ity in organic evolution, reproduction and development, and introductory concepts of taxonomy and ecology. (UC, CSU, CAN BIOL 2, CAN BIOL SEQ A with BIOL 1, ZOOL 1, and BOT 1)

BIOL 2 General Zoology Units 5
Prerequisites: BIOL 1.
Limitations on Enrollment: None.
Advisories: None.
This course is a survey of the major animal groups based upon structural and chemical similarities. The course considers comparative anatomy, physiology, and genetic characteristics in the determination of the evolutionary relationships. Zoology covers the evolution of single-cell organisms to more advanced species. Ecology and impact of major phyla on their environment is discussed. This course fulfills the lower division preparation for advanced courses in zoology and satisfies the elementary zoology requirements for medicine, pharmacy, dentistry, game specialist, teachers of biology, and majors in the biological sciences. Off-campus and on-campus field trips are required. (UC, CSU, CAN BIOL 4)

BIOL 10 Survey of Biology Units 4
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to biology for non-majors which includes the following areas: biological concepts and principles, ecological relationships, environmental issues, evolutionary development, and kingdoms of life. On and off-campus field work is required. The course meets the CSU general education laboratory science requirement and IGETC requirements. (UC, CSU)

BIOL 11 Human Biology Units 4
Prerequisites: Reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the basic aspects of human biology. Topics include knowledge of the chemicals, cells, tissues and systems that comprise the human body. Also included is a consideration of human heredity, genetics, and human ecology. The course meets the CSU general education laboratory science requirement and IGETC requirements. (UC, CSU)

BIOL 12 Natural History of California Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the plants and animals of California with emphasis on the plant communities and wildlife of the Central Valley, the coast ranges, and the Sierra Nevada. Ecologically oriented, the course probes ways in which plants and animals are adapted to their environment. A field trip is required. (CSU)

BIOL 30 Human Sexuality Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is a survey of the physiological, social, and behavioral aspects of human sexuality. The course is academic rather than therapeutic. (UC, CSU)

BIOL 50H Special Studies: Biology Units 1-2
Prerequisites: Completion of survey course with grade of “B” or bet-

BOT 1 General Botany Units 4
Prerequisites: BIOL 1 with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is a study of the life and activities of plants followed by an introduction to plant physiology, plant structure, plant genetics, plant ecology, plant evolution, and a general survey of the major plant groups. It is a fundamental course for students planning to specialize in forestry, horticulture, agriculture, food processing, pharmacy, and other subjects requiring a scientific knowledge of plant life. This course is a basic course for pre-professional students in the biological sciences, as it parallels similar courses at universities. Field trips are included. (UC, CSU, CAN BIOL 6, CAN BIOL SEQ A with BIOL 1, ZOOL 1, and BOT 1)

BUS 1A Principles of Accounting Units 5
Prerequisites: Reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is a study of basic accounting principles and procedures relating to proprietorships and partnerships. Procedures for the entire accounting cycle are included. Accounting principles relating to cash, short-term investments, receivables, inventories, plant assets, payables, depreciation, internal control and payroll are included. (UC, CSU)

BUS 1B Principles of Accounting Units 5
Prerequisites: Reading level II; completion of BUS 1A with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is a continuation of the study of basic accounting principles and procedures. The course examines the topics of corporations which include: consolidations, the statement of cash flows, analysis of financial statements, cost accounting, including job order and process cost systems, budgeting and standard costs,

Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to computerized electronic banking using Quicken or a similar software package. It provides an overview of the software for basic personal accounting and banking purposes. Topics covered include gaining familiarity with and using online services through Quicken, using the financial network and calendar, defining and tracking transactions, printing checks, balancing a checkbook, and creating and customizing reports.
BUS 81  California Income Tax Preparation  Units 1  
Prerequisites: BUS 11 or concurrent enrollment in BUS 11.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to train persons to properly complete  
California income tax returns and to make them aware of the latest  
tax laws.  The course fulfills part of the requirement for the Tax  
Preparation Certificate.

BUS 82A  Business Mathematics  Units 2  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to allow students to work at their own pace.  
The course begins with a comprehensive review of computation with  
whole numbers, fractions, decimals, and percents. Development of  
these skills is followed by extensive material related to the math-  
ematics of modern business.

BUS 82B  Business Mathematics  Units 2  
Prerequisites: Successful completion of BUS 82A (or instructor’s  
permission).  
Limitations on Enrollment: None.  
Advisories: None.  
This course is a programmed, self-paced course of an intermediate  
level of business mathematics. Topics include simple, ordinary, and  
exact interest; negotiable instruments; discounting notes; annuities;  
amortization; payrolls; taxes; and depreciation.

BUS 82C  Business Mathematics  Units 2  
Prerequisites: Successful completion of BUS 82B.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is a programmed, self-paced course at a more advanced  
level of business mathematics. The mathematics of accounting and  
finance are presented in detail which includes cash and trade  
discounts, determining a net income or a loss, financial statement  
analysis, calculating markup, more detailed problems in taxes,  
insurance, and security analysis.

BUS 85  Introduction to International Trade  Units 1.5  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is an introduction to the study of international trade. The  
course includes international trade resources, market research and  
planning, negotiating with foreign businesses, export terms and  
freight forwarding, export quotations, methods of payment and  
financing, agents and distributors, and legal issues.

BUS 81  Real Estate License Preparation  Units 1  
Prerequisites: BUS 40 or concurrent enrollment in BUS 40.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to provide a review of knowledge and skills  
necessary to pass the California State real estate agent’s licensing  
examination. Topics covered include information about obtaining a  
real estate license, principles of real estate, test taking skills, and  
sample tests. Units in this course do not apply toward the associate  
degree.

BUS 81  California Income Tax Preparation  Units 1  
Prerequisites: BUS 11 or concurrent enrollment in BUS 11.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed especially for those persons wanting to own  
their own business. Course topics include, but not limited to  
personal traits for success, the feasibility study, product or service,  
marketing the product or service, accounting systems, business  
financing, organizational, and legal structure. Some basic manage-  
ment principles are included.

BUS 84B  Essential Topics for Small Business  Units 1  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed for persons who own their own business or  
plan to become business owners. The course topics include but are  
not limited to location, layout, inventory control, crime prevention,  
and franchising.

BUS 84C  The New Entrepreneur  Units 1  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed for persons interested in developing a  
business venture. Course topics include: basic management prin-  
ciples, characteristics of an entrepreneur’s profile of changing  
businesses, future products and services sources of capital, and a  
venture feasibility plan.

BUS 84D  The Law and The Small Business  Units 1  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to describe and interpret the basic laws  
governing business and commercial relationships relating to small  
business. Course topics include legal information regarding sole  
proprietorship, partnership, limited partnership, corporation, and  
joint venture. The course also addresses contracts, employment law,  
copyrights, patents, trademarks, and other legal considerations.

BUS 84E  Marketing and Advertising  Units 1  
Strategies for Small Business  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to identify ideas, methods, and techniques to  
market small businesses effectively and successfully. Course topics  
include image-building marketing strategies, public relations, direct  
marketing, direct mail, low=cost advertising, media placement,  
basics marketing plans, and advertising budgets.

BUS 84F  Customer Service Strategies  Units 1  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to teach business owners in any industry how  
to implement user-friendly and results-oriented customer service  
systems. Course topics include how to satisfy customers, the  
importance of customer service, how to measure customer satisfac-  
tion in the use of questionnaires and surveys, and set up customer  
service systems in your business. The course also focuses on  
customer service as a marketing tool.
BUS 95A Introduction to Bookkeeping and Accounting

Prerequisites: None.
Limitation on Enrollment: None.
Advisories: None.
This course is designed as an introduction to bookkeeping and accounting. Topics include organization of data, bookkeeping techniques, meeting deadlines, internal control procedures, control of cash, writing checks, reconciling bank accounts, receipts of cash and checks, handling of accounts receivable, handling of accounts payable, payroll requirements, taking an inventory, worksheets, financial statements, and ethics.

BUS 95B Sales and Marketing

Prerequisites: None.
Limitation on Enrollment: None.
Advisories: None.
This course is designed to be an entry level course for those students seeking a career as a sales/marketing representative. Course topics include career opportunities in sales and marketing by acquiring product information, developing product selling strategies, understanding buyer behavior, developing a prospect base, preparing the sales demonstration, closing, and confirming the sale. The course also focuses on job search and preparing for the job interview.

BUS 95C Retailing

Prerequisites: None.
Limitation on Enrollment: None.
Advisories: None.
This course is designed to be an entry level course for those students seeking a career in retail sales. Course topics include career opportunities in retail sales, customer service techniques, merchandising and inventory control, using the cash register/calculator, telephone etiquette, and basic sales techniques. The course also focuses on job search, and preparing for the job interview.

BUS 98V Work Experience: Business and Accounting

Prerequisites: None.
Limitation on Enrollment: The student must enroll in a course that is directly related to the business or accounting work experience. The student must enroll in a minimum of 7 units during the semester including work experience units. For summer session, the student must enroll in one related course in addition to work experience. The combined total number of units a student may take in internship, work experience, and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of work experience program objectives and an employer work experience agreement.
Advisories: GUID 30, 31, 32, 33.
This course is designed for students employed in business or accounting. The course objectives are developed by the students in consultation with their supervisor. Students are engaged in a specific research project or on-the-job learning activities under the supervision of a worksite supervisor and a college work experience instructor. To register, complete an application form available at the Applied Science and Technology Division office, Holt 140.

BUSINESS INFORMATION MANAGEMENT

BIM 1A Beginning Keyboarding

Units 1.5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to touch keyboarding, touch typewriting skills for alphabetic, numeric, symbol keys, and the ten-key pad. Students learn required theory and skills for formatting using word processing software on a personal computer; center text vertically and horizontally, proofread and correct errors, and set margins. (CSU)

BIM 1B Exploring Word Processing

Units 1.5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the use of word processing software on a personal computer to complete term papers, letters, tables, and outlines. Further development of previously learned keyboarding skills using the touch method is included. (CSU)

BIM 2 Intermediate Keyboarding

Units 3.5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide instruction in producing business documents in a variety of formats using word processing software. Students learn to keyboard, store, revise, and print business letters, memoranda, envelopes, reports, tables, job application documents, forms, and numerous other administrative documents. (CSU)

BIM 7A Beginning Word Processing: Concepts and Applications

Units 3
Prerequisites: None.
Corequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce basic concepts and operation of word processing software for producing documents found in typical business offices. The following specialized instruction on the basic concepts of word processing is emphasized: Theory and skills necessary to create, save, retrieve, edit, and print documents; how to
use electronic writing tools such as the spelling and grammar checker and the thesaurus; how to change defaults for characters, lines, and paragraphs; and how to create headers, footers, footnotes, endnotes, envelopes, labels, and automatic page numbers. (CSU)

**BIM 23A** Beginning Desktop Publishing, Units 2
**Using PageMaker**

*Prerequisites: None.*

*Corequisites: None.*

*Limitations on Enrollment: None.*

*Advisories: None.*

This course is designed to provide information and hands-on training in using state-of-the-art microcomputers, laser printers, and PageMaker software. The student learns to produce camera-ready, near-typeset quality reports, newsletters, business forms, and presentations. Knowledge of word processing and PC-DOS is recommended. (CSU)

**BIM 23M** Beginning Desktop Publishing, Units 2
**Using PageMaker**

*Prerequisites: None.*

*Corequisites: None.*

*Limitations on Enrollment: None.*

*Advisories: None.*

This course is designed to provide students with information on the concepts, structures, and processes as well as training in using state-of-the-art microcomputers, laser printers, color printers, scanners, and PageMaker software on Macintosh computers. The student learns to design, produce, and integrate text and graphics into camera-ready, near-typeset quality reports, newsletters, business forms, proposals, and presentations. An equivalent personal computer (PC) course is offered. No more than two units may be earned by taking either course. (CSU)

**BIM 23P** Beginning Desktop Publishing, Units 2
**Using PageMaker**

*Prerequisites: None.*

*Corequisites: None.*

*Limitations on Enrollment: None.*

*Advisories: None.*

This course is designed to provide students with information on the concepts, structures, and processes as well as training in using state-of-the-art microcomputers, laser printers, color printers, scanners, and PageMaker software on personal computers (PC). The student learns to design, produce, and integrate text and graphics into camera-ready, near-typeset quality reports, newsletters, business forms, proposals, and presentations. An equivalent Macintosh computer course is offered. No more than two units may be earned by taking either course. (CSU)

**BIM 31** Electronic Calculation, Units 3

*Prerequisites: None.*

*Limitations on Enrollment: None.*

*Advisories: None.*

This course is designed to emphasize use of business mathematics in solving clerical and accounting problems, electronic display and printing calculator skills such as constant key, singular and double memory, accumulative memory, special function keys for fractions, discounting, present value, merchandising, invoicing, payroll records and proration, real estate, depreciation and insurance, basic business and financial statistics, accounting analysis, and metric conversion.

Students receive training, practice, and achieve proficiency by operating various brands of electronic display and printing calculators. BIM 31 cannot be taken after successful completion of BIM 32A or 32B or 32C. (CSU)

**BIM 32A** Beginning Office Calculation, Units 1

*Prerequisites: None.*

*Corequisites: None.*

*Limitations on Enrollment: None.*

*Advisories: None.*

This course is designed to emphasize basic operation of electronic calculators using business mathematical concepts common in business. The student receives individualized training and practice in ten-key touch operation and skill development, multiplication, division, constants, multiple, sequential, and business calculations. This is an open-entry, open-exit course. BIM 32A cannot be taken after successful completion of BIM 31 (Electronic Calculation) because it is a part of the BIM 31 curriculum. (CSU)

**BIM 32B** Intermediate Office Calculation, Units 1

*Prerequisites: None.*

*Corequisites: None.*

*Limitations on Enrollment: None.*

*Advisories: None.*

This course is a further refinement in introductory electronic display calculator skills. The course includes topics such as fractions, percentages, interest, discounts, annuities, merchandising, and invoicing. Use of constant key, memory, and special function keys. BIM 32B cannot be taken after successful completion of BIM 31 (Electronic Calculation) because it is a part of the BIM 31 curriculum. This is an open-entry, open-exit course. (CSU)

**BIM 32C** Advanced Office Calculation, Units 1

*Prerequisites: None.*

*Corequisites: None.*

*Limitations on Enrollment: None.*

*Advisories: None.*

This course is an open-entry, open-exit class. (CSU)

**BIM 38** Office Technologies, Units 3

*Prerequisites: None.*

*Limitations on Enrollment: None.*

*Advisories: None.*

This course is designed to prepare students to work in the electronic office of today. Emphasis is placed on the basic areas of office support to include machine transcription, reprographics, telecommunications, incoming and outgoing mail, customer service, meetings and conferences, and travel arrangements. Time management, communication, office ethics, and job preparation are topics included to support the study of office technology. (CSU)
BIM 39  Office Management  Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the field of office administration. The course covers such topics as the functions of management, automation and word processing in the office, planning and organizing office operations, leadership and human relations, office systems, staffing, budgeting, and control. (CSU)

BIM 42  Records Management and Filing  Units 3
Prerequisites: Reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to build an understanding of the basic principles and procedures for manual and electronic records storage and control. Specific rules for alphabetic indexing are studied and then applied to alphabetic, geographic, subject, and numeric methods of records storage. Management aspects of records control and evaluating records storage practices are included. A database filing program on personal computers to enhance the manual records control tasks is studied. This automated procedure provides the ability to create, store, manipulate, and create reports from electronic data files. (CSU)

BIM 50  Machine Transcription  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to improve a person’s language skills and to train for production of mailable typewritten business and medical communications and documents directly from recorded dictation at an employable rate. (CSU)

BIM 51A Introductory Shorthand  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the study of Gregg Shorthand. Students are introduced to shorthand outlines, brief forms, phrasing, notetaking from dictation, and transcription from shorthand notes to a document. (CSU)

BIM 51B Introductory Shorthand  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is a continuation of BIM 51A. Students are introduced to additional shorthand outlines, brief forms, and phrasing. Shorthand notetaking from dictation and transcription from shorthand notes to documents are developed further. (CSU)

BIM 51C Intermediate Shorthand  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is specifically designed for students who have completed a sequence of courses for shorthand in any of the different series or have had basic shorthand courses equivalent to BIM 51A and 51B. Students review shorthand outlines, brief forms, and phrasing. Shorthand notetaking from dictation and transcription from shorthand notes to mailable documents are developed further. (CSU)

BIM 51D Advanced Shorthand  Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is a continuation of the study of shorthand. It is specifically designed for the student who has completed a sequence of courses in shorthand in any of the standard shorthand series. By using the shorthand theory previously learned, students concentrate on developing transcription and mailable copy skills through continuous dictation, transcription skill development, and practice. Gregg Shorthand or a similar method is used. (CSU)

BIM 59V Internship: Business Information Management  Units 1-8
Prerequisites: None.
Limitations on Enrollment: The student must enroll in a course that is directly related to the business information management internship. The student must enroll in a minimum of 7 units during the semester including internship units. For summer session, the student must enroll in one related course in addition to internship. The combined total number of units a student may take in internship, work experience, and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of internship program objectives and an employer internship agreement. Advisories: GUID 30, 31, 32, 33.
This course is designed for students participating in an occupational internship in business information management. Application of discipline-related skills and knowledge of Secretaries Commission on Achieving Necessary Skills (SCANS) competencies is emphasized. Each student is engaged in a specific research project or on-the-job learning activities under the supervision of a worksite supervisor and a college internship instructor. (CSU)

BIM 70A Beginning Keyboarding for Speed and Accuracy  Units 1.5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to develop keyboarding skills necessary for students to increase speed and decrease errors to meet course prerequisites, job requirements, or personal goals. Ability to use correct fingering on the keyboard and key with eyes on copy between 25 and 37 gross words per minute on a five-minute timed writing is required. Units earned in this course do not apply toward the associate degree.

BIM 70B Intermediate Keyboarding for Speed and Accuracy  Units 1.5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to develop keyboarding skills necessary for students to increase their typing speed and decrease errors to meet course prerequisites, job requirements, or personal goals. Ability to use correct fingering on the keyboard and key with eyes on copy between 36 and 50 gross words per minute in a five-minute timed writing is required. Units earned in this course do not apply toward the associate degree.
BIM 70C  Advanced Keyboarding Units 1.5 for Speed and Accuracy
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to develop keyboarding skills necessary for students to increase their typing speed and decrease errors to meet course prerequisites, job requirements, or personal goals. Ability to use correct fingering on the keyboard and key with eyes on copy at least 51 gross words per minute in a five-minute timed writing is required. Units earned in this course do not apply toward the associate degree.

BIM 72  Speedwriting Shorthand Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: Successful completion of BIM 1A or the ability to keyboard by touch is recommended.
This course is designed as an introduction to the study of Speedwriting Shorthand. Students are introduced to the principles and theory of Speedwriting Shorthand based on the alphabet applied to words commonly used in business by sounds, brief forms, phrasing, taking dictation, building speed, and transcribing dictation to documents using a computer or typewriter. Units earned in this course do not apply toward an associate degree.

BIM 76  Selected Topics: Business Information Management Units 0.5-2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer instruction in one of the specialized areas of business information management not already covered by existing curricula.

BIM 77  Selected Topics: Business Information Management Units 0.5-2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer laboratory instruction in one of the specialized areas of business information management not already covered by existing curriculum. Students must be enrolled concurrently in BIM 76.

BIM 85A  Adapted Keyboarding Units 1
Prerequisites: Eligibility for Disabled Student Services.
Limitations on Enrollment: None.
Advisories: None.
This course is an entry-level course in adaptive computer keyboarding. The course focuses on developing familiarity with the keyboard using available adaptive computer technology for students with physical, communication, and learning disabilities. Keyboarding and touch typing skills for alphabetic, numeric, and symbol keys are taught at introductory level.

BIM 85B  Adapted Keyboarding Units 1
Prerequisites: Eligibility for Disabled Student Services; Credit in BIM 85A or keyboard by touch is required.
Limitations on Enrollment: None.
Advisories: None.
This course focuses on expanding and refining keyboard skills for students with physical, communication, and learning disabilities using adaptive computer technology.

BIM 95A  Office Filing Units 1
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide information and practice on how to manage records through their entire life cycle using rules compatible with the Association of Records Managers and Administrators. Students use a simulation to manually file records with alphabetic, numeric, subject, and geographic procedures. Records retention, transfer, and disposition processes are applied.

BIM 95B  Electronic Filing Units 1
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide information on the methods of defining databases and creating tables. Students learn to add, modify, sort, query, and print records using a commercial database software program.

BIM 95C  Electronic Data Entry and Calculation Units 1
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce basic operation of computer calculator software programs using mathematical concepts common in business. Students learn the computer ten-key pad by touch and common calculator features emphasizing the use of computer calculator software programs to solve everyday business problems.

BIM 95D  Proofreading Techniques Units 1
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to enable students to proofread and edit a variety of business documents. Students learn to identify and correct errors in mechanics, keyboarding, and formatting errors generally found in written business communication.

BIM 95E  Telephone Techniques Units 1
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to enable students to communicate effectively on the telephone, handle incoming calls, make outgoing calls, handle special calls, and use telephone messaging systems professionally.

BIM 95F  Office Fundamentals Units 1
Prerequisites: None.
Limitation on Enrollment: None.
Advisories: None.
This course is designed to prepare students to work in the electronic office of today. Emphasis is placed on the basic areas of office support to include reprographics, telecommunications, mail procedures, and calendaring.

CAM 53 Elementary Cambodian Units 2.5
Prerequisites: Successful completion of CAM 1 or 52.
Limitation on Enrollment: None.
Advisories: None.
This course is an introduction to the Cambodian language and Cambodian culture. Emphasis is placed on the following skills in the order given: listening, speaking, reading, and writing. The combined five units of CAM 53 and 54 are equivalent to CAM 2. (UC, CSU)

CAM 54 Elementary Cambodian Units 2.5
Prerequisites: Successful completion of CAM 53.
Limitation on Enrollment: None.
Advisories: None.
This course is an introduction to the Cambodian language and Cambodian culture. Emphasis is placed on the following skills in the order given: listening, speaking, reading, and writing. The combined five units of CAM 53 and 54 are equivalent to CAM 2. (UC, CSU)

CHEMISTRY

CHEM 1A General Chemistry Units 5
Prerequisites: Reading level II; CHEM 3A and MATH 82 both with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is designed as a technical introduction to chemistry for students intending to major in chemistry, medicine, dentistry, pharmacy, etc., which require a rigorous understanding of the fundamental principles of chemistry. (UC, CSU, CAN CHEM 2, CAN CHEM SEQ A with both CHEM 1A and CHEM 1B)

CHEM 1B General Chemistry Units 5
Prerequisites: Reading level II; CHEM 3A with a satisfactory score on aptitude tests; a grade of “C” or better in 1A is advised for 1B.
Limitations on Enrollment: None.
Advisories: None.
This course is designed as a continuation of the technical introduction to chemistry for students intending to major in chemistry, medicine, dentistry, and pharmacy which requires a rigorous understanding of the fundamental principles of chemistry. The laboratory includes semi-micro qualitative analysis. (UC, CSU, CAN CHEM 4, CAN CHEM SEQ A with both CHEM 1A and CHEM 1B)

CHEM 3A Introduction to Chemistry Units 4
Prerequisites: Reading level II and Math level II; MATH 80 or MATH 83B, either with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to meet the chemistry requirements for registered nursing, agriculture, home economics majors, and certain other majors in the biological sciences. (UC, CSU, CAN CHEM 6, CAN CHEM SEQ B with both CHEM 3A and 3B)

CHEM 3B Introduction to General Chemistry Units 4
Prerequisites: Reading level II and Math level II; CHEM 3A with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to meet the chemistry requirements for registered nursing, agriculture, and home economics majors, and certain other majors in the biological sciences. Organic chemistry and biochemistry are emphasized. The course is parallel with the offerings from many of the state colleges. (CSU, CAN CHEM 8, CAN CHEM SEQ B with both CHEM 3A and B)

CHEM 10 Exploring Everyday Chemistry 3 units
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide a non-mathematical introduction to chemistry and the role it plays in modern society. The course is designed for non-science majors such as liberal arts, social science, education, or anyone who is curious about the chemistry involved in everyday things. Students learn about topics of current interest and global importance, including global warming, depletion of the ozone layer, energy, and health issues. (CSU)

CHEM 12A Organic Chemistry Units 5
Prerequisites: CHEM 1A with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to include the reactions and nomenclature of aliphatic and aromatic hydrocarbon and functional groups. The concepts of reaction mechanisms are studied. CHEM 12A is for students in pre-medicine, chemistry, and chemical engineering. (UC, CSU)

CHEM 12B Organic Chemistry Units 5
Prerequisites: CHEM 12A with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is designed as a continued study of major classes of organic compounds including the carbonyl compounds, carboxylic acids, amines, and phenols. Carbohydrates, proteins, and nucleic acids are studied during the last half of the course. (UC, CSU)

CHEM 50H Special Studies: Chemistry Units 1-2
Prerequisites: Completion of survey course with grade of “B” or better and presentation of a project acceptable to the instructor and division chairperson.
Limitations on Enrollment: None.
Advisories: None.
This course is open to all students qualified to do advanced work in the field. A course project is assigned which may include research, field work, or other advanced study, and the course may be repeated for a maximum of four units. (UC, CSU)
CHINESE

CHIN 1  Elementary Chinese  Units 5
Prerequisites: None.
Limitation on Enrollment: None.
Advisories: None.
This course is an introduction to the Chinese language and Chinese cultures. Emphasis is placed on the following skills in the order given: listening, speaking, reading, and writing. (UC, CSU)

CHIN 2  Elementary Chinese  Units 5
Prerequisites: Successful completion of CHIN 1 or 52.
Limitation on Enrollment: None.
Advisories: None.
This course is an introduction to the Chinese language and Chinese cultures. Emphasis is placed on the following skills in the order given: listening, speaking, reading, and writing. (UC, CSU)

CHIN 3  Intermediate Chinese  Units 5
Prerequisites: Successful completion of CHIN 2 or 54.
Limitation on Enrollment: None.
Advisories: None.
This course is designed to offer continued study of the Chinese language and Chinese cultures. Efforts to improve reading and composition skills are based on both contemporary and traditional selection. (UC, CSU)

CHIN 4  Intermediate Chinese  Units 5
Prerequisites: Successful completion of CHIN 3.
Limitation on Enrollment: None.
Advisories: None.
This course is designed to offer continued study of the Chinese language and Chinese cultures. Efforts to improve reading and composition skills are based on both contemporary and traditional selection. (UC, CSU)

CHIN 36A  Introductory Chinese Conversation Units 2
Prerequisites: Successful completion of CHIN 1 or CHIN 51.
Limitation on Enrollment: None.
Advisories: None.
This course is designed to strengthen fundamental communication patterns based on typical daily situations. (CSU)

CHIN 36B  Beginning Chinese Conversation Units 2
Prerequisites: Successful completion of CHIN 2 or 53.
Limitation on Enrollment: None.
Advisories: None.
This course is designed to achieve conversational ability based on typical daily situations. (UC, CSU)

CHIN 38A  Special Assignment: Listening Units 2
Prerequisites: Concurrent enrollment in or completion of CHIN 1 or 51.
Limitation on Enrollment: None.
Advisories: None.
This course is a skill-building course with an emphasis on pronunciation. The course is designed to meet the special needs of students. The course is offered for individual or group study. (CSU)

CHIN 38B  Special Assignment: Pronunciation Units 2
Prerequisites: Concurrent enrollment in or completion of CHIN 1 or 51.
Limitation on Enrollment: None.
This course is a skill-building course with an emphasis on pronunciation. The course is designed to meet the special needs of students. The course is offered for individual or group study. (CSU)

CHIN 38C  Special Assignment: Reading Units 2
Prerequisites: Concurrent enrollment in or completion of CHIN 1 or CHIN 51.
Limitation on Enrollment: None.
Advisories: None.
This course is a skill-building course with an emphasis on reading. The course is designed to meet the special needs of students. The course is offered for individual or group study. (CSU)

CHIN 38D  Special Assignment: Writing Units 2
Prerequisites: Concurrent enrollment in or completion of CHIN 1 or 51.
Limitation on Enrollment: None.
Advisories: None.
This course is a skill-building course with an emphasis on writing. The course is designed to meet the special needs of students. The course is offered for individual or group study. (CSU)

CHIN 50H  Special Studies: Chinese Units 1-2
Prerequisites: Presentation of a project acceptable to the instructor and the division chairperson; CHIN 4 with a grade of “B” or better.
Limitation on Enrollment: None.
Advisories: None.
This course is designed to allow students to do advanced work in the language. The course includes research, directed reading, field work, or other advanced study. The course may be repeated for a maximum of four units. (UC, CSU)

CHIN 51  Elementary Chinese Units 2.5
Prerequisites: None.
Limitation on Enrollment: None.
Advisories: None.
This course is an introduction to the Chinese language and Chinese culture. Emphasis is placed on the following skills in the order given: listening, speaking, reading, and writing. The combined five units of CHIN 51 and 52 are equivalent to CHIN 1. (UC, CSU)

CHIN 52  Elementary Chinese Units 2.5
Prerequisites: Successful completion of CHIN 51.
Limitation on Enrollment: None.
Advisories: None.
This course is an introduction to the Chinese language and Chinese culture. Emphasis is placed on the following skills in the order given: listening, speaking, reading, and writing. The combined five units of CHIN 51 and 52 are equivalent to CHIN 1. (UC, CSU)

CHIN 53  Elementary Chinese Units 2.5
Prerequisites: Successful completion of CHIN 1 or 52.
Limitation on Enrollment: None.
Advisories: None.
This course is an introduction to the Chinese language and Chinese culture. Emphasis is placed on the following skills in the order given: listening, speaking, reading, and writing. The combined five units of CHIN 53 and 54 are equivalent to CHIN 2. (UC, CSU)

CHIN 54  Elementary Chinese Units 2.5
Prerequisites: Successful completion of CHIN 53.
Limitation on Enrollment: None.
Advisories: None.
This course is an introduction to the Chinese language and Chinese
culture. Emphasis is placed on the following skills in the order given: listening, speaking, reading, and writing. The combined five units of CHIN 53 and CHIN 54 are equivalent to CHIN 2. (UC, CSU)

CIVILIZATION

CIVIL 3 Autobiography of Civilization Units 3
Prerequisites: None.
Limitation on Enrollment: None.
Advisories: None.
This course is a survey of the artistic traditions of our western cultural heritage. The arts including painting, sculpture, architecture, music, dance, drama, and literature are studied as vehicles in the search for meaning and value from the ancient world to modern times. (UC, CSU)

COMPUTER SCIENCE

C S 11 Computer Science Fundamentals Units 3
Prerequisites: Reading level II.
Corequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce students to the hardware, software, terminology, and uses of modern computer systems. Applications software packages on microcomputers are introduced. Students write a minimum of four computer programs in BASIC. (UC, CSU, CAN CSCI 2)

C S 14 Microcomputers and Small Business Systems Units 3
Prerequisites: Reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce students to microcomputers and the various available pre-written application programs. The course is intended for students with no prior exposure to microcomputers and it is for the non-programmer. (CSU)

C S 14B Microcomputer Evaluation and Installation Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introductory computer course designed to enable the student to determine computer requirements, evaluate software, match software and hardware requirements, and set up and install a computer system. (CSU)

C S 15 Topics in Computer Science Units 0.5-3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer instruction in specialized areas of Computer Science. (CSU)

C S 17 Computer Logic Units 3
Prerequisites: Reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to allow students to develop an ability to analyze and to define logical solutions of computer related problems. The solution follows the “structured” programming concept. It is not related to any particular programming language. (UC, CSU)

C S 18B Microcomputers and Small Business: Apple Macintosh Units 3
Prerequisites: Reading level II.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce students to the Apple Macintosh computer and various application programs. The course is intended to provide a working knowledge of how to use the Macintosh computer for word processing, spreadsheet, data management, and painting and drawing. (CSU)

C S 19 Electronic Spreadsheets for Microcomputers Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to be an in-depth technical exploration of electronic spreadsheets on microcomputers. A current program such as Excel is used. (CSU)

C S 20 Microsoft Word, Excel, and Access Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce the student to microcomputers and the PC based programs Microsoft Word (word processor), Excel (spreadsheet), and Access (data base). Assignments require the use of a computer laboratory. (CSU)

C S 24A COBOL Programming Units 3
Prerequisites: CS 11 and CS 17, with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is designed for students who have an understanding of data processing fundamentals. The course covers the COBOL specifications, their usage, and applicable operating system commands to enable the student to write, enter, and run business oriented problems. (UC, CSU, CAN CSCI 8)

C S 24B Advanced COBOL Programming Units 3
Prerequisites: CS 24A with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is an advanced study of the COBOL programming language. Topics covered include file maintenance techniques using sequential, indexed, and relative files; advanced report generation procedures; and parameter-driven data retrieval; the SORT and SEARCH commands; and online and database programming. (UC, CSU)

C S 25A ASSEMBLY Language Programming: Macro Units 3
Prerequisites: Reading level II; CS 11 and CS 17, with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to Assembly language programming. Programs are run on the IBM microcomputer or compatible. The course features the fundamental architecture of the IBM PC and the primary assembly language instruction set. (UC, CSU, CAN CSCI 10)

**C S 26 JAVA Programming Units 3**
Prerequisites: C S 70 and one of the following: C S 28B or C S 31 or C S 31B, each with a grade of “C” or better.
Limitation on Enrollment: None.
Advisories: None.
This course is designed to introduce students to advanced programming skills using the JAVA programming language. Topics include structured programming, objective-oriented programming, and JAVA Applets. (UC, CSU)

**C S 27 Engineering FORTRAN Units 3**
Prerequisites: Math 20 or 31 or 36 or 87.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the development of computer programs in the FORTRAN programming language. It includes input-output processing, arithmetic calculations, and the use of logical expressions. Computer programs are assigned to assist students in developing competence in the language. The course is designed primarily for mathematics or engineering students. (UC, CSU, CAN CSCI 4)

**C S 28A BASIC Programming Units 3**
Prerequisites: Reading level II; CS 11 or concurrent enrollment in CS 11 or the equivalent.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to programming in BASIC. It emphasizes business applications of the language. (UC, CSU, CAN CSCI 6)

**C S 28B Visual BASIC Programming Units 3**
Prerequisites: Reading level II; completion of CS 21 or CS 28A with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to give students advanced programming skills using the BASIC programming language. Topics include sequential, random and index files, error trapping screen formatting, graphics, and controlling printer functions. (UC, CSU)

**C S 29 PASCAL Programming Units 4**
Prerequisites: Reading level II; completion of CS 11 with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the general purpose programming language Pascal. Pascal is a structured language designed to teach structured design and structured programming concepts. General problem solving techniques using these structured concepts are covered along with elementary data structures. Topics covered include string manipulation techniques, arrays, records, lists, queues, stacks, binary trees, and sort methods. (UC, CSU, CAN CSCI 12)

**C S 31 C Programming Units 3**
Prerequisites: CS 11 and 17 with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is an introductory programming course in the general purpose programming language C. C features economy of expression, modern control flow and data structures, and an expanded set of operators. (UC, CSU, CAN CSCI 16)

**C S 31B C++ Programming Units 3**
Prerequisites: C S 31 with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is an introductory course in C++. This course is designed to provide students with a working knowledge of OOP (Object-Oriented Programming) using C++. Students learn basic OOP concepts and practice their implementations in C++. (UC, CSU)

**C S 32 Computer Operations Units 3**
Prerequisites: One of the following with a grade of “C” or better: CS 21, 22A, 24A, 27, 28A, 29 or 31.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to increase students’ productivity by using the UNIX operating system. Students learn to use the operating system on both a micro and a mainframe environment. (UC, CSU)

**C S 33 Systems Analysis and Design Units 3**
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to systems analysis and design. (CSU)

**C S 38 Multimedia Presentations Units 3**
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the design and implementation of a database on a microcomputer. Topics include database theory, design implementation, administration, and security. Students do an actual case study using R:Base 5000. (CSU)
C S 45  Microsoft Windows  Units 1
Prerequisites: Reading level II.
Limitation on Enrollment: None.
Advisories: None.
This course is designed to cover beginning and intermediate level topics in the use of Microsoft Windows on IBM compatible personal computers. Topics covered include basic concepts such as using desktop accessories, software applications, start-up procedures, files and printers, the control panel, the Program Manager, Write, Paintbrush, Terminal, different operating modes, Windows, SETUP, and Windows with a network. (CSU)

C S 50H  Special Studies: Computer Science Units 1-4
Prerequisites: Completion of all courses in the language or skill in which the project will entail, with a grade of “C” or above; consent of the instructor and division chairperson.
Limitations on Enrollment: None.
Advisories: None.
This course is designed for students of computer science who wish to expand their knowledge beyond the established curriculum. Students select or are assigned a project that is approved by a faculty member and the division chairperson. Students pursue the project through individual laboratory effort and report their progress at scheduled meetings with the faculty member. The course may be repeated for a maximum of four units. (UC, CSU)

C S 54  Fundamentals of Data Communications  Units 3
Prerequisites: Reading level II; CS II.
Limitations on Enrollment: None.
Advisories: None.
This course is a beginning level course in the fundamentals of data and telecommunications in business. Topics covered include hardware, software, transmission facilities, data and voice communications, telecommunication applications, digital and analog signal processing, network types and designs, and managerial issues. (CSU)

C S 69V  Internship: Computer Science: Computer Information Systems  Units 1-8
Prerequisites: None.
Limitations on Enrollment: The student must enroll in a course that is directly related to the computer services internship. The student must enroll in a minimum of 7 units during the semester including internship units. For summer session, the student must enroll in one related course in addition to internship. The combined total number of units a student may take in internship, work experience, and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of internship program objectives and an employer internship agreement.
Advisories: GUID 30, 31, 32, 33.
This course is designed for students participating in an occupational internship in business information management. Application of discipline-related skills and knowledge of Secretaries Commission on Achieving Necessary Skills (SCANS) competencies is emphasized. Each student is engaged in a specific research project or on-the-job learning activities under the supervision of a worksite supervisor and a college internship instructor. (CSU)

C S 70  Introduction to Internet  Units 1
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the worldwide computer network Internet. Internet provides access to a wide range of resources such as electronic mail, information servers, international sights, and government resources. Topics include navigation through the World Wide Web, File Transfer Protocol (FTP), and Telnet.

C S 75  Applied Computer Science  Units 1-3
Prerequisites: CS 12A with a grade of “C” or better and CS 22A or 24A or 25A or 27 or 28A or 29 or 31 with a grade of “C” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is under a designated computer science instructor’s general tutelage. Students learn how to assist other students in hands-on application. Students perform as computer laboratory assistants applying learned material and performing various tasks as directed by a laboratory supervisor. Assisting other future users in a hands-on environment, assisting other users to develop operational programs, and assisting in the refinement of debugging skills on a variety of computer equipment. The course may be repeated up to a total of six units.

C S 76  Topics in Computer Science  Units 0.5-3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to offer instruction in specialized areas of Computer Science.

C S 95A  Introduction to Windows  Units 0.5
Prerequisites: None.
Limitation on Enrollment: None.
Advisories: None.
This course is designed to introduce beginning level concepts in the use of Microsoft Windows. Students learn basic concepts on desktop accessories, software applications, start-up procedures, files and printers, the control panel, and Windows Explorer. The basic components of a computer system are also demonstrated.

C S 95B  Introduction to Microsoft Word  Units 0.5
Prerequisites: None.
Limitation on Enrollment: None.
Advisories: None.
This course is designed to introduce students to the use of a word processing computer applications package. Areas include commonly used word processing terms; creating, saving, retrieving, and printing a word processing document; highlighting, copying, cutting, and pasting blocks of text; formatting and editing text; and utilizing the spell checking and thesaurus features.

C S 95C  Introduction to Microsoft Excel  Units 0.5
Prerequisites: None.
Limitation on Enrollment: None.
Advisories: None.
This course is designed to introduce students to the use of an
electronic spreadsheet computer applications package. Areas include commonly used spreadsheet terms; creating, saving, retrieving, and printing an electronic spreadsheet; highlighting, copying, cutting, and pasting ranges of cells; formatting and editing cells; and utilizing the formulas and functions. Spreadsheet activities are implemented using Microsoft Excel.

C S 98V Work Experience: Units 1-4
Computer Science
Prerequisites: Students must meet work experience qualifications through use of the parallel plan of the alternate plan.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to give students college credits for on-the-job experience related to their major field of study. Students must demonstrate new and expanded learning experience before being permitted to repeat. To register, contact the work experience staff in the work experience office. The course may be repeated three times in sequence except for the summer school alternate plan.

CONSTRUCTION TECHNOLOGY

CONST 10 Wood Technology Units 5
Prerequisites: None.
Corequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide a basic knowledge of careers in the woodworking industry, operation and safety procedures for utilizing cabinetmaking tools and equipment to demonstrate wood joinery, fabrication, and assembly. The course also includes wood characteristics, wood identification, and wood grading systems. (CSU)

CONST 51A Mill Cabinet Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to instruct and train students in the safety, care, use and maintenance of cabinetmaking equipment. Blueprint reading, types of materials, and fastening methods are covered. Bench work includes the use of hand and electric tools. All shop work is on a practical and production basis. (CSU)

CONST 51B Beginning Mill Cabinet Units 4
Prerequisites: CONST 10 or concurrent enrollment in CONST 10.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to instruct and to train students in the safety, care, use and maintenance of cabinetmaking equipment. Blueprint reading, types of materials, and fastening methods are emphasized. Bench work includes the use of hand and electric tools. All shop work is on a practical and production basis. (CSU)

CONST 51C Intermediate Mill Cabinet Units 4
Prerequisites: CONST 51B or equivalent.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide students the opportunity to develop their skills further by stressing job and rod layout, door and drawer layout, and project organization. All work is on a practical and production basis. Personal projects are permitted on a limited basis. (CSU)

CONST 51D Advanced Mill Cabinet Units 4
Prerequisites: CONST 51C; or equivalent.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide students the opportunity to develop their skills further by stressing time and material requirements for a job, cost calculation, ordering materials, and project supervision. All work is on a practical and production basis. Personal projects are permitted on a limited basis. (CSU)

CONST 54 Estimating and Specifications Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to develop advanced carpentry skills to a higher level. The student assumes greater responsibilities in leadership, ordering material, and working with inspectors. The student works with the instructor to see that the project is completed according to plans, specifications, and Uniform Building Codes. (CSU)

CONST 62B Intermediate Residential Carpentry Units 10
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide students with the opportunity to install interior finish in a residential home, including but not limited to insulation, drywall, doors, windows, interior trim, and hardware. Instruction includes building fences, decks, driveways, and walks. The house site is located off campus, dependent on availability. (CSU)

CONST 62C Advanced Residential Carpentry Units 10
Prerequisites: CONST 62A or CONST 62B.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to allow advanced students to specialize in a specific area of residential or light commercial construction. Students receive training in employee motivation, developing work ethic, and supervision. Students also act as crew supervisors at the construction site. (CSU)

CONST 69V Internship: Construction Technology Units 1-8
Prerequisites: None.
Limitations on Enrollment: The student must enroll in a course that is directly related to the construction technology internship. The student must enroll in a minimum of 7 units during the semester includ-
SJDC Catalog 99 - 00 SECTION III, Description of Courses

CONST 71A Mill Cabinet Fundamentals Units 4
Prerequisites: CONST 10.
Limitation on Enrollment: None.
Advisories: None.
This course is designed to provide safety and operating procedures for hand tools, power hand tools, and power equipment. Emphasis is placed on print reading, material grades and applications, bench work, and construction techniques. The student develops proficiency in the use and set-up of woodworking equipment.

CONST 71B Beginning Mill Cabinet Units 4
Prerequisites: CONST 10.
Limitation on Enrollment: None.
Advisories: None.
This course is designed to provide safety and operating procedures for power hand tools and power equipment used to manufacture custom grade cabinetry. Emphasis is placed on print reading, material grades and applications, bench work, and construction techniques for custom cabinets.

CONST 71C Intermediate Mill Cabinet Units 4
Prerequisites: CONST 10.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to expand knowledge and skills in the areas of safety, rod layout, equipment, cabinet construction, print reading, shop drawings, and joinery techniques. The student completes a project designed to increase cabinetmaking skills and knowledge. All work is performed to industry standards. Personal projects are permitted on a limited basis.

CONST 71D Advanced Mill Cabinet Units 4
Prerequisites: CONST 10.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide advanced skills and knowledge for the manufacturing of custom commercial grade cabinetry. Emphasis is placed on print reading, manufactured wood products, hardware, plastic laminates, commercial construction techniques, and installation.

CONST 72A Beginning Residential Carpentry Units 10
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce construction of a dwelling. The emphasis is placed on construction of the foundation forms, floor systems, wall and ceiling structures, and roof systems. The student also installs the exterior finish, rough plumbing, and flat concrete work. The construction site is usually located off campus.

CONST 72B Intermediate Residential Carpentry Units 10
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce the installation of the interior finish in a residential dwelling, including, but not limited to, insulation, drywall, windows, interior trim, and hardware. The course also includes building fences, decks, driveways, and walks. The construction site is usually located off campus.

CONST 72C Advanced Residential Carpentry Units 10
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to develop advanced carpentry skills to a higher level. The student assumes greater responsibilities in leadership, ordering material, and working with inspectors. The student works with the instructor to see that the project is completed according to plans, specifications, and the Uniform Building Code.

CONST 74A Introduction to Cabinetmaking Units 4
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce the career opportunities and characteristics of the cabinetmaking industry. Topics include cabinetmaker’s mathematics, lumber and material, characteristics and use, and general shop safety.

CONST 74B Fundamentals of Cabinetmaking Units 4
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to emphasize the characteristics and the use of hand and power tools used in the cabinetmaking industry. Also included are cabinet joint construction and basic blueprint reading.

CONST 74C Cabinetmaking Units 4
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to provide mathematical applications for cabinetmaking, blueprint reading of shop drawings, and use and operation of power machines including hand saws, routers, grinders, and saws.

CONST 74D Cabinetmaking and Millwork Units 4
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to emphasize cabinetry layout, millwork standards and characteristics, bench work, and plastic laminates.

CONST 74E Cabinetmaking and Millwork Units 4
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to emphasize the application and use of lumber, veneers, adhesive, commercial plastic laminates, and power equipment.

CONST 74F Cabinetmaking and Millwork Units 4
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to emphasize characteristics and requirements for commercial cabinetry and fixtures, millwork, commercial blueprint reading, application and use of shapers, commercial sanders, and milling machines.

CONST 74G Cabinetmaking and Millwork Units 4
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to emphasize residential and commercial cabinet design, production methods, production layout, and cabinet construction from start to finish.

CONST 74H Cabinetmaking and Millwork Units 4
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to emphasize the requirements for job planning, project supervision, construction requirements, construction scheduling, construction costs, and the construction process from start to finish.

CONST 75 Selected Topics: Units 1-2
Construction Technology
Prerequisites: Reading level II or concurrent enrollment in reading.
Limitations on Enrollment: None.
Advisories: None.
This course is a concentrated study of a specific topic in construction. Course requirements include a paper and/or a final examination.

CONST 78 Uniform Building Code Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce the Uniform Building Code published by the International Conference of Building Officials as it applies to residential, commercial, and public buildings.

CONST 87A Carpentry Specialization Units 3-4
Prerequisites: CONST 62B.
Limitation on Enrollment: This course requires instructor approval to enroll.
Advisories: None.
This course is designed for advanced students in carpentry. Students complete an advanced specialized project developed in consultation with the instructor.

CONST 87B Mill Cabinet Specialization Units 3
Prerequisites: CONST 51C.
Limitations on Enrollment: This course requires instructor approval to enroll.
Advisories: None.
This course is designed for advanced students in mill cabinet. Students complete an advanced specialized project developed in consultation with the instructor.

CONST 87C Construction Drafting: Special Assignment Units 3
Prerequisites: Completion of CONST 48 and/or 49, and/or equivalent.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to afford the student an opportunity for research and drawing in special areas of interest. The work to be covered is agreed upon between student and instructor at the beginning of the semester.

CONST 89 Methods and Planning Units 3
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to introduce construction materials and techniques used in construction of residential structures. The student constructs a residential architectural model according to approved architectural drawings and current local and the Uniform Building Code. Topics include estimating structural materials, ordering materials, and calculating cost of construction.

CONST 90B Mill Cabinet Specialization Units 3
Prerequisites: CONST 51C or equivalent.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to assist advanced students in gaining a greater knowledge of a specialized area of the mill cabinet trade. The work to be covered is developed between student and instructor at the beginning of the course.

CULINARY ARTS

CUL ART 1 Introduction to Hospitality Units 2
Industry
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to explore the organization and responsibilities of food service personnel within the hospitality industry. The growth, development, and future of the hospitality industry are investigated. (CSU)

CUL ART 3 Sanitation and Safety Units 2
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is designed to examine the basic principles of hygiene
and sanitation and the application of these principles to food service operations. It also includes safety elements in food service planning, description of maintenance and operation of appropriate food service equipment, and OSHA (Occupational Safety Health Act) regulations. Emphasis is placed on the supervisor’s responsibilities in maintaining high sanitation and safety standards. (CSU)

CUL ART 4  Food and Beverage  Units 2  
Cost Technologies  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to enable the student to study food, beverage, and labor cost controls. The student learns recipe conversions, menu pricing, food and labor cost percentages, and interprets a profit and loss statement. A working knowledge of culinary mathematics as it applies directly to food cost analysis is stressed as well as the necessary mathematics proficiency required to function effectively in the foodservice industry. (CSU)

CUL ART 5  Commercial Food Preparation  Units 4  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to explore the theory of basic commercial food production techniques and applications. The students develop skills in knife, tool, and equipment operation and apply principles of food preparation to produce a variety of food products. Students are involved in meal production and rotate through commercial foodservice job stations. (CSU)

CUL ART 7  Baking  Units 3  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed for students to learn and to practice dessert and bread production from formulas used in quantity food service. Cost and nutritional content are emphasized. (CSU)

CUL ART 9  Restaurant Operations  Units 6.5  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to enable the student to prepare and serve food for an a la carte restaurant. Students gain experience and practice in the business of restaurant operations during performance of cooking and serving in the campus restaurant. Students perform dining room service using a variety of types of service. Students learn to operate a point of sale computer. (CSU)

CUL ART 11  Menu Planning  Units 1.5  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to summarize the basic principles of menu planning and layout for various foodservice operations. Factors considered are nutritional adequacy, economic requirements, types of operations, skill of personnel, clientele, and equipment. (CSU)

CUL ART 13  Purchasing and Receiving  Units 1.5  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to survey purchasing and receiving practices in commercial foodservice operations. The course includes the writing of specifications, standards and grades of food. Analysis of food quality and the factors influencing pricing are included. (CSU)

CUL ART 15  Selected Topics: Culinary Arts  Units 1-2  
Prerequisites: Reading level II or concurrent enrollment in reading.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to offer instruction in one of the specialized areas of culinary arts not already covered by existing curricula. (CSU)

CUL ART 19  Advanced Quantity Food Preparation  Units 6.5  
Prerequisites: CUL ART 9.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is a survey of management principles of commercial food production and service. Students gain experience in the supervision of the Student Chef and kitchen production staff. (CSU)

CUL ART 25  Food Service Management  Units 2  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is designed to enable the student to study the principles of managing all types of commercial and institutional food service. Areas such as sales, promotion, advertising, personnel, legal aspects, and labor-management relations are covered. Styles of leadership are evaluated. Human relations and personnel management skills are discussed. (CSU)

CUL ART 27  Garde Manger  Units 1.5  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is about the artwork of the foodservice industry that blends aesthetic and practical aspects of food presentation. Salads, and sandwiches, buffet, buffet presentations are discussed. Advanced garde manger techniques for show pieces utilizing American Culinary Federation competition criteria are stressed. (CSU)

CUL ART 29  Beverage Management  Units 1.5  
Prerequisites: None.  
Limitations on Enrollment: None.  
Advisories: None.  
This course is the history of production, laws, responsibilities, and service of beverages. Emphasis is placed on beers, wines, liquors, coffees, teas, and non-alcoholic beverages. (CSU)
CUL ART 50H  Special Studies: Units 1-2
Culinary Arts
Prerequisites: Completion of entry level Culinary Arts courses with a grade of “B” or better.
Limitations on Enrollment: None.
Advisories: None.
This course is open to students who are qualified to do advanced work in the field of culinary arts. The course includes research, directed reading, field work, or other advanced study, and the course may be repeated for maximum of four units. (CSU)

CUL ART 70  Introduction to Ice Carving Units 0.5
Prerequisites: None.
Limitations on Enrollment: None.
Advisories: None.
This course is an introduction to the basics of ice carving for the hospitality industry with an emphasis on safety, design, execution, movement, and display of sculptures suitable for hotels, caterers, and restaurants.

CUL ART 80  Selected Topics: Culinary Arts Units 1-2
Prerequisites: None.
