH 87A  Architectural Drafting  Specialization  Units 2
Prerequisites: ARCH 2.
Limitation on Enrollment: This course requires instructor approval to enroll.
Advisories: None.
This course is designed for advanced students in architectural drafting. Students complete an advanced specialized project developed in consultation with the instructor.

ART

ART 1A  Art History  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is a survey of history of the visual arts of Europe from Prehistoric times to the Renaissance. (UC,CSU, CAN ART SEQ A with both ART 1A and ART 1B)

ART 1B  Art History  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is a survey of the history of architecture, painting, and sculpture of Europe from the Renaissance to the present. The influence of European art on modern art is discussed. (UC,CSU, CAN ART SEQ A with both ART 1A and ART 1B)

ART 2  Art History  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is a survey of the arts of primitive societies, and the arts of Africa, Oceania, Pre-Colombian America, India, China, and Japan. Art 1 is not a prerequisite for Art 2. (UC,CSU)

ART 3  Introduction to Art  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the basic concepts which are needed for the appreciation of the visual arts. This course is designed for the non-art major. Lectures are illustrated using audio-visual aids. (UC,CSU)

ART 4  Exploring Art  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an appreciation course for non-art majors. It provides fundamental concepts, background, and experiences in visual expression. Line, color, texture, form, and volume are examined by a variety of two and three dimensional means. (UC,CSU)

ART 5  Selected Topics: Art  Units 1-2
Prerequisites: Reading level II or concurrent enrollment in reading.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer instruction in one of the specialized areas of art not already covered by existing curricula. (UC,CSU)

ART 6  Color and Design  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is a beginning experience in dealing with the principles of design as the basis for all art activity. It is an exploration of the art elements as they relate to creative expression using a variety of two and three dimensional media. (UC,CSU)

ART 7A  Beginning Painting  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is a study and rendering of painted forms for effective communications. The course concentrates on the analysis and understanding of traditional painting styles and their modern variations. Techniques of painting are practiced with attention to a wide range of usage. (UC,CSU,CAN ART 10)

ART 7B  Intermediate Painting  Units 3
Prerequisites: Reading level II or concurrent enrollment in reading; ART 7A or equivalent.
Limitations on Enrollment: None.
Advisories: None.
This course is a study and rendering of painted forms for effective communications. The course emphasizes refinement and application of painting techniques for the solution of more complex design problems. (UC,CSU)

ART 7C  Advanced Painting  Units 3
Prerequisites: Reading level II or concurrent enrollment in reading; ART 7B or equivalent.
Limitations on Enrollment: None.
Advisories: None.
This course is a study and rendering of painted forms for effective communications. This course is a study and rendering of painted forms for effective communications. The course emphasizes the development of individual style and its application to solving specialized assignment related to professional goals. (UC,CSU)
ART 16  Descriptive Drawing and Rendering  Units 3  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is an introduction to pictorial drawings and rendering fundamentals. The course is applicable to industrial, interior, architectural, and landscape design. (UC, CSU).

ART 20A  Introductory Sculpture  Units 3  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is a study of sculpture techniques for the solution of more complex design problems.  (UC, CSU)

ART 20B  Beginning Sculpture  Units 3  
Prerequisites: ART 20A.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is a study and use of material and form for effective communications. The course emphasizes refinement and application of sculpture techniques for the solution of more complex design problems. (UC, CSU)

ART 20C  Intermediate Sculpture  Units 3  
Prerequisites: ART 20B.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is a study and use of material and form for effective communications. The course emphasizes the development of individual style and its application to solving specialized assignments related to professional goals. (UC, CSU)

ART 20D  Advanced Sculpture  Units 3  
Prerequisites: Reading level II or concurrent enrollment in reading: ART 20C.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is a study and use of material and form for effective communications. The course emphasizes refinement and application of sculpture techniques for the solution of more complex design problems. (UC, CSU)

ART 33A  Beginning Drawing  Units 3  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is a study of problem solving for effective communications. The course concentrates on the analysis and understanding of traditional drawing styles and their modern variations. Techniques of drawing are practiced with attention to a wide range of usage. (UC, CSU, CAN ART 8)

ART 33B  Intermediate Drawing  Units 3  
Prerequisites: ART 33A.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is a study of problem solving for effective communications. The course concentrates on the analysis and understanding of pertinent drawing styles and their functional variations. Techniques of drawing are practiced with attention to a wide range of usage. (UC, CSU)

ART 33C  Figure Drawing  Units 3  
Prerequisites: ART 33B.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is a study of the human figure. The course concentrates on the analysis and understanding of traditional figure drawing styles and their modern variations. Techniques of awareness of form structure and the human figure are practiced with attention to expressive possibilities. (UC, CSU, CAN ART 24)

ART 36A  Beginning Painting  Units 1.5  
Prerequisites: ART 7A.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is a study and rendering of painted forms for effective communications. The course emphasizes refinement and application of painting techniques for the solution of more complex design problems. ART 36A-B is the equivalent of ART 7A. (UC, CSU)

ART 36B  Intermediate Painting  Units 1.5  
Prerequisites: ART 36B.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is a study and rendering of painted forms for effective communications. The course emphasizes the development of individual style and its application to solving specialized assignments related to professional goals. ART 36A-B is the equivalent of ART 7B. (UC, CSU)

ART 36C  Intermediate Painting  Units 1.5  
Prerequisites: Reading level II or concurrent enrollment in reading: ART 36C.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is a study and rendering of painted forms for effective communications. The course emphasizes the development of individual style and its application to solving specialized assignments related to professional goals. ART 36C-D is the equivalent of ART 7B. (UC, CSU)

ART 36D  Advanced Painting  Units 1.5  
Prerequisites: Reading level II or concurrent enrollment in reading: ART 36C.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is a study and rendering of painted forms for effective communications. The course emphasizes the development of individual style and its application to solving specialized assignment related to professional goals. ART 36C-D is the equivalent of ART 7B. (UC, CSU)

</tbody>
</table>
ART 64B  Beginning Ceramics  Units 3  
Prerequisites: ART 64A.
Limitations on Enrollment: None.  
Advisories: None.
This course is a study and use of clay forms for effective communications. The course emphasizes refinement and application of ceramic techniques for the solution of more complex design problems. (UC, CSU)

ART 65A  Intermediate Ceramics  Units 3  
Prerequisites: Reading level II or concurrent enrollment in reading: ART 64B.
Limitations on Enrollment: None.  
Advisories: None.
This course is a study and rendering of ceramic forms for effective communications. The course emphasizes the development of individual style and its application to solving specialized assignments related to professional goals. (UC, CSU)

ART 65B  Advanced Ceramics  Units 3  
Prerequisites: Reading level II or concurrent enrollment in reading: ART 65A.
Limitations on Enrollment: None.  
Advisories: None.
This course is a study and rendering of ceramic forms for effective communications. The course emphasizes the development of individual style and its application to solving specialized assignments related to professional goals. Class projects are stressed. (UC, CSU)

ART 80  Selected Topics: Art  Units 1-2  
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer instruction in one of the specialized areas of art not already covered by existing curricula.

ASTRONOMY

ASTRO 1  Introductory Astronomy  Units 3  
Prerequisites: MATH 80 with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is a non-mathematical, descriptive course in general astronomy dealing with the nature and evolution of solar systems, stars, galaxies, and the universe; the planets, moon, meteors, comets, and other members of our solar system are included. The college planetarium is used for constellation, planet, and galaxy identification as well as demonstrating space and time coordinates. (UC, CSU)

ASTRO 1L  Astronomy Laboratory  Units 1  
Prerequisites: Completion of or concurrent enrollment in ASTRO 1, 2, or 4.
Limitations on Enrollment: None.  
Advisories: None.
This course comprises laboratory work performing quantitative experiments of physical phenomena relating to astronomy. The experiments include working in the planetarium with the telescope. (UC, CSU)

ATHLETICS

ATH 50  Soccer Team: Men  Units 2  
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is part of the intercollegiate athletic program of Delta College. Delta College participates in the Bay Valley Conference. (UC, CSU)

ATH 51  Water Polo Team: Men  Units 2  
Prerequisites: None.
Limitations on Enrollment: None.  
Advisories: None.
This course is part of the intercollegiate athletic program of Delta College. Delta College participates in the Bay Valley Conference. (UC, CSU)

ATH 52  Football Team: Men  Units 2  
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is part of the intercollegiate athletic program of Delta College. Delta College participates in the Northern California Football Conference. (UC, CSU)

ATH 53  Cross Country Team: Men  Units 2  
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is part of the intercollegiate athletic program of Delta College. Delta College participates in the Bay Valley Conference. (UC, CSU)

ATH 54  Baseball Team: Men  Units 2  
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is part of the intercollegiate athletic program of Delta College. Delta College participates in the Bay Valley Conference. (UC, CSU)

ATH 55  Golf Team: Men  Units 2  
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is part of the intercollegiate athletic program of Delta College. Delta College participates in the Bay Valley Conference. (UC, CSU)
ATH 56  Basketball Team: Men  Units 1
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is part of the intercollegiate athletic program of Delta College. Delta College participates in the Bay Valley Conference. (UC, CSU)

ATH 57  Track Team: Men  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is part of the intercollegiate athletic program of Delta College. Delta College participates in the Bay Valley Conference. (UC, CSU)

ATH 58  Wrestling Team: Men  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is part of the intercollegiate athletic program of Delta College. Delta College participates in the Bay Valley Conference. (UC, CSU)

ATH 59  Tennis Team: Men  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is part of the intercollegiate athletic program of Delta College. Delta College participates in the Bay Valley Conference. (UC, CSU)

ATH 60  Swimming and Diving Team: Men  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is part of the intercollegiate athletic program of Delta College. Delta College participates in the Bay Valley Conference. (UC, CSU)

ATH 61  Soccer Team: Women  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is part of the intercollegiate athletic program of Delta College. Delta College participates in the Bay Valley Conference. (UC, CSU)

ATH 62  Volleyball Team: Women  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is part of the intercollegiate athletic program of Delta College. Delta College participates in the Bay Valley Conference. (UC, CSU)

ATH 63  Swimming and Diving Team: Women  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is part of the intercollegiate athletic program of Delta College. Delta College participates in the Bay Valley Conference. (UC, CSU)

ATH 64  Basketball Team: Women  Units 1
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is part of the intercollegiate athletic program of Delta College. Delta College participates in the Bay Valley Conference. (UC, CSU)

ATH 65  Softball Team: Women  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is part of the intercollegiate athletic program of Delta College. Delta College participates in the Bay Valley Conference. (UC, CSU)

ATH 66  Tennis Team: Women  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is part of the intercollegiate athletic program of Delta College. Delta College participates in the Bay Valley Conference. (UC, CSU)

ATH 68  Track Team: Women  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is part of the intercollegiate athletic program of Delta College. Delta College participates in the Bay Valley Conference. (UC, CSU)

ATH 69  Cross Country Team Women  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is part of the intercollegiate athletic program of Delta College. Delta College participates in the Bay Valley Conference. (UC, CSU)

AUTO 1  Introduction to Technical Programs  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is of interest to all students considering career possibilities in trade and industrial technology. The instructor, master technicians, and educators present a series of lectures and laboratories to help students develop career goals. This course includes an introduction to automotive technology, construction technology, diesel technology, electrical technology, electronic technology, and industrial technology. (CSU)
### AUTO 50 Automatic Transmissions and Transaxes
- **Units:** 5
- **Prerequisites:** Reading level II or concurrent enrollment in reading; AUTO 62 or concurrent enrollment; or AUTO 50, or AUTO 52, or AUTO 53, or AUTO 54, or AUTO 55.
- **Limitations on Enrollment:** None.
- **Advisories:** None.

This course is designed to prepare students to enter the automotive industry. The course is organized to give technical information and practical skill in automotive automatic transmissions and transaxes on foreign and domestic autos. Students with two years of high school auto or two years of auto related experience are allowed to enroll. (CSU)

### AUTO 51 Manual Drive Train and Axles
- **Units:** 5
- **Prerequisites:** Reading level II or concurrent enrollment in reading; AUTO 62 or concurrent enrollment; or AUTO 50, or AUTO 52, or AUTO 53, AUTO 54, AUTO 55.
- **Limitations on Enrollment:** None.
- **Advisories:** None.

This course is designed to give students the technical information and practical skills in automotive front-wheel drives, differentials, standard transmissions and transaxes, clutches, drivelines, and 4 wheel drives to enter the job market. Students train on mock-up units and live automobiles. Complete repair is provided in all areas. Student with two years of high school auto or two years of auto related experience are allowed to enroll. (CSU)

### AUTO 52 Engine Rebuilding
- **Units:** 7
- **Prerequisites:** Reading level II or concurrent enrollment in reading; AUTO 64 or concurrent enrollment; or AUTO 50, or AUTO 51, or AUTO 53, or AUTO 54, or AUTO 55.
- **Limitations on Enrollment:** None.
- **Advisories:** None.

This course is designed to prepare students to enter the automotive industry. This course is organized to give advanced technical information covering complete engine rebuilding. Precision measurement and machining operations are stressed in theory and on laboratory engines. Students with two years of high school auto or two years auto related experience are allowed to enroll. (CSU)

### AUTO 53 Brakes, Suspension and Steering
- **Units:** 7
- **Prerequisites:** Reading level II or concurrent enrollment in reading; AUTO 62 or concurrent enrollment; or AUTO 50, AUTO 51, or AUTO 52, or AUTO 54, or AUTO 55.
- **Limitations on Enrollment:** None.
- **Advisories:** None.

This course is designed to give technical information and practical skills in automotive wheel alignment, suspension overhaul, steering mechanisms, and brake overhaul. Students train on mock-up units and live automobiles. Complete repair will be provided in all areas. Students with two years of high school auto or two years auto related experience are allowed to enroll. (CSU)

### AUTO 54 Starting and Charging Systems
- **Units:** 5
- **Prerequisites:** Reading level II or concurrent enrollment in reading; AUTO 63 or concurrent enrollment; or AUTO 50, or AUTO 51, or AUTO 52, or AUTO 53, or AUTO 55, or AUTO 56, or AUTO 57, or DIESEL 41, or DIESEL 42, or DIESEL 43, or DIESEL 44, or DIESEL 45, or DIESEL 46.
- **Limitations on Enrollment:** None.
- **Advisories:** None.

This course is designed to give the theory and practical training in starting systems, charging systems, batteries, and electrical circuits in domestic and foreign automobiles. (CSU)

### AUTO 55 Tune-up and Engine Performance
- **Units:** 7
- **Prerequisites:** Reading level II or concurrent enrollment in reading; AUTO 63 or concurrent enrollment; or AUTO 50, or AUTO 51, or AUTO 52, or AUTO 53, or AUTO 54, or AUTO 56, or AUTO 57.
- **Limitations on Enrollment:** None.
- **Advisories:** None.

This course is designed to give students training in ignition systems, engine performance, and driveability problems. Domestic and foreign systems are covered using mock-ups and live automobiles. Students enrolling this course are encouraged to have previous automotive experience. Students completing AUTO 55 and AUTO 56 are eligible to apply for the State clean air car course certificate. (CSU)

### AUTO 56 Fuel Management and Computer Control
- **Units:** 7
- **Prerequisites:** Reading level II or concurrent enrollment in reading; AUTO 63 or concurrent enrollment; or AUTO 50, or AUTO 51, or AUTO 52 or AUTO 53, or AUTO 54, or AUTO 55, or AUTO 57.
- **Limitations on Enrollment:** None.
- **Advisories:** None.

This course is designed to give technical training in theory and practical training in all types of fuel management systems and engine computer control. Students trouble-shoot and diagnose carburation systems, fuel injection systems, and engine computer systems. Domestic and foreign systems are covered. Students with two years high school auto or two years related experience are allowed to enroll. (CSU)

### AUTO 57 Air Conditioning, Heating
- **Units:** 5
- **Prerequisites:** None.
- **Limitations on Enrollment:** None.
- **Advisories:** None.

This course is designed to give students training in air conditioning and heating systems on mock-up and live automobiles. Domestic and foreign systems are covered. This course also covers advanced electrical support systems of the automobile. Students enrolling in this course are encouraged to have previous automotive experience. (CSU)

### AUTO 62 Brake, Suspension, and Power Train Systems
- **Units:** 3
- **Prerequisites:** None.
- **Limitations on Enrollment:** None.
- **Advisories:** None.

This course is designed for students interested in entering the automotive field. The course is designed to give technical information and practical skills in brake, suspension, and power train systems. (CSU)

### AUTO 63 Fuel and Electrical Systems
- **Units:** 3
- **Prerequisites:** None.
- **Limitations on Enrollment:** None.
- **Advisories:** None.

This course is designed for students interested in entering the automotive electrical and engine performance field. This theory and laboratory course provides hands-on experience and information relevant to basic electrical systems, ignition systems, fuel management systems in the automotive and truck fields. (CSU)
AUTO 64 Basic Engines Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the theory of two-stroke and four-stroke engines, oils, lubrication, safety inspections, and related mathematics and measurement. (CSU)

AUTO 69V Internship: Auto Mechanics Units 1-8
Prerequisites: None.
Limitations on Enrollment: The student must enroll in a course that is directly related to the auto mechanics internship. The student must enroll in a minimum of 7 units during the semester including internship units. For summer session, the student must enroll in one related course in addition to internship. The combined total number of units a student may take in internship, work experience, and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of internship program objectives and an employer internship agreement.
Advisories: GUID 30, 31, 32, 33.
This course is designed for students participating in an occupational internship in auto mechanics. Application of discipline-related skills and knowledge of Secretaries Commission on Achieving Necessary Skills (SCANS) competencies is emphasized. Each student is engaged in a specific research project or on-the-job learning activities under the supervision of a worksite supervisor and a college internship instructor. (CSU)

AUTO 69W Internship: Auto Body Technology Units 1-8
Prerequisites: None.
Limitations on Enrollment: The student must enroll in a course that is directly related to the auto body technology internship. The student must enroll in a minimum of 7 units during the semester including internship units. For summer session, the student must enroll in one related course in addition to internship. The combined total number of units a student may take in internship, work experience, and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of internship program objectives and an employer internship agreement.
Advisories: GUID 30, 31, 32, 33.
This course is designed for students participating in an occupational internship in auto body technology. Application of discipline-related skills and knowledge of Secretaries Commission on Achieving Necessary Skills (SCANS) competencies is emphasized. Each student is engaged in a specific research project or on-the-job learning activities under the supervision of a worksite supervisor and a college internship instructor. (CSU)

AUTO 75 Selected Topics: Automotive Technology Units 1-2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to enable the College to offer instruction in one of the specialized areas of automotive technology not already covered by existing curriculum.

AUTO 80A Body and Fender Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to emphasize the basic auto body safety standards. Course topics include elementary sheetmetal repair, auto body welding, metal finishing, plastic fillers, grinding, and shrinking.

AUTO 80B Body and Fender Units 2
Prerequisites: AUTO 80A
Limitations on Enrollment: None.
Advisories: None.
This course is designed to emphasize MIG welding of light gauge material, basic auto body hand tools, advanced metal finishing, grinding, filling, removal of body parts, and basic painting procedures.

AUTO 80C Body and Fender Units 2
Prerequisites: AUTO 80A
Limitations on Enrollment: None.
Advisories: None.
This course is designed to emphasize frame and alignment equipment and procedures, grinding techniques, shrinking gougues and aluminum, replacement of trim and upholstery, and painting procedures.

AUTO 80D Body and Fender Units 2
Prerequisites: AUTO 80A; reading level II or concurrent enrollment in reading.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to emphasize MIG welding of galvanized and aluminum materials, flux core welding, plasma arc cutting, replacement of structural components, restoration of corrosion protection, and glass service.

AUTO 80E Body and Fender Units 2
Prerequisites: AUTO 80A
Limitations on Enrollment: None.
Advisories: None.
This course is designed to emphasize the utilization of frame straightening equipment, body alignment procedures, removal and installation of headliners, fiberglass body preparation and repair, and plastic parts repair.

AUTO 80F Body and Fender Units 2
Prerequisites: AUTO 80A
Limitations on Enrollment: None.
Advisories: None.
This course is designed to emphasize arc welding, spot welding, MIG welding, metal straightening, fiberglass body repair, unibody structural panel repair, frame repair, and suspension and steering systems.
AUTO 80H  Body and Fender  Units 2
Prerequisites: AUTO 80A
Limitations on Enrollment: None.
Advisories: None.
This course is designed to emphasize paint spraying, rubbing and polishing techniques, custom painting tools, materials and equipment, introduction to electromechanical components, overview of apprenticeship programs, and awareness of auto body business practices.

AUTO 81A  Introductory Auto-Body Repair  Units 1 Laboratory
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide additional laboratory experiences for students enrolled in AUTO 84A. Areas of emphasis include sheet metal welding, metal straightening and finishing, and filling of materials.

AUTO 81B  Beginning Auto-Body Repair  Units 1 Laboratory
Prerequisites: AUTO 84A.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide additional laboratory experiences for students enrolled in AUTO 84B. Areas of emphasis include auto body collision repair, refinement of metal working skills, and removing, repairing, and replacing trim and upholstery.

AUTO 81C  Intermediate Auto-Body Repair  Units 1 Laboratory
Prerequisites: AUTO 84B.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide additional laboratory experiences for students enrolled in AUTO 84C. Areas of emphasis include basic unibody repair, fiberglass body repair, plastic parts repair, roof panel repair and replacement, and complete vehicle painting.

AUTO 81D  Advanced Auto-Body Repair  Units 1 Laboratory
Prerequisites: Reading level II or concurrent enrollment in reading; AUTO 84C.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to advance students to more complicated portions of unibody repair. The repair of suspension and steering systems are covered. Students perform assigned jobs which must be performed within time constraints imposed by employers.

AUTO 84A  Introductory Auto-Body Repair  Units 5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to allow students to work on more complicated types of auto body damage to further refine basic metal working skills. The removing, repairing, and aligning of trim and upholstery panels are covered.

AUTO 84C  Intermediate Auto-Body Repair  Units 5
Prerequisites: AUTO 84B.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to give students instruction in basic unibody repair, fiberglass body repair, plastic parts repair, and roof panel replacement and repair. Students learn and perform the steps necessary to complete a full-car paint job.

AUTO 84D  Advanced Auto-Body Repair  Units 5
Prerequisites: Reading level II or concurrent enrollment in reading; AUTO 84C.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to advance students to more complicated portions of unibody repair. The repair of suspension and steering systems are covered. Students perform assigned jobs which must be performed within time constraints imposed by employers.

AUTO 87A  Automobile Mechanics  Units 3-4 Specialization
Prerequisites: AUTO 52 or AUTO 53.
Limitation on Enrollment: This course requires instructor approval to enroll.
Advisories: None.
This course is designed for advanced students in automotive mechanics. Students complete an advanced specialized project developed in consultation with the instructor.

AUTO 87B  Auto Electrics Specialization  Units 3-4
Prerequisites: AUTO 55 or AUTO 56.
Limitation on Enrollment: This course requires instructor approval to enroll.
Advisories: None.
This course is designed for advanced students in automotive electrics. Students complete an advanced specialized project developed in consultation with the instructor.

AUTO 87C  Auto Body Specialization  Units 3-4
Prerequisites: AUTO 84D.
Limitation on Enrollment: This course requires instructor approval to enroll.
This course is designed for advanced students in auto body. Students complete an advanced specialized project developed in consultation with the instructor.
AUTOMOTIVE TECHNOLOGY

A-AUT 71A Manual Drive Train and Axles Units 3
Prerequisites: Reading level II or concurrent enrollment in reading. Indentured Apprentice.
Limitations on Enrollment: None.
Advisories: None.
This course is designed for the indentured apprentice or technician working in the trade. This course is designed to give students the technical information in automotive front wheel drives, differentials, standard transmissions and transaxles, clutches, drivelines, and 4-wheel drives to enter the job market. Complete repair procedures are provided in all areas. Students with two years of high school auto or two years auto-related experience will be allowed to enroll.

A-AUT 71B Brakes, Suspension and Steering Units 3
Prerequisites: Reading level II or concurrent enrollment in reading. Indentured Apprentice.
Limitations on Enrollment: None.
Advisories: None.
This course is designed for the indentured apprentice or technician working in the trade. This course is designed to give technical information in automotive wheel alignment, suspension overhaul, steering mechanisms, and brake overhaul. Complete repair is provided in all areas. Students with two years of high school auto or two years auto-related experience will be allowed to enroll.

A-AUT 72A Starting, Charging and Electrical Systems Units 3
Prerequisites: Reading level II or concurrent enrollment in reading. Indentured Apprentice.
Limitations on Enrollment: None.
Advisories: None.
This course is designed for the indentured apprentice or technician working in the trade. This course is designed to give theory and practical repair procedures in starting systems, charging systems, batteries, and electrical circuits in domestic and foreign automobiles. Students with two years of high school auto or two years auto-related experience will be allowed to enroll.

A-AUT 73A Engine Performance and Ignition Systems Units 3
Prerequisites: Reading level II or concurrent enrollment in reading. Indentured Apprentice.
Limitations on Enrollment: None.
Advisories: None.
This course is designed for the indentured apprentice or technician working in the trade. This course is designed to give students training in ignition systems, engine performance, and driveability problems including computer controlled engines. Domestic and foreign systems are covered using mock-ups. Students with two years of high school or two years auto-related experience will be allowed to enroll.

A-AUT 73B Engine Performance and Fuel Systems Units 3
Prerequisites: Reading level II or concurrent enrollment in reading. Indentured Apprentice.
Limitations on Enrollment: None.
Advisories: None.
This course is designed for the indentured apprentice or technician working in the trade. This course is designed to give technical training in theory in all types of fuel management systems and engine computer control. Students trouble-shoot and diagnose carburetion systems, fuel injection systems, and engine computer systems. Domestic and foreign systems are covered. Students with two years auto-related experience will be allowed to enroll.
