OCCUPATIONAL WORK EXPERIENCE PROGRAM

Student Learning Objectives (SLO)

SLO Requirements

Student Learning Objectives are goals that the student develops with his/her work supervisor. They provide measurable results when achieved and are intended to enhance the student's physical and/or analytical job skills.

These learning outcomes are to be accomplished by the student in the course of the semester.

Therefore, determine which job skills you want to improve and use an action verb to indicate how you will accomplish this.

- Student is required to write a minimum of four (4) SLOs
- SLOs should reflect improvement in job skills/knowledge or job performance
- All reports **must be approved and signed** by the student's work supervisor

SLO Format

For **one** SLO, ask yourself each of the following questions, and put your answers in one sentence:

- **What** job skill do I specifically want to improve during the Work Experience program?
 - **Example response:** *I would like to increase my typing speed to 50 words per minute.*
- **How** do I intend to accomplish this objective?
 - **Example response:** *By doing drills and practice exercises one hour per day.*
- **How** will I measure my progress?
 - **Example response:** *By analyzing my speed with a timed typing test each week.*

Compile your three responses into one sentence as shown in the example below. This is ONE (1) SLO:

I will increase my typing speed to 50 words per minute by spending an hour a day on typing drills and practice exercises and track my progress with weekly timed typing tests.
