Meeting began at 12:30, in the Manzanita Building, at Columbia College. Introductions were made and the A-BASE project discussed. Marcella presented the background material, and Wendell and Marcella went through the project objectives and progress to date.

Discussion centered around the project.

- It was pointed out that the Matrix contains incorrect information about Columbia College mathematics requirements. 1. There is no math competency. 2. 101 and 104 are now 5 units.
- Names of contacts were suggested to Wendell.
- There was discussion about contacting mathematics teachers in the Columbia College area. It was agreed there was no harm in personal contacts, but there must be contact with principals to let them know what is going on. Wendell is doing that.

Respectfully Submitted,

Wendell Hovey
A-BASE Project Director
