A J 021  Criminal Justice in Society

Prerequisites: None. Prerequisite Skills: 1. Advisory Reading Level II. Corequisites: None. Limitations on Enrollment: None. Advisories: ENG-001A with a grade of "C" or better.

This course introduces students to the characteristics of the criminal justice system in the United States. Focus is placed on examining crime measurement, theoretical explanations of crime, responses to crime, components of the system, and current challenges to the system. The course examines the evolution of the principles and approaches utilized by the justice system and the evolving forces which have shaped those principals and approaches. Although justice structure and process is examined in a cross cultural context, emphasis is placed on the US justice system, particularly the structure and function of US police, courts, and corrections. Students are introduced to the origins and development of criminal law, legal process, and sentencing and incarceration policies. (UC, CSU)

### BIM 038  Office Technologies and Procedures

Prerequisites: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course focuses on the integration of office technologies and business skills for the office professional. Students in the course learn to work with the Internet, search engines, e-mail, and office applications used in electronic scheduling, presentations, word processing, and desktop publishing. Students also gain hands-on experience with office equipment such as reprographics, Webcams, and other office technologies used in today’s electronic workplace. The course integrates administrative skills, written communication, and technology proficiency required to take the user into the 21st century workplace. (CSU)

BIM 081  Records Management and Filing

Prerequisites: None. Corequisites: None. Limitations on Enrollment: None. Advisories: CSA-020 with a grade of "C" or better or concurrent enrollment in CSA 020. This course is designed to build an understanding of the basic principles and procedures for manual and electronic records storage and control. Specific rules compatible with the Association of Records Managers and Administrators (ARMA) guidelines for alphabetic indexing are studied, then applied to alphabetic, geographic, subject, and numeric methods of records storage. Management aspects of records control; evaluation of records storage practices; requisition/charge-out and transfer procedures; and legal and ethical issues in the records management field are studied.

BIOL 003 General Botany

Prerequisites: BIOL-001 Core Biology with a grade of "C" or better. Corequisites: None.
Limitations on Enrollment: None. Advisories: None. This course is a study of the life and activities of plants followed by an introduction to plant physiology, plant structure, plant genetics, plant ecology, plant evolution, and a general survey of the major plant groups. A Survey of diversity is extended to both the Fungi and the Protista Kingdoms. Lastly an ecology unit is studied that investigates the ecological principles of ecosystems, communities, and of populations. The course is for the pre-professional student in the biological sciences and is fundamental for the student planning to specialize in forestry, horticulture, agriculture, food processing, pharmacy, and other subjects requiring a scientific knowledge of plant life. Field trips are included. This course meets the CSU general education laboratory science requirement and IGETC requirements. (UC, CSU)

Prerequisites: CHEM-003A Introduction to Chemistry with a grade of "C" or better.
Prerequisite Skills: 1. Reading Level II. Corequisites: None. Limitations on Enrollment: None. Advisories: BIOL-001 with a grade of "C" or better. This course is a study of microorganisms with the main emphasis on bacteria and the disease process. Laboratory work includes cultural, morphological, growth requirements and biochemical characteristics of microorganisms. Basic laboratory skills of the microbiologist are emphasized. The course is recommended for the student planning to enroll in the SJDC Nursing Program. The student who plans to transfer to a college or university, which requires a 5 unit course in bacteriology or microbiology, is advised to enroll in BIOL 023. (CSU)

Prerequisites: CHEM-003A Introduction to Chemistry with a grade of "C" or better.
Prerequisite Skills: 1. Reading level II. Corequisites: None. Limitations on Enrollment: None. Advisories: BIOL-001 with a grade of "C" or better. This course is the study of the nature and activities of microorganisms and their relationships to human life and human interest. The laboratory activities include bacteriology and mycological techniques, demonstration of physiological activities, isolation, and identification of microorganisms, a student designed independent experiment and may include field trips to demonstrate practical applications. This course meets introductory requirements for majors in microbiology and for other students requiring knowledge of microbiology. (UC, CSU)

### BIOL 030  Human Sexuality

Prerequisites: None. Prerequisite Skills: 1. Reading level II. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is an introduction to human sexuality. It covers the biological, psychological, social, cultural, and historical aspects of human sexuality. Students would be engaged in discussions regarding social and psychological issues of fertility, pregnancy and childbirth, different methods of birth control, sexually transmitted diseases, sexual behavior, homosexuality and bisexuality and intercourse. Students would evaluate their own sexual behavior, and attitudes. This course is academic rather than therapeutic. (UC, CSU)

BIOL 031  Human Anatomy

Prerequisites: None. Prerequisite Skills: 1. Reading Level II. Corequisites: None.
Limitations on Enrollment: None. Advisories: BIOL 011, Humans in the Biological World, with a minimum grade of "C"; ENG-079, Preparatory English, with a minimum grade of "C" or Composition Level III; MATH 092, Intermediate Algebra (STEM), with a minimum grade of "C" or MATH 082, Intermediate Algebra, with a minimum grade of "C" or minimum level 5 on the COMPASS Math Placement Test. This course is a study of the structural organization of the human body: gross and microscopic structure of the integumentary, skeletal, muscular, nervous, sensory, endocrine, cardiovascular, lymphatic, respiratory, digestive, excretory, and reproductive systems, from cellular to organ system levels of organization. This course is primarily intended for nursing, allied health, kinesiology, and other health related majors. This course covers structure of the human body at the cell, tissue, organ, and system level. A systems approach is taken with microscopy and gross anatomy of all systems. Emphasis is placed on structure-function relationships. This is a majors level course with designed rigor. The laboratory includes study of microscopic specimens, organ and organism dissection, and models. (UC, CSU, C-ID BIOL 110B).

This course is designed for the student employed or wanting to gain practical experience working in the early childhood education setting. The course objectives are developed by the student in consultation with his or her supervisor. The student is engaged in a specific research project or on-the-job learning activities under the supervision of the work site supervisor and college work experience instructor.

CHEM 001A  General Chemistry

Prerequisites: CHEM 003A, Introduction to Chemistry, with a minimum grade of "C" and MATH 092S, Intermediate Algebra (STEM), with a minimum grade of "C" or MATH 082, Intermediate Algebra, each with a grade of "C" or better or minimum assessment level 5 on the Math COMPASS Placement Test. Prerequisite Skills: Reading Level II. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed as a technical introduction to chemistry for the student intending to major in chemistry, medicine, dentistry, pharmacy and other science oriented careers which require a rigorous understanding of the fundamental principles of chemistry. (UC, CSU, C-ID CHEM 110, CHEM 1A + CHEM 1B = C-ID CHEM 120S)

CHEM 001B  General Chemistry

Prerequisites:  CHEM-001A General Chemistry with a grade of "C" or better.  Corequisites: None. Limitations on Enrollment: None.  Advisories: None.  This course is the second semester of a one-year sequence in general chemistry designed for the student intending to major in chemistry, medicine, dentistry, pharmacy, etc., each of which require a rigorous understanding of the fundamental principles of chemistry. The topics covered will include, but not be limited to, acids and bases, chemical equilibrium, thermodynamics, oxidation-reduction, chemical kinetics, nuclear chemistry, descriptive chemistry, and coordination chemistry.  The laboratory portion of the course will support the above topics including both qualitative and quantitative experiments, analysis of data and error propagation. CHEM 010  Exploring Everyday Chemistry

Prerequisites: MATH 090, Beginning Algebra, with a grade of "C" or better or Math assessment level 4. Prerequisite Skills: 1. Reading Level II. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed to provide an introduction to chemistry and the role it plays in modern society. The course is designed for non-science majors such as liberal arts, social science, education, or anyone who is curious about the chemistry involved in everyday things. The student learns about topics of current interest and global importance, including global warming, depletion of the ozone layer, energy, and health issues. (UC, CSU, C-ID CHEM 100)

CHEM 012A  Organic Chemistry

Prerequisites: CHEM-001A General Chemistry with a grade of "C" or better. Prerequisite Skills: 1. Prerequisite Reading Level II. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed as a technical and experimental introduction to Organic Chemistry for the student intending to major in premedicine, pre dental, pharmacy, chemistry, biology, and chemical engineering. Each of these requires a rigorous understanding of the fundamental principles of organic chemistry, including the nomenclature, reactions and reaction mechanisms of both aliphatic and aromatic hydrocarbons plus those of functional group compounds. E M 070  Introductory Techniques for Electron Microscopy

Prerequisites: None. Prerequisite Skills: 1. None. Corequisites: None. Limitations on Enrollment: None. Advisories: Reading level II. This course is a beginning electron microscopy lecture and laboratory course dealing with the alignment and operation of the transmission electron microscope (TEM) as well as the preparation of particles and replicas for viewing on the TEM. The course includes individual training in the use of the TEM and techniques for photography.

ELECT 011  AC and DC Network Analysis

Prerequisites: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None. The Electronics Technology Programs provides students with theoretical background and practical experience in meeting the technical requirements of electronics and electrical technology. The course sequence is designed to meet the skill and training needs of employers and to prepare students for technical employment. This course is designed to present the passive components in electronics from atomic structure through resonance. Laboratory exercises are utilized to familiarize the student with basic electronics test equipment and simple AC and DC (Alternating Current and Direct Current) circuits. (CSU)

Advisory: Reading Level II. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is an introduction to the engineering profession and processes used by engineers and technologists. Computer applications are used to demonstrate the problem-solving techniques used by engineers and technologists. The course explores the branches of engineering, the functions of an engineer, and the industries in which engineers work. Engineering education pathways are explored and effective strategies are discussed for students to reach their full academic potential. Communication skills are developed pertinent to the engineering profession. This course is designed for the student considering career possibilities in engineering and/or engineering technology. Prerequisites: CHEM-001A, General Chemistry, and PHYSIC-004A, Principles of Physics: Mechanics, each with a grade of "C" or better. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course presents the internal structures and resulting behaviors of materials used in engineering applications, including metals, ceramic, polymers, composites, and semiconductors. The emphasis is upon developing the ability both to select appropriate materials to meet engineering design criteria and to understand the effects of heat, stress, imperfections, and chemical environments upon material properties and performance. Laboratories provide opportunities to directly observe the structures and behaviors discussed in the course, to operate testing equipment, to analyze experimental data, and to prepare reports. Prerequisites: FASHION-002 Introduction to the Fashion Industry or ID-002 Introduction to Interior Design each with a grade of "C" or better. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course will introduce students to forecasting and its use by the creative design industries with the aim of developing an intuitive and intellectual approach to predicting future trends, on both fashion and interiors, as well as consumer behavior and retailing. The course provides students with in-depth knowledge of the relationship between forecasting, trend prediction, marketing, economics and style movements. The student will develop research skills in historical context, consumer trends and buying patterns, fads, crazes and cults, all of which play a part in the analysis of style movements. (CSU)

FASHION 036  Flat Pattern I

Prerequisites: FASHION-030, Basic Industry Sewing, with a grade of "C" or better.
Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is a study of the industry techniques of flat pattern-making and basic slopers for the bodice, sleeve, and skirt to standard sizes. Use of slopers as a foundation for designing workroom sample patterns for shirts, blouses, and skirts to industry sizes are discussed and analyzed. Students create style variations by manipulating basic pattern blocks which are transferred from sketches into usable first patterns for apparel productions. Sample garments are then created from the patterns. (CSU)

### GEOL 010  General Geology

Prerequisites: Reading Level II. Corequisites: None. Limitations on Enrollment: None. Advisories: ENG 001A, Reading and Composition, with a minimum grade of "C" and MATH 092S, Intermediate Algebra (STEM), with a minimum grade of "C" or MATH-082, Intermediate Algebra, with a minimum grade of "C". This course is an introduction to the processes that are at work changing the Earth today. Within the context of global tectonics, it explores the origins of rocks and minerals and the dynamics of processes such as igneous activity and seismicity that are driven by Earth's internal heat. It also examines how air, water, and ice move in response to gravity and energy from the Sun, sculpting Earth's surface by eroding, transporting and depositing weathered rock materials. Additionally, the origin and history of the Earth including its place in the solar system, geologic dating methods, and geologic resources and disasters (e.g., earthquakes, flooding, volcanic hazards, etc.) are explored. This course is designed for non-science majors. 3 hours lecture each week. (UC, CSU)

Prerequisites: MATH-002, Calculus II, with a grade of "C" or better. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This is an introductory course in Linear Algebra. This course develops the techniques and theory needed to solve and classify linear systems of equations. Techniques include elementary row operation, Gaussian elimination and matrix algebra. Properties of two and three dimensions vectors are studied and abstract vector spaces are introduced. Vector space and Matrix theory are presented. Topics include linear transformations, eigenvalues and eigenspaces, orthogonality, norms, and inner products. Applications of linear algebra are included. (UC, CSU, C-ID MATH 250)

MATH 012  Introduction to Probability and Statistics

Prerequisites: MATH-092G, Intermediate Algebra, or MATH-092S, Intermediate Algebra (STEM), or MATH-082, Intermediate Algebra, each with a grade of "C" or better or minimum level of 5 on the Math Placement Test. Prerequisite Skills: None. Corequisites: None. Limitations on Enrollment: None. Advisories: Reading level II. This course is designed to acquaint the student with elementary techniques used in statistical analysis. Emphasis is on descriptive statistics, elementary probability concepts, probability distributions, statistical inference, and simple linear regression analysis, with applications in business, social sciences, psychology, life sciences, health sciences and education. A graphing calculator is recommended. Instructor demonstrations utilize a graphing calculator. (UC, CSU)

Advisory: The ability to read, write and communicate orally at a college level is recommended for this course. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is one of two courses designed for the pre-service elementary teacher. The course focuses on the development of quantitative reasoning skills through in-depth, integrated explorations of topics in mathematics, including real number systems and subsystems. Emphasis is on comprehension and analysis of mathematical concepts and application of logical reasoning. Throughout the course accurate use of mathematical terminology and notation will be emphasized. (UC, CSU)

Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed to fulfill the mathematics requirements of the student in business administration, management, life sciences, or social sciences. The course covers a variety of topics including linear functions, systems of equations and inequalities, matrices, linear programming, elementary combinatorial techniques, sets, Venn diagrams, elementary probability and statistics, the mathematics of finance and Markov Chains. Application problems to business, economics and social sciences are emphasized throughout. Graphing calculators are used extensively. The TI-84 PLUS is used for instructor demonstrations. (UC, CSU)

MCOM 010  Introduction to Multimedia

Prerequisites: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed to provide basic skills in the art of multimedia storytelling and project building with a journalism emphasis. Techniques that will be explored include use of video, photos, animation, graphic design, and text to convey interactive news and feature stories through the Internet and other electronic media. In addition, students will use critical thinking skills to develop the best way to build media content into a central project. Ethical considerations, including the use of contributed content, will also be examined. (CSU, C-ID JOUR 120)

MCOM 011  Newswriting

Prerequisites: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed to offer an introduction to gathering, synthesizing, organizing and writing news in fundamental journalistic style across all media platforms. Emphasis is placed on the personal interview as a vital process in structuring an objective presentation of news and feature stories. Accompanying the various areas of writing instruction is an introduction to the basics of being a multimedia reporter, developing photo, video and audio capturing skills. It includes the role of the journalist and related legal and ethical issues. Students will report and write based on their original interviews and research to produce news content. Experiences may include covering speeches, meetings and other events, writing under deadline, and using AP Style. (CSU, C-ID JOUR 110)

RAD 013  Principles of Radiographic Technique

Prerequisites:  RAD-010, Introduction to Radiography, with a grade of "C" or better.
Advisories:  None.  This course is designed to introduce the student to the principles involved in producing a diagnostic radiograph. The course includes detailed instruction in radiographic film, equipment, and accessories utilized in image production. The primary factors of kilovoltage (KV), milliamperage (MA), time, and distance are explained. Practical application of exposure calculations is performed. Also included is: discussion of the sensitometric properties of x-ray film; quality control, patient characteristics; pathological conditions relative to technique selection; the principles and designs of radiographic technique charts; and fundamental principles of digital radiography and fluoroscopy.  (CSU)

***** MF 8am-11am                4.0 SJGH  TBA JOB, J         0

### RAD 032  Sectional Anatomy

Prerequisites: RAD-021 Advanced Radiographic Anatomy with a grade of "C" or better.  
Corequisites: None.  Limitations on Enrollment: Admission to the Radiological Technology Program.  Advisories: None.  
This course is designed to provide student with an understanding of anatomy in three dimensions. Transverse, sagittal, and coronal sections of anatomy are discussed, along with dimensional relationships. Utilizing examination examples of magnetic resonance imaging (MRI), computed tomography (CT), and ultrasound, each region of the body is studied. The student gains an understanding of disease process and abnormal pathology as presented in three dimensions. (CSU)

SPAN 003A Spanish for Spanish Speakers I

Prerequisites: SPAN-002, Elementary Spanish, with a grade of "C" or better or 2 years of high school Spanish or equivalent. Prerequisite Skills: 1. Advisory Reading Level II
Corequisites: None. Limitations on Enrollment: None. Advisories: ENG-079 with a grade of "C" or better. This course is designed for heritage speakers of Spanish or other linguistically qualified students. It provides instruction that builds upon the existing reading, writing, speaking and listening skills and the cultural heritage and knowledge of these students. The course will increase awareness of linguistic registers, discuss items beyond the familiar routine and develop an appreciation for Hispanic cultures as manifested in Spanish speaking countries and in the United States. This course is entirely conducted in Spanish. (UC, CSU)

SPAN 004 Intermediate Spanish II

Prerequisites: SPAN-003 Intermediate Spanish with a grade of "C" or better. Prerequisite Skills: 1. Advisory Reading Level II. Corequisites: None. Limitations on Enrollment: None. Advisories: ENG-079 with a grade of "C" or better. This course continues to expand upon culture and facilitate language acquisition through listening, speaking, reading and writing. Students will interact with more sophisticated authentic language in context. Content continues to expand in order to express more complex ideas in order to express personal meaning and to apply different strategies and techniques to go beyond casual conversation and express opinions, make suggestions on familiar topics, as well as some abstract issues and plans. Students demonstrate an increased awareness of cultural norms, values, and culturally relevant appropriate customs and events. Accuracy becomes quite high for high frequency structures and vocabulary but more complex discourse is still developing and requires a somewhat sympathetic listener or reader. Students will continue to demonstrate the ability to think critically by analyzing linguistic structures and reflecting on and making cross-cultural comparisons. This course is taught in Spanish. WELDING 010  Basic Welding for the Trades

Prerequisites: None. Corequisites: None. Limitations on Enrollment: None. Advisories: None. This course is designed to serve students who need basic welding skills. The course covers basic theory, practice and application of metal joining processes, metal cutting, and welding for ferrous and nonferrous metals and alloys. Welding methods include shielded metal arc welding (SMAW), oxy-acetylene (O/A), and an introduction to gas metal arc welding (GMAW) and gas tungsten arc welding (GTAW). (CSU)
