Criminal Justice in Society

Prerequisites: None. Prerequisite Skills: 1. Advisory Reading Level II. Corequisites: None. Limitations on Enrollment: None. Advisories: ENG-001A with a grade of "C" or better.

This course introduces students to the characteristics of the criminal justice system in the United States. Focus is placed on examining crime measurement, theoretical explanations of crime, responses to crime, components of the system, and current challenges to the system. The course examines the evolution of the principles and approaches utilized by the justice system and the evolving forces which have shaped those principals and approaches. Although justice structure and process is examined in a cross cultural context, emphasis is placed on the US justice system, particularly the structure and function of US police, courts, and corrections. Students are introduced to the origins and development of criminal law, legal process, and sentencing and incarceration policies. (UC, CSU)

**A J 022  Concepts of Criminal Law**

Prerequisites: A J-021 Criminal Justice in Society with a grade of "C" or better or.
Limitations on Enrollment: None. Advisories: ENG-001A with a grade of "C" or better.
This course offers an analysis of the doctrines of criminal liability in the United States and the classification of crimes against persons, property, morals, and public welfare. Special emphasis is placed on the classification of crime, the general elements of crime, the definitions of common and statutory law, and the nature of acceptable evidence. This course utilizes case law and case studies to introduce students to criminal law. The completion of this course offers a foundation upon which upper-division criminal justice course will build. The course will also include some limited discussion of prosecution and defense decision making, criminal culpability, and defenses to crimes. (UC, CSU, C-ID AJ 120)

AUTOMECH 090B Advanced Clean Air Car Course

Prerequisite: None. Prerequisite Skills: None. Advisories: For those students who choose to receive the Advanced Clean Car Course certification the student must meet the California Department of Consumer Affairs/Bureau of Automotive Repair requirements prior to entry into the course; Certification of the Basic Clean Air Course, or, an Intern license; or a current Basic Area Smog Check License. Corequisites: None. Limitations on Enrollment: None. This course is designed to meet the California State requirements for the Department of Consumer Affairs/Bureau of Automotive Repair (DCS/BAR) Advanced Clean Air Car course. This course is required for the advanced level student or Journeyman level technician who wishes to become a Smog Check Test and Repair Technician. The student who enrolls in this course must meet the DCA/BAR prerequisite guidelines before entering the course in order to receive an Advanced Clean Air Car Course certification. This course includes State rules and regulations for Enhanced Area Smog Check program, baseline testing and common repair procedures used on enhanced area emission related vehicle failures, the safe use and practices of Emission Inspection system equipment, with special attention to safe vehicle/dynamometer testing practices.

BIM 038  Office Technologies and Procedures
Prerequisites: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course focuses on the integration of office technologies and business skills for the office professional. Students in the course learn to work with the Internet, search engines, e-mail, and office applications used in electronic scheduling, presentations, word processing, and desktop publishing. Students also gain hands-on experience with office equipment such as reprographics, Webcams, and other office technologies used in today’s electronic workplace. The course integrates administrative skills, written communication, and technology proficiency required to take the user into the 21st century workplace. (CSU)

BIOL 002  General Zoology

Prerequisites: BIOL-001 Core Biology with a grade of "C" or better. Prerequisite Skills: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is a survey of the major animal groups based upon structural and chemical similarities, as well as the symbiotic relationship among different species and their evolution. The course considers comparative anatomy, physiology, and genetic characteristics in the determination of the evolutionary relationships. Zoology covers the evolution of single-cell organisms to more advanced species. Ecology and impact of major phyla on their environment are discussed. This course prepares the students for advanced courses in Zoology and satisfies the elementary zoology requirements for medicine, pharmacy, dentistry, game specialist, teachers of biology, and majors in the biological sciences. Off-campus field trips are required. (UC, CSU)

BIOL 003  General Botany

Prerequisites: BIOL-001 Core Biology with a grade of "C" or better. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is a study of the life and activities of plants followed by an introduction to plant physiology, plant structure, plant genetics, plant ecology, plant evolution, and a general survey of the major plant groups. A Survey of diversity is extended to both the Fungi and the Protista Kingdoms. Lastly an ecology unit is studied that investigates the ecological principles of ecosystems, communities, and of populations. The course is for the pre-professional student in the biological sciences and is fundamental for the student planning to specialize in forestry, horticulture, agriculture, food processing, pharmacy, and other subjects requiring a scientific knowledge of plant life. Field trips are included. This course meets the CSU general education laboratory science requirement and IGETC requirements. (UC, CSU)

Prerequisites: None. Prerequisite Skills: 1. Reading Level II. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is an introduction to biology for non-majors. Biology includes all aspects of the scientific study of life. In this course, the structure, function, and behavior of organisms are studied at the molecular, cellular, organismal, and environmental levels within an evolutionary conceptual framework. On and off-campus field work is required. The course meets the CSU general education laboratory science requirement and IGETC requirements. (UC, CSU)

Prerequisites: CHEM-003A Introduction to Chemistry with a grade of "C" or better.
Prerequisite Skills: 1. Reading Level II. Corequisites: None. Limitations on Enrollment: None. Advisories: BIOL-001 with a grade of "C" or better. This course is a study of microorganisms with the main emphasis on bacteria and the disease process. Laboratory work includes cultural, morphological, growth requirements and biochemical characteristics of microorganisms. Basic laboratory skills of the microbiologist are emphasized. The course is recommended for the student planning to enroll in the SJDC Nursing Program. The student who plans to transfer to a college or university, which requires a 5 unit course in bacteriology or microbiology, is advised to enroll in BIOL 023. (CSU)

Advisories: BIOL-011 ENG-079 or Composition Level III MATH-082 each with a grade of "C" or better or minimum level of 5 on the Math Placement Test. This course is a study of the structural organization of the human body: gross and microscopic structure of the integumentary, skeletal, muscular, nervous, sensory, endocrine, cardiovascular, lymphatic, respiratory, digestive, excretory, and reproductive systems, from cellular to organ system levels of organization. This course is primarily intended for nursing, allied health, kinesiology, and other health related majors. This course covers structure of the human body at the cell, tissue, organ, and system level. A systems approach is taken with microscopy and gross anatomy of all systems. Emphasis is placed on structure-function relationships. This is a majors level course with designed rigor. The laboratory includes study of microscopic specimens, organ and organism dissection, and models. (UC, CSU).

Prerequisites: None. Prerequisite Skills: 1. Reading Level II. Corequisites: None. Limitations on Enrollment: None. Advisories: CDEV-021 CDEV-031A ENG-079 each with a grade of "C" or better. This course is designed to prepare the student to supervise, evaluate, and support the performance of adults in an early childhood classroom. The skills necessary to meet adult needs while simultaneously meeting the needs of children are examined. The relationship of the physical environment of the classroom to ease of supervision is stressed.

CDEV 093V  Work Experience: Child Development and Education

Prerequisites: None. Corequisites: None. Limitations on Enrollment: Work Experience: The student must enroll in a course in the discipline directly related to the work experience. The student must enroll in a minimum of 7 units including work experience units, during the semester. For summer session, the student must enroll in one related course in addition to work experience. The combined total number of units a student may take in work experience and occupational practice may not exceed a maximum of 16 units. Participation requires submission and approval of work experience program objectives and an employer work experience agreement. Advisories: GUID-030 GUID-031 GUID-032 GUID-033 each with a grade of "C" or better. This course is designed for the student employed or wanting to gain practical experience working in the early childhood education setting. The course objectives are developed by the student in consultation with his or her supervisor. The student is engaged in a specific research project or on-the-job learning activities under the supervision of the work site supervisor and college work experience instructor.

ELEC 030  Fundamentals of Electricity

Prerequisites: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed to present the fundamental principles of electricity, magnetism and alternative energy. The student is introduced to the concepts and applications through lecture and laboratory for both direct (DC) and alternating current (AC). The student develops skills in the measurement, construction, and analysis of electrical circuits. (CSU)

ELEC 031  Electrical Wiring Methods

Prerequisites: ELEC-030 Fundamentals of Electricity or ELECT-011 AC and DC Network Analysis or ELECT-012 Solid State Devices each with a grade of "C" or better. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed to include the theory and skills involved in planning and installing nonmetallic sheathed cable, electrical metallic tube, and rigid conduit. The course also includes computations, building of electrical services, grounding, and electrical safety. (CSU)

58103  TTh 7:30am-10am  7.0 BUDD 106  Zimmerman, M  0
     TTh 10am-1pm  BUDD 106  Zimmerman, M

ELEC 034  Motor Controls

Prerequisites: ELEC-030 Fundamentals of Electricity or ELECT-011 AC and DC Network Analysis each with a grade of "C" or better. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed to introduce the theory and advanced application of DC motors and controls and the advanced application of AC motors and three-phase alternators. Single-phase transformers, three-phase transformers, and control (ladder) diagrams are included. (CSU)

ELEC 037  Introduction to Programmable Logic Controllers

Prerequisites: ELEC-030 Fundamentals of Electricity or ELECT-011 AC and DC Network Analysis each with a grade of "C" or better. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course introduces the fundamentals of the operation and use of the Programmable Logic Controller (PLC). The PLC uses programmable memory to store instructions and executes specific functions that include on/off control, timing, counting, and sequencing arithmetic used in process and machine control systems. PLC principles, hardware, and software will be emphasized. Ladder logic is used in programming and troubleshooting the PLC. (CSU)

ELEC 052  Advanced Solar Photovoltaic Systems Installation

Prerequisites: ELEC-051 Fundamentals of Solar Photovoltaic Systems; ELEC-030 Fundamentals of Electricity or ELECT-011 AC and DC Network Analysis each with a grade of "C" or better. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This is an advanced course in Solar Photovoltaic (PV) installation practices. Topics include PV hardware, software, module installation, site assessment, system sizing, National Electrical Codes requirements, and preparation for the North American Certified Energy Practitioners (NABCEP) examinations. (CSU)

ELECT 011   AC and DC Network Analysis
Prerequisites: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None. The Electronics Technology Program provides students with theoretical background and practical experience in meeting the technical requirements of electronics and electrical technology. The course sequence is designed to meet the skill and training needs of employers and to prepare students for technical employment. This course is designed to present the passive components in electronics from atomic structure through resonance. Laboratory exercises are utilized to familiarize the student with basic electronics test equipment and simple AC and DC (Alternating Current and Direct Current) circuits. (CSU)

ELECT 012   Solid State Devices
Prerequisites: ELECT-011 AC and DC Network Analysis with a grade of "C" or better. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed to present the theory, operation, and application of solid-state devices. The course stresses the application of bipolar transistors, field effect transistors, opto-devices, and the thyristor family in rectifier amplifiers, detectors, and other basic systems. Laboratory exercises are utilized to reinforce the theory. (CSU)

ELECT 030B  Advanced Electronic Computer Networks

Prerequisites: ELECT-030A Basic Electronic Computer Networks with a grade of "C" or better. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course describes the architecture, components, and operation of CISCO routers, and explains the principles of routing and routing protocols. Students analyze, configure, verify, and troubleshoot the primary routing protocols (CISCO) RIPv1, RIPv2, EIGRP, and OSPF. (CSU)

61173 MWF 6pm-8pm 4.0 MH 401 Calderon, S 0
61173 MWF 8pm-10pm MH 401 Calderon, S
Section 61173 will be held at Mountain House.

ELECT 034  Network Systems Security

Prerequisites: ELECT-030D Network Hardware Application and ELECT-030E Advanced Electronic Network Systems each with a grade of "C" or better. Prerequisite Skills: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course will teach students to design and implement security solutions that will reduce the risk of revenue loss and hardware vulnerability. The course will be an introduction to network security and overall security processes. There will be particular emphasis on security technologies, products and solutions, firewall and secure router design, installation, configuration and maintenance, and securing the network at layers 2 and 3 of the OSI model (Open Systems Interconnection Model). This course prepares the students for industry professional level certification such as the CCNA Security Certification. (CSU)

### ENG 078B  Accelerated Reading and Writing 2

**Prerequisites:** None.  **Prerequisite Skills:** 1. ENGLISH 78A with a minimum grade of "C" or reading level 1.3.  **Corequisites:** None.  **Limitations on Enrollment:** None.  **Advisories:** ENG 078A with a grade of "C" or better.  

This contextualized course is designed to prepare students for the literacy demands of career and higher education. The course includes reading and writing in response to a variety of expository texts and reviews basic rules of grammar and usage to develop skills in paragraph and essay writing. Promotion to Level II in reading and Level II in composition will be determined by faculty after examination of a portfolio of the student's work. Units earned in this course do not count toward the associate degree.

Prerequisites: MATH-080 Elementary Algebra or higher-level Math (min C), or a minimum of Level 4 on the COMPASS math placement test AND ENG-079 Preparatory English each with a grade of "C," or better or higher-level ENG (min C), or Composition Level III. Prerequisite Skills: 1. Reading Level II or higher. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is an introduction to the principles of geology with emphasis on Earth processes. This course focuses on the internal structure and origin of the Earth and the processes that change and shape it. The laboratory component focuses on the identification of rocks and minerals, topographic and geologic map exercises demonstrating the work of water, wind, ice and gravity and effects of tectonic activity. Field trip(s) may be required. This course is designed for science majors. 3 hours lecture and 3 hours lab each week.
GEOL 001B  Historical Geology w/Lab

Prerequisites: GEOL-001A Physical Geology w/Lab with a grade of "C" or better. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is an introduction to Earth's history and the life it supports. Subjects include geologic dating, plate tectonics, stratigraphy, fossils, biological evolution, the planets origin and the processes that have influenced paleogeography during the past 4.6 billion years. The laboratory component includes geologic dating, plate tectonics, stratigraphy, fossils, biological evolution, the planets origin and the processes that have influenced paleogeography during the past 4.6 billion years.

Limitations on Enrollment: None. Advisories: ENG-001A MATH-082 each with a grade of "C" or better. This course is an introduction to the processes that are at work changing the Earth today. Within the context of global tectonics, it explores the origins of rocks and minerals and the dynamics of processes such as igneous activity and seismicity that are driven by Earth’s internal heat. It also examines how air, water, and ice move in response to gravity and energy from the Sun, sculpting Earth’s surface by eroding, transporting and depositing weathered rock materials. Additionally, the origin and history of the Earth including its place in the solar system, geologic dating methods, and geologic resources and disasters (e.g., earthquakes, flooding, volcanic hazards, etc.) are explored. This course is designed for non-science majors. 3 hours lecture each week.

MATH 082 Intermediate Algebra

Prerequisites: MATH 080 Elementary Algebra, or college elementary algebra with a grade of "C" or better or an assessment level 4 or higher on the COMPASS Math Placement Test. Prerequisite Skills: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None.

This course is the second course in the algebra sequence. Elementary Algebra concepts including linear and quadratic equations, factoring polynomials, rational expressions and equations, exponents, radicals, equations of lines and systems of equations are reviewed and extended. New algebra topics such as functions, translation and reflection of functions, inverse functions, exponential and logarithmic functions and equations, absolute value equations and inequalities, polynomial and rational inequalities, conic sections, sequences, series and the Binomial Theorem are also included.

SPAN 003A Spanish for Spanish Speakers I

Prerequisites: SPAN-002 Elementary Spanish with a grade of "C" or better. Prerequisite Skills: 1. Advisory Reading Level II Professor Manuel Camacho reviewed the course outline of record for SPAN 003A, Spanish for Spanish Speakers I, and had its textbook tested for readability. The course textbook has a Flesch-Kincaid Grade Level of 12.0 and a reading ease score of 19.4 Based on the course assignments and readability test results, an advisory of Reading Level II is recommended in order for students to be successful in SPAN 003A. Corequisites: None. Limitations on Enrollment: None. Advisories: ENG-079 with a grade of "C" or better. This course is designed for heritage speakers of Spanish or other linguistically qualified students. It provides instruction that builds upon the existing reading, writing, speaking and listening skills and the cultural heritage and knowledge of these students. The course will increase awareness of linguistic registers, discuss items beyond the familiar routine and develop an appreciation for Hispanic cultures as manifested in Spanish speaking countries and in the United States. This course is entirely conducted in Spanish. (CSU)

SPAN 004  Intermediate Spanish II

Prerequisites: SPAN-003 Intermediate Spanish with a grade of "C" or better. Prerequisite Skills: 1. Advisory Reading Level II. Corequisites: None. Limitations on Enrollment: None. Advisories: ENG-079 with a grade of "C" or better. This course continues to expand upon culture and facilitate language acquisition through listening, speaking, reading and writing. Students will interact with more sophisticated authentic language in context. Content continues to expand in order to express more complex ideas in order to express personal meaning and to apply different strategies and techniques to go beyond casual conversation and express opinions, make suggestions on familiar topics, as well as some abstract issues and plans. Students demonstrate an increased awareness of cultural norms, values, and culturally relevant appropriate customs and events. Accuracy becomes quite high for high frequency structures and vocabulary but more complex discourse is still developing and requires a somewhat sympathetic listener or reader. Students will continue to demonstrate the ability to think critically by analyzing linguistic structures and reflecting on and making cross-cultural comparisons. This course is taught in Spanish.
